## 360° Corporate Responsibility at Deuter

Sustainability isn't just a buzz word at Deuter. Social responsibility and conservation aren't new to us, they have been deeply rooted in our company for decades.

2015 Deuter joined the Partnership for Sustainable Textiles. The initiative was founded by the state of Germany in October 2014 and unites agencies from politics, the economy and civil society.

We have been working with our partner 'Duke' in Vietnam for over 20 years now. We have been cooperating (and) with our partner Bellmart in China for over 10 years now and since 2015 in Myanmar. Deuter has consciously decided against supplier hopping, meaning the frequent change of suppliers because of more favourable prices. Since 2011 our engagement for proper labour conditions in our factories and also at our company headquarters is monitored regularly by the Fairwear Foundation (FWF). We were awarded LEADER in company evaluations by the FWF for our efforts.

### Our demand

We are also a bluesign® system partner and have been working on creating eco-friendly production processes and materials since 2008. This isn't always easy since Deuter makes highly complex products that often consist of more than 200 single pieces. By now 100 % of our production partners are bluesign® system partners. Animal welfare is also important to us. We exclusively use down with the Responsible Down Standard certificate.

Eugen and Özlem are true masters of the sewing machine. No matter how old the backpacks are we endeavour to repair them.

### DEUTER PROMISE

#### The Deuter Promise – life-long repair service

Quality and sustainability are what matters at Deuter. This responsibility doesn't end with the sale of our products. We want to be a life-long companion. That's why we give you the Deuter Promise for our products and offer you a world-wide and life-long repair service. More information on our website: [www.deuter.com/Promise](http://www.deuter.com/Promise)

## Goal of the partnership is to combine the strength and expertise of its members in order to bring about social, ecological and economic improvements along the textile supply chain and in the apparel industry.

The Partnership for Sustainable Textiles thus unifies our engagement for labour conditions in the producing countries, environmental protection as well as animal welfare. At the same time it allocates its strengths where we as medium-sized company cannot advance alone. Together with other members projects like supplier training of the deeper supply chain can be implemented. Deuter would not be able to have a direct influence or would have too little influence on the deeper supply chain otherwise. Framework requirements in producing countries can be improved on a governmental level.

The Partnership for Sustainable Textiles is still young. Members were asked to define an action plan with precise goals for single areas at the beginning of 2017 for the first time. Starting in 2018 all members must report on their action plans and progress publicly.

### R.D.S Responsible Down Standard and bluesign®

- Durability
  - Repair service
  - bluesign® system partner since 2008
  - 100 % of suppliers bluesign® system partner
  - bluesign® products: ASTRO-Serie, Kikki
  - PFC-free products: Trail, Kid Comfort, Kiki, Pico, Belt, all Deuter Sleeping Bag Series, X-Venture, Giga, Vista, Step Out, Tommy, Strike, Ypsilon
- The Goal: Deuter will be entirely PFC-free by 2020

### Fair Wear Foundation

- Long lasting partnership with only two suppliers
- Leader status in FWF company assessment since 2013
- FWF Best Practice Award 2015

Deuter has developed different systems specifically adapted to the various sports and their specific demands.

BACKSYSTEMS

On small to medium backpacks that are at home in easier terrain we go for maximum ventilation. The heart of the Aircomfort systems – tested and proven for decades – is its flexible spring steel frame. It is extremely durable, provides stable tension for the airy back mesh and creates the ventilation space between pack and wearer’s back for the moist, warm air to dissipate. 1984 Deuter invented & patented the first mesh back system worldwide.

THE RESULT:

Up to 25 % less perspiration thanks to the maximum ventilation achieved by the Aircomfort mesh construction. This reduces circulatory stress for more endurance – tested and proven by the renowned Research Institute Hohenstein.

The easiest way to carry heavy loads is when backpack and wearer become one. This is what our Aircontact principle is all about: the body contact system brings the weight close to the body and therefore close to the center of gravity. This results in full pack control and an effective load transfer. Furthermore, our Aircontact cushions made from special hollow chamber foam guarantee fantastic ventilation due to the pump effect of every movement.

THE RESULT:

Up to 15 % less perspiration as with a standard compact back system (proven in tests conducted by Gabriel L.&T and the University of Erlangen) – combined with outstanding load transfer and a secure, perfectly balanced fit.

A bike pack always has to sit secure and snug on your back – even on the roughest rides. Our unique Airstripes System takes care of that and offers effective ventilation. It consists of two contoured, air-channelled foam profiles that are covered with a highly breathable Wide AirMesh lining. The reduced contact surface results in an optimized fresh air circulation. Also, the pack’s load is kept close to the body and thus won’t throw the rider off balance.

THE RESULT:

The minimal contact surface area of the profiled Airstripes allows free air circulation over 80 % of the riders back, while still providing a secure, compact fit even on rough rides.

For alpine backpacks the combination of comfort, durability, functionality and low weight is essential. Deuter’s Alpine System answers this challenge by focusing on a compact, secure yet comfortable fit with its two flexible softstripe back pads that are perfectly adapted to the anatomy and follow the wearer’s movements. In combination with the pack’s sleek shape this keeps the load always close to the centre of gravity – thus guaranteeing full pack control.

THE RESULT:

The Alpine back combines a secure, compact fit for full pack control and full focus on the terrain with a top carrying performance and a comfortable ventilation between the two softstripe back pads.

Our lightweight backpacks come into their own during endurance sports and Alpine day treks. Reduced to the essential, they are ideal for comfortably carrying light to medium loads depending on the volume. However, lightness must never come at the expense of durability. That is and always was our corporate philosophy, because disposable products put a strain on the environment and a backpack that falls apart high up in the mountains can also be dangerous.

THE RESULT:

Our lightweights are designed for everyone who wants to travel light without forgoing carrying comfort and durability.

The ergonomically shaped back cushions of the Contact System hug the back and distribute the weight of the load evenly, relieving the load on the back. Additionally, loads are carried easiest when they are close to the body. Channels between the cushions as well the breathable, sturdy 3D Airmesh lining provide pleasant ventilation.

THE RESULT:

Ergonomically shaped Contact back cushions provide carrying comfort that relieves the back while keeping the weight of the load close to the body and distributing it evenly.

BACKSYSTEMS

## SL-COLLECTION

Female Specific Packs

### DEUTER SL-Team

Deuter's product development team for the women's specific SL line consists of female designers and top athletes from all disciplines / sports. It's almost an occupational habit that our experts can never stand still. Since 2006 they are always pushing forward – also when it comes to developing products.

Our rucksacks are designed to fit the average athletic build. However, since not everyone fits the norm it is likely that women's models will fit many male users perfectly well, and vice versa.

#### SHORTER BACK

Women usually have a shorter back than men. Our SL carrying systems are adapted to the female anatomy and therefore shorter.

#### SLIM-CUT SHOULDER STRAPS

The SL shoulder straps have a distinct S-shape and all-round soft edges. In addition the straps become slimmer towards their ends. For a perfect fit around the shoulder area - no pinching or chaffing. The shoulder straps lie closer together and are adapted to slimmer female shoulders.

#### CONICAL HIP-FINS

The closed SL hip belt forms a cone to perfectly adapt to the female anatomy. The conical shape is the result of the the ends of the hipbelt coming together in an upward direction and the anatomically adapted design for the SL hip fins. The hip fins perfectly hug the female hips.

Extra Long Series

FUTURA 30 EL

FUTURA 34 EL

FUTURA PRO 44 EL

TRANS ALPINE 32 EL

GIGA EL

### THE DEUTER EXTRA LONG SERIES

Tall people can enjoy a perfect fit with our Extra Long EL-models! Taller sportsmen and -women between 1.85 – 2 m often have difficulty finding backpacks that fit their longer backs. Our favourite Deuter backpack models are available to suit taller people with extended back lengths by 6-9 cm. Overall, backpacks in the Extra Long (EL) series have also grown in terms of volume. Back systems, features and details remain the same in the EL models as they are in the standard models, however.

Standard Fit

MY DEUTER IS MY

*Freedom*

“Friendships, experiences and moods are my motivation! I simply enjoy the moment, no matter if I’m ice climbing, on ski tours, free riding, paragliding, sport or alpine climbing, alpine tours, mountain or road biking. I cherish mountain adventures with my parents and brothers, my wife and our kids just as much as ventures on mountains like Fitz Roy. Deuter to me is a brand with history – and future!”

**MICHI BÜCKERS** is a certified mountain and skiing guide and Deuter brand ambassador. He started his career as a road bike racer. Today his list of outdoor sports is long and he loves to combine all of them.

NEW

# Trail Series

For mountaineers and Via Ferrata climbers that value a backpack that fits close to the body and offers ventilation at the same time.

Trail 30

**CONVENIENT, FAST ACCESS**  
to deeper lying material with the large zipped front opening featured in models with lid.

## Details Trail: 20 SL, 22, 28 SL, 30

good transfer of load with the flexible Delrin® U-Frame

flexible ActiveFit shoulder straps

hip belt is easy to adjust with its Pull-Forward construction

load adjustment straps

continuously adjustable chest strap

fast access to deeper lying gear via a two-way zipper in front

loops for helmet holder (accessory)

ice axe and hiking pole attachment – also useable for folding poles

compression straps integrated in main compartment

lid pocket with key clip

SOS Label

internal valuables pocket

wet laundry compartment

removeable rain cover

hydration system compatible

large zipped side pocket for stowing gear safely and an elastic side pocket for fast access

• loops to attach via-ferrata-set carabiners on shoulder straps

• perforated shoulder straps and hip fins allow maximum ventilation

• the flat lid construction allows the head to have enough freedom to move, even with a helmet

• with little gear: lid stowable in main compartment, unused strap can be fastened

• Material: 210 D PA / 600 D PES

## Further details Trail: 20 SL, 22

mesh hip fins flush mounted on cushions and attached far inside the backpack enable a solid fit – rapidly stowed in insert pockets

## 28 SL, 30

soft padded hip fins flush mounted on cushions and attached far inside the backpack enable a solid fit with snug feel

• zipped pocket on one hip fin

NEW

# Aircontact Trail System

deuter  
AIRCONTACT

**VERY COMFORTABLE, CONTROLLED FIT WITH EXCELLENT VENTILATION**  
guaranteed with the light Delrin® U-Frame contact back construction. It keeps the weight of the load compact and close to the back and therefore close to the body's centre of gravity. At the same time the back is pleasantly ventilated with the open-pore Aircontact cushions and the ventilation channel.

**SAFETY AND ORGANISATION ON VIA FERRATAS**  
for alpine athletes with the carabiner holders on shoulder straps.

**PACKED AWAY COMPACT**  
with the integrated compression so gear stays in place. Optimal volume adjustment is also possible when side pockets are full thanks to the straps that run inside the main compartment. Material is secured safely. Backpack can also be compressed while carrying it.

NEW

# Aircontact Trail Pro System

### GENTLE ON BACK AND SHOULDERS

The ergonomically innovative ECL hip fins literally hug the hips: they are mounted slim and high and flow into the back cushion. The weight is distributed evenly to the sacrum and pelvic areas and gently transferred to the musculoskeletal system. ECL cushions enable a stable fit. The strap system with automatic side compression and Pull-Forward system adjusts the backpack quick and compact.

### VERY COMFORTABLE, CONTROLLED FIT WITH EXCELLENT VENTILATION

guaranteed with the contact back construction with light permanently elastic spring-steel frame. It keeps the weight of the load compact and close to the back and therefore close to the body's centre of gravity. At the same time the back is pleasantly ventilated with the open-pore Aircontact cushions and the ventilation channel.

### SAFETY AND ORGANISATION ON VIA FERRATAS

for alpine athletes with the carabiner holders on the shoulder straps.

AC LITE

# AC Lite Series

For day hikers who value lightness with maximum ventilation.

AC Lite 18

**Details AC Lite:**  
14 SL, 18, 22 SL, 26

- lightweight
- flexible spring steel frame
- continuously adjustable chest strap

- hydration system compatible  
2.0 | AC Lite 14 SL, 18  
3.0 | AC Lite 22 SL, 26
- hiking pole loops

- lid pocket
- stretch side pockets
- detachable rain cover

- internal zip-ped valuables pocket
- wet laundry compartment

- reflective print
- practical single lid closure
- Material: 210 D PA

**Further details AC Lite:**  
14 SL, 18

- a waist belt and hip pads modelled to the shape of the pelvis provide carrying comfort

22 SL, 26

- ergonomically shaped, compact hip fins ensure good weight transfer

AC LITE

# Aircomfort System

**ERGONOMICALLY S-SHAPED  
SHOULDER STRAPS**

fit like gloves – comfortably padded and with Soft-Edges.

**ROBUST AND RELIABLY  
TENSIONED BACK MESH**

even under load. It is guaranteed by a lightweight frame made of break-proof spring steel. Extremely resilient and permanently elastic, it always jumps back to its original shape after deformation.

**LESS SWEATING THANKS  
TO MAXIMUM VENTILATION**

The tensioned Aircomfort special mesh creates an effective ventilation space between the backpack and the wearer's back to allow moist air to disperse freely. The patented Deuter 3-side ventilation reduces the loss of fluids by up to 25 %\*.

\*tested and verified by the reputable Hohenstein Institute

FUTURA

Aircomfort Sensic System

ACTIVEFIT SHOULDER STRAPS

Agile ActiveFit shoulder straps fit comfortably through their self-acting adjustment to width and angle of the shoulder area. Their ergonomic S-shape follows the shoulders' and neck's contours exactly – no chafing or rubbing. Light, perforated foam provides ventilation.

ERGONOMIC HIP FINES

Compact, ergonomic hip fins make little more weight possible with Pull-Forward adjustment. They hug the hips without a gap through contact points that are close together. Perforated foam provides ventilation. (Futura 24 SL, 26 SL, 26, 28 SL, 28, 30, 30 EL & 34 EL)

MAXIMUM VENTILATION

ergonomic comfort and lightness are combined in this mesh back system. The innovative construction of the hip fin area and its seamless transition into the mesh back hug the carrier and enables a comfortable fit. The durable frame construction designed from flexible and break-proof spring steel provides stable tension for the Aircomfort Sensic's mesh back. This Deuter patented 3-side ventilation decreases perspiration by 25%\*.

LUMBAR PADS

provide carrying comfort through three-dimensional modeling analogous to the shape of the hips. (Futura 22 SL & 24)

# Aircomfort Sensic Pro System

## AIRCOMFORT SENSIC PRO

The innovative, ergonomic back system with an elastic spring steel frame, innovative Aircomfort special mesh, self-adjusting shoulder straps as well as flexible hip fins provide optimal carrying comfort with maximum ventilation.

## AIRCOMFORT MESH NET

An elastic spring steel frame provides tension for the mesh net, providing a ventilation space between backpack and the back area, allowing damp air from the body to dissipate.

## ACTIVEFIT SHOULDER STRAPS

The flexible shoulder straps always sit comfortably and automatically adjust to the individual ergonomics of the wearer.

## VARIFLEX ECL HIP FINS

The flexibly moveable VariFlex ECL (Ergonomic Comfort Lock) hip fins with their ergonomic pads custom fit the hips to allow energy efficient and comfortable carrying of medium loads.

FUTURA VARIO

Aircomfort  
Sensic Vario System

ACTIVEFIT SHOULDER STRAPS

Agile ActiveFit shoulder straps fit comfortably through their self-acting adjustment to width and angle of the shoulder area.

VARISLIDE ADJUSTMENT

The VariSlide System guarantees a perfect fit for every back lengths. A central, easy to access buckle allows fast and incredibly easy adjustment of the system.

SAVE ENERGY

while carrying through auto-adjust VariFlex ECL hip fins. They custom fit to the hips and distribute weight comfortably thanks to ergonomic pads and a gap-free transition from the back system.

TREKKING BACKPACK WITH  
MAXIMUM VENTILATION

thanks to the Aircomfort mesh back system. A durable frame construction designed from flexible and break-proof spring steel provides stable tension for the Aircomfort mesh net creating a ventilation space between wearer and pack.

ARCHED PROFILE FRAME

Up to 70 % of the load is transferred from the back to the hips via an arched profile frame made of permanently elastic, break-proof spring steel. Lightweight and flexible, its ergonomic shape ensures a perfect fit combined with freedom of movement.

# Lite System

**DELIRIN U-FRAME**  
Stable and pleasant load distribution with minimal weight provided by the flexible and tensioned Delrin® U-frame.

**LITE AIR BACK PANEL**  
The extremely light, minimalistic, and compact contact back system makes for a successful interplay of carrying comfort and stability. The pleasantly ventilated back panel always convinces, even in challenging terrain, through a safe fit.

**LIGHTWEIGHT**  
The Speed Lite series is the lightest hiking backpack series in the Deuter assortment. The Speed Lite 32, which is especially designed for multi-day tours, weighs in at barely 870 grammes.

**SOFT, SNUG FITTING HIP FINS**  
The backpack fits compact through light and airy hip fins. They are easy to adjust even with bigger loads thanks to the Pull-Forward straps.

Gröden 32

### Details Classic: Zugspitze 22 SL, 24, Gröden 30 SL, 32

flexible spring steel frame

hiking pole loops

detachable rain cover

wet laundry compartment

• Material:  
600 D PES Ripstop

continuously adjustable chest strap

lid pocket

internal valuables pocket

• double lid buckles, which allow extra gear to be securely stored under the lid

### Further details Classic: Zugspitze 22 SL, 24

waist belt and hip pads modelled to the shape of the pelvis

front pocket for extra volume

### Gröden 30 SL, 32

ergonomically shaped, compact hip fins ensure a good weight transfer

spacious side bellow pockets and roomy patch front pocket

## Aircomfort System

### ERGONOMICALLY S-SHAPED SHOULDER STRAPS

fit like gloves – comfortably padded and with Soft-Edges.

### ROBUST AND RELIABLY TENSIONED BACK MESH

even under load. It is guaranteed by a lightweight frame made of break-proof spring steel. Extremely resilient and permanently elastic, it always jumps back to its original shape after deformation.

### LESS SWEATING THANKS TO MAXIMUM VENTILATION

The tensioned Aircomfort special mesh creates an effective ventilation space between the backpack and the wearer's back to allow moist air to disperse freely. The patented Deuter 3-side ventilation reduces the loss of fluids by up to 25 %\*.

\*tested and verified by the reputable Hohenstein Institute

MY DEUTER IS MY

*Companion*

“I like doing what I call ‘long-distance mountaineering’, where I undertake lengthy, sometimes technically demanding, solo projects in areas that are less developed in terms of infrastructure. I usually bivy along the way. Spending nights outdoors is one of the biggest attractions for me. I find it’s the only way I can be fully present and aware of everything around me. Instead of trying to go faster, higher and further, I prefer to be healthy, sustainable and responsible. I’m with Deuter because my backpack is my constant companion throughout my projects and theirs have never let me down.”

**ANA ZIRNER** assists Deuter with backpack development and carries out extensive testing. Originally from the Bavarian Alps, this determined woman carried out a solo traverse of the Alps from East to West in 60 days. She crossed through five countries and covered 1,900 kilometres. She recounts her adventures in the mountains on her blog page.

# Aircontact System

## WEIGHT REDUCTION UP TO 15%

with consistently outstanding carrying traits. A well thought-out mix of materials and modified construction makes the pack noticeably lighter.

## CARRYING COMFORT DUE TO FLEXIBLE SHOULDER STRAPS

The ActiveFit shoulder straps automatically adjust to every shoulder shape and every move perfectly thanks to their flexible attachment.

## GENTLE AND ENERGY SAVING TRANSITION OF LOAD

due to flexible VariFlex ECL hip fins that follow every move. They always fit perfectly thanks to the combination of ergonomic cushions that enable a stable fit, their three-dimensional design, and the comfortable LumbalPad. This leads to weight being distributed comfortably to the strong sacrum and pelvic bone.

## EXCELLENT VENTILATION AND LIGHTENS HEAVY LOADS

The lightweight spring-steel frame transfers a large part of the weight to the hip fins, relieving the back and shoulders noticeably. The ergonomically shaped contact back always keeps the weight of the load economically and well controllable close to the body's centre of gravity. The open-pored functional foam creates an exchange of air with every move. The result: 15%\* less perspiration than with a conventional body-contact carrying systems

## OPTIMAL FIT FOR DIFFERENT BODY HEIGHTS

The carrying system can be adapted individually to any back length with the multistage adjustment system.

\*proven in a field test conducted by Gabriel L.&T. in co-operation with the University of Erlangen/Germany

Aircontact Pro System

**MAXIMUM COMFORT:**  
pivoting ActiveFit shoulder harness  
adapts individually to the wearer.

**EXCELLENT VENTILATION**  
due to open cell foam technology.  
With every movement air circu-  
lates through the cushions keeping  
the back ventilated. The result\*:  
15% less perspiration than with  
other body-contour packs.

**THE PERFECT FIT  
FOR ANY BACK LENGTH**  
provides the new stepless VariSlide  
adjustment system quickly and  
easily at the flick of a buckle.

**PIVOTING VARIFLEX HIPBELT  
REDUCES FATIGUE**  
and with its ergonomic 3D design,  
shaped by sewing craftsmanship,  
the load gets evenly distributed  
without any pressure points.

**CARRY EVEN THE HEAVIEST  
LOAD WITH EASE AND FREE-  
DOM OF MOVEMENT**  
This high-performance load trans-  
fer is made possible by the ergo-  
nomically shaped internal V-frame  
which is directly connected to  
the shoulder straps and hipbelt.  
Without friction losses transfers up  
to 70 % of the load into the hip-  
belt. At the same time, you retain  
full mobility due to the pivoting  
ActiveFit shoulder harness and  
VariFlex hipbelt. The Aircontact  
Pro carrying system is designed for  
loads of up to 30 kilos.

## GRAVITY MOTION

## Contact System

**THE ERGONOMICALLY SHAPED BACK CUSHIONS** of the Contact System hug the back and distribute the weight of the load evenly, relieving the load on the back.

**EASY TO FILL** thanks to its funnel shape and large opening along the entire length of the rear.

**GRAVITY MOTION SL (35 L)**  
# 3362019  
5324 maron-arctic | 3329 arctic-navy  
700 g | H 60 x W 35 x D 23 cm

**GRAVITY MOTION (35 L)**  
# 3362017  
3400 navy-granite | 2325 khaki-navy  
700 g | H 60 x W 35 x D 23 cm

For sport climbers who value the symbiosis of a well-organised duffel and backpack in the gym or at the crag.

comfortable soft padded back

continuously adjustable chest strap

internal valuables pocket

- easy to fill thanks to its funnel shape and large opening along the entire length of the rear
- shoes, first-aid kit, keys, etc. stow away in two large zipped side pockets with compartments for valuables
- practical grips on the back.

- two material loops for quickdraws, etc.
- down jacket, camping mat, etc. can be attached to the integrated attachment strap with metal hooks on the front
- Material: 420D PA

GRAVITY MOTION

GRAVITY SERIES

Lite System

CARRYING COMFORT  
AND A PERFECT FIT

through ergonomically cut, S-shaped shoulder straps. The Gravity Pitch features curved, narrow, lightweight shoulder straps with a wide base that adapt to your every movement.

THE BACKPACK IS HELD  
CLOSE TO THE BODY

by a detachable chest strap (Gravity Rock&Roll) or airy-light mesh hip fins (Gravity Expedition).

REDUCED TO THE ESSENTIAL

— you can still carry light to medium loads comfortably with the back system of our lightweight backpacks. The flexible, tensioned Delrin® U-frame provides stability and comfortable load distribution at minimum weight.

RELIABLE CLOSE BODY FIT

for demanding terrain thanks to a padded back with ventilated 3D AirMesh covering.

GRAVITY PITCH

**GRAVITY PITCH 12 SL**  
# 3362119

GRAVITY HAUL

Alpine System

**GOOD LOAD TRANSFER COMBINED WITH MINIMUM WEIGHT**  
thanks to an flexible Delrin® U-frame. It follows the most varied movements with absolute ease.

**FIRM AND STURDY FIT IN EVERY SITUATION**  
by soft, body-hugging hip wings with close-set anchor points.

**TO ENSURE A STABLE BALANCE AND TO CONSERVE**  
energy when carrying medium to heavy loads in alpine terrain the Alpine Back System keeps the load close to the body's centre of gravity. The Softstripe pads on these slim-line alpine backpacks adapt to the wearers back with every movement for a close and reliable fit. The channel between the pads provides extra comfort by creating a "chimney" effect ventilation.

For extreme climbers looking for a haul bag and backpack in one to carry heavy big wall gear comfortably.

- |  |   |
|--|---|
|  flexible spring steel frame  |  steplessly adjustable chest strap with signal whistle |
|  Pull-Forward adjustment enables the wearer to tighten and adjust the compact hip fins easily even with heavy loads |  rear access zipper                                    |
|  load adjustment straps   |  SOS label   |
|  |  valuables pocket                                      |

- when opened, the back system's zipped cover serves as a rain protector, like a backpack lid with two straps and a metal hook
- solid base with straps for reinforcing and attaching material
- opening easy to use thanks to a fixed cord stop and grip loops
- two crossover straps enable easy tightening on the rope
- two function strips
- extremely hard-wearing TPU material that is highly tear-resistant due to textile reinforcement and waterproof due to a water-impermeable surface
- three material loops on the inside
- easy to pack thanks to a funnel shape and reinforced opening
- Material: 600D PES TPU

## GUIDE

MY DEUTER IS MY

*Protection*

“Being in the mountains means experiencing special moments and sharing them with like-minded people. You keep going higher, the view gets more beautiful with every step you take, you feel nature and yourself. Having a good time with friends means a lot to me. It doesn’t matter if I’m climbing, mountaineering, mountain biking or ski mountaineering: to me it means experiencing freedom and independence. I always feel good with Deuter’s backpacks and sleeping bags. Being part of the SL-Family I know that they keep improving their packs in cooperation with athletes and their requirements in mind.”

**KATHRIN WEBER** is part of the Deuter SL-Family and contributes to the further development of the ladies backpacks. Aside from her sports and biology studies she is also majoring in health and performance sports. She is a specialised trainer for mountaineering and skiing. The feeling of freedom in the mountains is what draws the allround-mountaineer to them year-round.

# The Deuter sleep well details

SLEEPING BAG

**EQUAL FILLING ON TOP AND BOTTOM FOR 360-DEGREE-WARMTH**

As with every Deuter sleeping bag the construction of top and bottom is identical and the filling is equally thick. Because we know: people move in their sleep, even if the EN-norm is tested lying on the back in the lab. We guarantee the stated range of comfort temperature in any sleeping position.

**COMPLETE DEUTER SLEEPING BAG RANGE PFC-FREE**

For its 2019 collection, Deuter has already cut PFCs from 75 % of its water-repellent fabrics. And from 2020, all Deuter products will be entirely free from PFCs.

**DESIGNED FOR WOMEN**

The shorter cut SL Women's Fit models feature a soft, cosy fleece lining in the hip zone and the foot box and are perfect for women up to 175 cm.

**ANTI-CATCH STRIP**

The zip is guaranteed not to jam as it glides from top to bottom thanks to a wide anti-catch strip.

SLEEPING BAG

NEW

# Exosphere

For trekkers, bikers or paddlers that value the comfort of an expandable sleeping bag as well as an optimal warmth-to-weight ratio.

## WARM HEAD,

## WARM BODY

The three-dimensionally shaped, well insulated functional contour hood and the warmth collar prevent loss of warmth.

## MORE COMFORT AND MORE WARMTH: THE EXPANDABLE SLEEPING BAG

The entire sleeping bag can expand 25 % in width due to the elastic Thermo Stretch Comfort construction seams in inner and outer shell.

This brings clear advantages: the expandable mummy sleeping bag has a body-hugging fit. In addition it warms up quickly since less air between body and sleeping bag needs to be warmed which stays warm easier. At the same time the major freedom of movement enables restful and comfortable sleep.

## EQUAL FILLING

## ON TOP AND BOTTOM

## FOR 360-DEGREES OF WARMTH

As with every Deuter sleeping bag the construction of top and bottom is identical and the filling is equally thick. Because we know: people move in their sleep, even if the EN-norm is tested lying on the back in the lab. We guarantee the stated range of comfort temperature in any sleeping position.

## SPACE FOR A

## RELAXED FOOT POSTURE

with the ErgoFoot design with new, ergonomically sophisticated shape. The raised foot section adapts to the natural posture of the feet. The filling - with an extra layer in the foot area - isn't pressed together. The insulation characteristics remain and reliably ensure warm feet.

## Details Exosphere: 0°, -6°, -10°

Top and bottom are perfectly insulated with shingle construction that overlaps 1.3 times in the Exosph. 0°, 2.5 times in Exosph. -6° and 3 times in the Exosph. -10°

Dryzone: water repellent shell fabric protects head and foot areas from moisture

comfortable sleep and quick warming thanks to snug inner and outer sleeves capable of expanding by up to 25 %

separate drawcords on the ergonomically shaped hood for precise adjustment

## ASTRO PRO

## Astro Pro

For mountaineers and ambitious trekkers who depend on maximum heat insulation and minimal weight on extreme tours.

bluesign®  
product

SL

Astro Pro 600 SL

### Astro Pro: 400, 600, 800, 1000

Trapezoidal chamber design prevents the formation of cold spots

quick heating and comfortable sleep thanks to a snug inner shell that can expand by up to 25% in width

always well-insulated thanks to the innovative PowerBox design: a unique combination of longitudinal chambers

the head is always warmly wrapped up inside the functional ThermoHood with five (Astro Pro 400 & 600) or seven (Astro Pro 800 & 1000) chambers for keeping the down in position; features different draw cords for easy handling

ErgoFoot keeps feet cosy and warm as the down is held firmly inside the chambers

warmth collar

water-repelling Dryzone fabric in the head and foot area protects against damp

inside pocket

• top heat-to-weight ratio and packing dimensions

• heat collar with hook and loop closure and elastic cord

• anti-jamming zip strip top and bottom

• the SL ladies' models have more filling to create extra heat reserves

- "bluesign® product" with high-quality, RDS-certified down
- compression packsack and delivered in an additional storage packsack
- perfect for alpinists – both inside a tent under a starlit sky
- Filling: 650+ cuin / 90/10 RDS  
Inner shell: 30D PA  
Outer shell: 30D PA Ripstop

MY DEUTER IS MY

*Discovery*

“I’m a passionate mountaineer spending both summer and winter in the mountains. Since I’m a mother of a small daughter I can pass on my passion in a whole different kind of way. I also see the mountains from a new kind of view. Challenging tours in the mountains are as fulfilling to me as spending time outdoors with my child, playing next to a creek or in a beautiful meadow and finding critters. I really value the quality and functionality of the Deuter backpacks. This is important to me as a mountain guide as well as a mother.”

HEIDI HARDER is a certified mountain and skiing guide, trainer and coach. She supports Deuter in the development of the women’s line of backpacks and the child carriers. The athletic woman from the Allgäu in Germany is at home in the mountains and enjoys passing on her passion for mountaineering to the next generation.

NEW

# Kid Comfort Active

**Kid Comfort Aktive:** For parents looking for a safe and light child carrier.

**Kid Comfort Active SL:** For mothers that hold their own and want a child carrier that fits them extremely well. Slimmer SL-shoulder straps and conically shaped SL-hip fins are especially adapted to fit the female anatomy.

## SAFE AND EASY TO HANDLE SEATING AREA

Children love to use the side access to the seating area to get into the seat by themselves. Lifting a child into the seat has also become easier and safer. The new safety harness system is easy to understand and use with its colour-coordinated buckles that are arranged on the sides. Adjusting the height is hassle-free even with the child already in the seat.

Kid Comfort Active SL

## Details: Kid Comfort Active, Kid Comfort Active SL

light weight with less than 2,5 kg empty weight

fast VariQuick back-length adjustment with large scope so both parents can comfortably carry the child

hip belt is easy to adjust even with heavy loads via the PullForward system construction

load adjustment straps

continuously adjustable chest strap

large, elastic and ventilated mesh pocket under child's seat with fast draw-cord closure and hook; large, elastic front pocket

- pleasant ventilation through perforated shoulder straps
- zipped pocket on one hip fin
- key holder

- height-adjustable child seat with varying cushion width according to age for a healthy sitting position
- height-adjustable foot rests with adjustment to fit the child's feet
- detachable, washable chin pad with removable cover
- children sweat less thanks to side mesh inserts to ventilate inside of seating area
- setting the child carrier down is easy with its base that has a noticeable lock function

- different cover materials in child's seating area: airy and soft in the comfort zone and robust and washable in the foot areas
- the sturdy aluminium frame with broad platform is tip-over resistant – very helpful when getting into the seat
- two grab handles
- larger pillow and sun roof available as accessories
- folds for transport
- Material: 210D PA

NEW

# SL Women's Fit

deuter  
LITE

## SL-FIT

Especially adapted to the anatomy of women: for mothers who hold their own. The slimmer shoulder straps that also lie closer together have a distinct S-shape, soft edges, and run slimmer towards the end. Conically shaped hip fins fit consistently snug to the female hips.

## UNISEX FIT

All other child carriers that are exchanged between parents are equipped with the unisex fit which feature a little slimmer shoulder straps and hip fins than our respective regular carrying systems of our backpacks.

## LIGHTWEIGHT

With less than 2,5 kg net weight this child carrier can easily be taken on tour.

## COMPACT FIT AND PERFECT LOAD TRANSFER

The extremely light, minimalist Lite Air System contact back is connected directly to the frame and guarantees perfect load transfer and control combined with low weight. The Lite Air back panel sits well and due to its structure is pleasantly ventilated. The back length of the child carrier can be adjusted with the VariQuick System to the respective parent quickly in only a few steps.

NEW

# Kid Comfort Pro

For parents looking for a safe child carrier with top comfort for their kids and themselves to explore nature together.

## PROTECTION FROM THE SUN OFFERS THE INTEGRATED SUN ROOF.

It can be fold out quickly and easily attached with buckles. A rain cover (available as an accessory) can be put on top of it.

Kid Comfort Pro

**IMPORTANT GEAR IS PERFECTLY KEPT IN THE INTEGRATED, SMALL BACK-PACK SO IT CAN BE TAKEN TO THE CHANGING ROOM,** the restaurant, or the buggy in a flash. The daypack has a net pocket inside and can be attached to the chest strap of the child carrier. If not in use it can disappear in the carrier's bottom compartment or you can use the compartment as an additional storage space.

## Further Details: Kid Comfort Pro

- permanently integrated, fast to assemble sun roof
- mirror for view of the child on the back in hip pocket
- integrated, separately useable daypack in bottom compartment with inside pocket and the possibility to attach daypack on sternum strap

NEW

# Aircomfort Sensic Vario System

## PERFECT LOAD TRANSFER WITH MAXIMUM VENTILATION

The Aircomfort Sensic Vario system utilises the empty space between the child's seat and the back of the parent in an innovative way:

The Aircomfort mesh net creates a ventilation space in which damp air can escape. The centre of gravity of the child remains in the same position as in a child carrier with contact back. The carrying system is directly connected with the frame of the child carrier. The advantages are tremendous. The ergonomic child carrier fits perfectly and the load is transferred optimally since it is close to the body. The special net ensures the parent's back is maximally ventilated.

## PERFECT FIT FOR EVERY BACK LENGTH IN A FLASH

In just a few moves the length of the back is easily, exactly and steplessly adjusted with the VariSlide system so both parents can comfortably carry the child.

## RELAXING SLEEP

with the soft, ergonomically cushioned pillow and side support cushions. This ensures the head is also gently supported in the corners of the cockpit. The pillow itself is easily removed and washable just like its cover.

## SAFE AND EASY TO HANDLE SEATING AREA

Children love to use the side access to the cockpit to get into the seat by themselves. Lifting a child into the seat has also become easier and safer. The new safety harness system is easy to understand and access with its colour-coordinated buckles that are arranged on the sides. Adjusting the height is hassle-free even with the child already in the seat.

## UNISEX FIT

Ideal when the child carrier is exchanged between parents: The carrying system is equipped with slimmer shoulder straps and hip fins than our respective regular carrying systems of our backpacks and a little broader and larger than on our SL-models.

7000 black  
330 g | H 118 x W 72 cm

Trekking | Travel

- light transport sleeve for protecting backpacks in-flight
- roll-top closure
- pack sack
- two sizes: 60 and 90 l volume
- Material: Nylon

## SECURITY

**SECURITY WALLET I**  
# 3942016  
7000 black | 6010 sand  
15 g | H 18 x W 12 cm

### Travel | City

- lightweight soft material
- soft strap with stepless adjustment
- two zipped pockets for passport and money
- easy to clean
- Material: 50D PA Ripstop

**SECURITY WALLET II**  
# 3942116  
7000 black | 6010 sand  
25 g | H 18 x W 14 cm

### Travel | City

- lightweight soft material
- soft strap with stepless adjustment
- two sub-compartments in main compartment and zipped front pocket for passport, money and travel documents
- easy to clean
- Material: 50D PA Ripstop

**SECURITY MONEY BELT I**  
# 3910216  
7000 black | 6010 sand  
40 g | H 12 x W 24 cm

### Travel | City

- supple thanks to a shallow form
- two zipped pockets for travel documents and passport
- stepless belt adjustment
- easy to clean
- Material: 50D PA Ripstop

**SECURITY MONEY BELT II**  
# 3910316  
7000 black | 6010 sand  
45 g | H 14 x W 34 cm

### Travel | City

- supple thanks to a shallow form
- two zipped pockets for travel documents and passport
- stepless belt adjustment
- easy to clean
- Material: 50D PA Ripstop

## SECURITY

**SECURITY HOLSTER**  
# 3942216  
7000 black | 6010 sand  
80 g | H 19 x W 24 cm

### Travel | City

- two carrying options: close to the body under the clothing with the detachable, adjustable waist belt or as a small shoulder bag
- easily washable
- adjustable shoulder strap
- two zipped pockets
- internal PES Mesh pocket
- Material: 50D PA Ripstop

**SECURITY FLIP IN**  
# 3942416  
7000 black | 6010 sand  
20 g | H 11 x W 16 cm

### Travel | City

- secret pocket attaches to your belt and folds over the top of your waistband
- black or brown attachments straps matching the belt
- two slot compartments
- soft lining
- Material: 50D PA Ripstop

**SECURITY BELT**  
# 3910116  
7000 black | 6010 sand  
80 g | H 3 x Length 135 cm

### Travel | City

- hidden internal pocket with ca. 46 cm zip
- stepless length adjustment
- robust lock
- Material: PP Webbing

STREAMER

**STREAMER 1.5 (PULSE 3)**  
# 3920019  
0000 transparent  
170 g | H 22 x W 44 cm  
Pulse 3: see page 147

**STREAMER 2.0**  
# 32931  
0000 transparent  
175 g | H 35 x W 19 cm

**STREAMER 3.0**  
# 32941  
0000 transparent  
185 g | H 42 x W 21 cm

Biking | Hiking | Mountaineering | Trekking

- keep fit for longer: enables regular hydration without interrupting sports activities
  - large streamer opening for easy filling and cleaning
  - very hygienic thanks to smooth surfaces
  - leak-proof mouthpiece with push-fit cap: Twist-activated water-stop lock
  - Material: Co-Extruded PE
- TASTE-FREE™**
- The special film inside the bladder is as smooth as glass. Due to the special molecular properties, this system is very hygienic, taste-free and easy to clean.

GRUNGE-GUARD™

- Antimicrobial technology blocks bacteria growth in the bladder.

**STREAMER TUBE & HELIX VALVE**  
# 32881  
0000 transparent

**STREAMER HELIX VALVE**  
# 32829  
0000 transparent

Biking | Hiking | Mountaineering | Trekking

- with light pressure the drip-proof mouthpiece is activated and flows at a comfortable rate. The integrated spring valve causes the mouthpiece to shut automatically.
- easy to take apart for cleaning

**STREAMER SLIDER**  
# 32861  
9000 orange

Biking | Hiking | Mountaineering | Trekking

EASY CLEAN

- full width top opening for easy filling and cleaning. Absolutely leakproof thanks to the easy to use sliding clip.

STREAMER

**STREAMER THERMO BAG 3.0 (3 L)**  
# 32908  
4000 granite  
120 g | H 44 x W 24 x D 2 cm

Biking | Hiking | Mountaineering | Trekking

- insulating thermo-material keeps the drink warm in winter and pleasantly cool in summer
- can be carried inside the back-pack or outside (on side loops)
- Material: 210D PA Ripstop

**STREAMER TUBE INSULATOR**  
# 32895  
7000 black  
70 g | length 70 cm

Biking | Hiking | Mountaineering | Trekking

- prevents the liquid from freezing quickly in the tube in cold conditions
- quick and easy to assembly thanks to a separable zip
- hook and loop strap for attachment to a shoulder strap
- Material: Neopren

**STREAMER TUBE BRUSH**  
# 32885  
0000 transparent  
50 g | length 100 cm

Biking | Hiking | Mountaineering | Trekking

- long flexible brush for removing residue from inside the streamer tube
- Material: Nylon / Stainless Steel

CLIMBING

**GRAVITY CHALK BAG I M**  
# 3391019

- brush loop
- Material: 420D PA

**GRAVITY CHALK BAG II M**  
# 3391219  
5324 maron-arctic | 3329 arctic-navy  
100 g | H 19 x W 13 x D 11 cm

Climbing

Lightweight

- non-woven lining
- additional waist belt strap for fastening with a robust metal hook

- soft fabric with stiffened edge and opening for comfortable handling
- low-mounted fastener with two loops prevents the bag from excessive swinging
- Material: 100D PA High Tenacity

**GRAVITY CHALK BAG II L**  
# 3391319  
2325 khaki-navy | 3400 navy-granite  
105 g | H 21 x W 13 x D 11 cm

Climbing

lightweight

- non-woven lining
- additional waist belt strap for fastening with a robust metal hook

- soft fabric with stiffened edge and opening for comfortable handling
- low-mounted fastener with two loops prevents the bag from excessive swinging
- Material: 100D PA High Tenacity

CLIMBING

**GRAVITY BOULDER**  
# 3391417  
3400 navy-granite  
140 g | H 28 x W 30 x D 20 cm

Bouldering

- extra-wide opening
- dust-free transport and always dry chalk thanks to the tight roll top
- hook and loop closure with two grips for fast access
- zipped bag on the reverse side
- three brush holders
- Material: 100D PA High Tenacity / 420D PA

**GRAVITY ROPE SHEET**  
# 3391517  
3400 navy-granite  
320 g | H 140 x W 140 cm

Climbing

- four integrated grips
- carry function grips pushed into each other
- colour code prevents tangled ropes: two colour-coded corners
- partner check print
- Material: Nylon

**GRAVITY ROPE BAG**  
# 3391617  
3400 navy-granite  
610 g | H 22 x W 48 x D 30 cm

Climbing

- long belt straps enable diagonal carrying
- perfect base for the included Deuter rope sheet
- different belt straps for easier orientation
- compression straps with metal hooks
- SOS label
- zipped bag with key clip
- Material: 420D PA / 420D PA

**HELMET HOLDER**  
# 3945117  
7000 black  
70 g

Ski | Klettern | Bike

- fits every holder on all current Deuter winter and alpine backpacks except for the Race bike model
- suitable for, climbing, skiing and cycling helmets
- Material: PES Mesh

## FIRST AID

**FIRST AID KIT ACTIVE**  
# 3943016  
9002 papaya

MY DEUTER IS MY

*Flow*

“I love exploring new areas aside from my home turf. I feel especially at home in mountain regions and take on quite some effort to meet and experience new cultures, people, and of course unique trails. I enjoy sharing my experiences on the mountain with like-minded people and I make a conscious effort to take in nature. Of course I look forward to the reward after the challenge: the ride down a beautiful trail. To me Deuter is a brand with a strong sense of connection to home. The folks at Deuter represent and convey the feeling of the outdoors combined with quality you can trust. I’m proud to be part of the Deuter Bike Family.”

ANDY RIEGER is part of the Deuter Bike Family and helps in developing the biking backpacks. He’s been on a bike since he can remember. He’s a certified bike guide and biking technique trainer, founder of the mountain bike riding technique training school HappyTrails.de and instructor in the nationwide educational team of the DIMB. What Andy’s best at? Playing bike!

NEW

# Trans Alpine Pro Series

For professional trans-alp bikers that value the perfect fit during all riding situations as well as a functional distribution of pockets.

## LARGE ORGANISATION COMPARTMENT THAT FULLY OPENS

to keep wallet, tool, pump etc. well organised. To make sure nothing gets lost or snags the material of one of the net pockets is tightly woven.

## ADDITIONAL STORAGE SPACE FOR HELMET, CLOTHING ETC.

Additional gear is stowed in the elastic slot pocket. The main compartment remains easily accessible thanks to two variable attachment positions.

Trans Alpine Pro 28

## Details Trans Alpine Pro: 26 SL, 28

excellent ventilation and compact, safe fit due to the Airstripes Pro System

ActiveFit shoulder straps that adapt to any body size guarantee perfect carrying comfort

load distribution and stability through the light spring-steel frame

load adjustment straps

adjustable chest strap

loop to attach sunglasses on shoulder strap

SOS label with emergency numbers and alpine emergency signals

separate bottom compartment keeps load in place for an ideal center of gravity, intermediate zippable bottom partition

a separate, in the back lying pocket allows fast and easy access to fill hydration system (suitable for 3.0 l Streamer) even with full backpack

side zipped pocket on back for smartphone, map etc.

inside compartment to stow wet clothing or hydration bladder

two elastic side pockets

detachable rain cover with its own pocket

- robust carrying handle on top
- wallet, tool, pump etc. are well arranged in large zipped front compartment, including organisation with several zipped pockets and key clip
- all-round 3M reflectors
- zipped pockets on hip fins
- zipped pocket and two slot pockets in main compartment
- compression straps
- Material: 600D PES

NEW

# Airstripes Pro System

deuter  
AIRSTripES

## REINFORCEMENT WHEN BIKE NEEDS TO BE CARRIED

The upper shoulder straps and the back are reinforced with abrasion-proof and anti-slip material to allow the bike to be carried safely. The load adjustment straps are loosened to carry the bike.

## SNUG HIP FINS FOR PRECISE FIT

The ergonomically innovative hip fins, thanks to the narrow take-off points, snugly fit the pelvis. They are also same thickness as the back cushions and so fit extremely well. They make a stable and firm fit possible and transmit the weight evenly to the hips. The hip belt construction with automatic side compression and PullForward system adjusts the backpack with a single move.

## OPTIMAL VENTILATION AND A COMPACT, SECURE FIT

are guaranteed with the Airstripes Pro System. The backpack fits compactly and securely with its body hugging fit even on challenging descents. Ventilation channels in and between the cushions combined with the breathable cover material allow free circulation of air along entire back.

## FLEXIBLE SHOULDER STRAPS GUARANTEE PERFECT CARRYING COMFORT

The ActiveFit shoulder straps automatically adapt to every shoulder shape and every move.

# Airstripes System

**THREE FABRIC ZONES FOR OPTIMUM COMFORT:**  
soft on the shoulder straps, airy on the back padding and smooth in the hip zone.

**STURDY, FIRM FIT IN EVERY RIDING SITUATION:**  
The anatomically shaped wings with the Pull-Forward system comfortably hold the pack close to the body. The Pull-Forward adjustment results in an automatic side compression and guarantees a compact, precise fit.

**EXCELLENT VENTILATION**  
and a compact and secure fit for the best possible cycling safety guarantees the Airstripes system. The backpack sits closely and firmly on the back and cannot swing outwards. The channels in the Airstripes padding and the special chimney effect between the stripes allow free air circulation on 80 % of the wearer's back.

# Airstripes System

**THE SPINE HAS AMPLE ROOM  
IN A SPORTY RIDING POSITION**  
in the channel between the stripes  
and ventilation is supported.

**STURDY, FIRM FIT IN EVERY  
RIDING SITUATION**  
thanks to the centralised hip fins  
attached flush to the padding. The  
Pull-Forward adjustment results in  
an automatic side compression and  
guarantees a compact, precise fit.

**EXCELLENT VENTILATION**  
and a secure fit for high cycling  
safety guarantees the Airstripes  
system. The backpack sits closely  
and firmly on the back and cannot  
swing outwards. The narrow con-  
tact area between the ventilated  
straps and back and the chimney  
effect between the straps ensures  
air can circulate freely around  
80 % of the wearer's back.

## ROAD ONE

# Road One

For performance-orientated cycle racers who need a minimalist, light pack for longer distances.

### THE NARROW DESIGN WITHOUT A CHEST STRAP

allows access to your jersey's side pockets.

Road One

### Details Road One:

Less sweating thanks to the pump effect of the open-pore Aircontact functional foam padding

clever attachment for glasses on shoulder straps

easily adjustable chest strap

lightweight

internal valuables pocket

hydration system compatible

detachable rain cover

wet pocket

loop for safety light

- main compartment with all-round zip
- zipped front pocket
- mesh pockets inside
- pocket to keep air pump
- reflective 3M prints
- Material: 150 D PA Ripstop / 210 D PA Ripstop

NEW COLOUR

NEW COLOUR

**ROAD ONE (5 L)**  
# 32274

COMPACT

## Compact Series

**COMPACT 6:** Aimed at mountain bikers who value low weight and lots of comfort on short but fast rides.

**COMPACT EXP 10 SL, EXP 12, EXP 16:** For enduro riders who want a comfortable backpack with good grip for rough terrain and perfectly designed functionality for day tours.

Compact EXP 10 SL

### Details Compact: 6, EXP 10 SL, EXP 12, EXP 16

easily adjustable chest strap

large zipped pocket with organiser and key clip for stowing mobile phone, wallet, tools, etc.

wet pocket

reflecting flashing light holder

internal compartment for valuables

detachable rain cover

### Further details Compact:

6

loops for helmet holder (Accessoire)

adaptable stays

firm, sturdy fit thanks to mesh hip fins with Auto-Compress design

hydration system compatible

hydration system compatible

elastic side pockets

separate compartment on the rear makes it easy to fill up the hydration system

the side compression straps are ideal for attaching protectors

expandable volume

integrated holder serves for usual MTB helmets – with compression straps also for full-face helmet

• Material:  
210 D PA

• zipped front pocket

- 3M reflectors on the hip belt
- reinforced back section prevents the hydration system from pressing against the back
- Material: 210D PA / 210 D PA Ripstop

COMPACT

## Airstripes System

deuter  
AIRSTripes

### ALWAYS A FREE VIEW

– the compact, bike specific shape of the pack makes sure the backpack never interferes with the helmet even in riding position.

### FREEDOM OF MOVEMENT GUARANTEE ERGONOMICALLY SHAPED SHOULDER STRAPS.

The easily adjustable chest strap further secures the fit.

### STURDY, STAY-IN-PLACE FIT IN EVERY RIDING SITUATION

thanks to airy, light and supple mesh hip fins.

### THIS LIGHT AS A FEATHER

AIRSTripes CONSTRUCTION allows continuous unburdened fun on day tours with athletic demands. The narrow contact area between the ventilated straps and back and the chimney effect between the straps ensures air can circulate freely around 80% of the wearer's back.

### COMPACT 6

# 3200018  
7000 black | 3383 denim-navy  
640 g | H 43 x W 31 x D 13 cm

### COMPACT EXP 10 SL

# 3200115  
7000 black | 5527 cardinal-maroon  
1030 g | H 42 x W 21 x D 19 cm

COMPACT

 7000 black | 3386 arctic-slateblue  
 1100 g | H 46 x W 23 x D 20 cm

# Attack Series

For ambitious enduro riders who want a certified back protector and a comfortable backpack with good grip for rough descents.

Attack 20

Details Attack:

Enduro 16, 18 SL, 20, Tour 28

load adjustment straps

internal compartment for valuables

separate compartment for hydration system 3.0 | Streamer

easily adjustable chest strap

zipped compartment for smartphone

integrated helmet holder as well as flaps for full-face helmet

stretch side pockets

detachable rain cover

front pocket with great organisation and zipped mesh pocket for tools, spare tube, and pump

SOS-Label and protector safety label

• side compression straps for protector attachment

• softly padded, spacious goggle pocket

• zipped pockets on the hip wings

• reflective prints all-round

• Attack 18 SL offers full TÜV/GS approved protection for a back length of 38-48 cm (top of hip to inner shoulder), the Attack 20, Enduro 16 and Tour 28 for a back length of 44-54 cm.

• Material: 210D PA / 600D PES

• Protection for sensitive back areas (spine / shoulder blades) combined with outstanding freedom of movement thanks to the V-shape

Further details Attack Tour 28:

• spacious internal zipped pocket

• main compartment can be folded out fully

# Contact System

FULL FREEDOM OF MOVEMENT

thanks to anatomically shaped shoulder straps with narrow anchor points that automatically adapt to shoulder width and angle.

LESS SWEATING

thanks channels between the back pads, especially wide in the middle, allow the air to circulate freely.

A SUPER TIGHT FIT EVEN ON ROUGH RIDES

guarantee the high on the back anchored hip wings: Sitting well above the hip the pack has no chance of riding up even in steep or rough sections.

SAS-TEC

body protection systems

THE DEUTER'S SHIELD

PSA BACK PROTECTOR

helps to minimise or even prevent injury occurring during risk sports: The backpack material is accurately adapted to the integrated SAS protector – a combination that results in the highest safety standard – the same standard that applies for motorsports! The TÜV/GS certified PSA back system made of the most up-to-date visco-elastic SC1 foam from SAS-Tec is removable.

- reflecting 3M prints
- hook and loop fasteners for attaching the bag to the saddle stays
- dirt-repellent, washable outer material on the underside
- Material: 150D PA Ripstop

## BACKPACK MATERIALS

Our manufacturing process well as the quality of the textiles we use ensures the long-time durability and longevity of our products. The materials we use are adapted to their future use as backpack textiles and produced especially for Deuter. Performance, Deuter's standards, and their safety for consumers are regularly tested in labs and are therefore assured.

The majority of the raw material we use in our textiles is polyester (PES) and polyamide (PA). They handle well due to their properties and they are robust and tearproof. The outer fabrics we use, especially our rain covers, are water resistant. This provides ideal traits of products that are intensively used outside like our backpacks and sleeping bags.

All our textiles are coated on the inside, making the respective material more durable, more water repellent, and the seams more stable. The consistency and strength of this polyurethane coating (PU) varies depending on its future use. The outside of our textiles is treated with a DWR (Durable Water Repellent) coat to obtain a high level of water and dirt repellent properties. We either use short-chain PFC coats (C6) and more and more PFC free finishings depending on the future use and aspects of sustainability.

We use textiles in differing strengths to make sure our products fulfil their respective function. We state these in denier (D). This measurement unit is established in the outdoor market and has lead to comparability within our own collection. It goes back to the old French unit of weight also called denier. This means that 1D = 1 gramme per 9000 meters of yarn. The lower the number in front of the "D" the thinner the respective textile. Our unit therefore describes fabrics that range from very sturdy and durable to extremely light textiles.

However, the durability and strength of a textile cannot only be taken from its denier number. The weave, structure, and application-oriented mix of raw materials also plays a role. The finishing of the yarn before the weaving process also has a decisive impact. We also state relevant equipment and features. Weaving in stronger threads or reinforced structures can make thinner material more durable and more stable. We call this feature "Ripstop" for example. If other processed or surface-finished yarns are used then the product is labelled with "high tenacity".

**YKK® zippers:** The most high-quality zippers available on the market are absolutely robust and reliable.

**Multi-chamber aluminium profile rails:** The weight-bearing elements of our backpacks are made from high-quality aluminium. This makes them durable and light at the same time. Its special constructions makes it possible to combine these two traits. A flat aluminium rail is separated into several different chambers by internal partitions. The cross sections shows a hive-like structure that provides stability. The multi-chamber aluminium profile rails are used in differing widths depending on the model of the backpack.

**Permanently elastic spring steel frames:** Spring steel is incredibly durable and elastic. It springs back into form again and again nearly unbreakable after being deformed. A round profile allows a very flexible construction of the frame. A flat profile provides a frame with extremely high form stability. Both give our Aircomfort models with its patented ventilation a permanently stable tension of the back net.

## SLEEPING BAG MATERIALS

Our upper materials and filling for sleeping bags are made of polyamide and also polyester for the most part. We predominantly process textiles with low deniers. These are also often structured. The fabrics are light and at the same time very durable and always moisture repellent. PFC free materials are increasingly being used. In addition we also make sure to use breathable materials to ensure pleasant sleeping conditions.

Fabric in the so-called Dryzones is especially processed and enables a high water column. The sleeping bag stays comfortably dry.

Our fillings are also light and comfortable. Good insulation properties and breathability are necessary requirements for the materials that we use in our products.

Some of our sleeping bags used brushed materials like the Brushed Thermo Fleece. The light and very high-quality polyester fleece feels soft and cozy to the skin due to its fluffy brushed surface. The material offers an excellent warmth-weight ration. Furthermore it is highly breathable, long-lasting, and easy to clean. Its

short drying time is another benefit. Its high level of elasticity supports freedom of movement of the Thermo-Stretch-Comfort-construction in our Exosphere SL models. It also keeps warm in the Orbit SL models.

## FILLING SLEEPING BAG

### Synthetic

**High-Loft Hollowfiber:** Synthetic hollow fibres are processed to a filling fleece (by thermal bonding). To ensure good compression and high loft, silicone is added. Remarkable insulation rating, tear resistant and durable.

**Thermo ProLoft®:** A special thermal process turns Polyester fibres into top quality technical Thermo ProLoft® insulating fleece. The combination of dense and hollow fibres results in the perfect blend between durability, weight and warmth properties – a fleece material that is easy care and durable yet compact and offers excellent insulation at minimal weight. The synthetic fibres also absorb very little moisture. Short drying times, excellent loft and thus insulation properties even when damp, are all advantageous characteristics. Deuter Thermo ProLoft® is also coated with a thin layer of silicone to give it good lofting properties.

**Combining:** Deuter sleeping bags Orbit, Exosphere and Space can be zipped together. Use left-hand zip and right-hand zip versions when combining.

### Down

Since June 2005 we only use down feathers certified in accordance with the Responsible Down Standard (RDS) – benefits: no live plucking, no force feeding, supply chain traceability, animal welfare guaranteed at every stage and verification by independent certification institutes around the world.

**Composition:** The deciding factor in a down sleeping bag is the down quality. Primarily this is a matter of the weight ratio of down to small feather mixture, which is expressed in percent. Deuter uses only the high performance filling ratio of 90% down to 10% small feather (90/10).

**Fill power / cuin:** High quality sleeping bags should have a fill power of at least 650 cuin (cubic inches). This measurement in cubic inches per ounce of down shows the quality of the bulking and expansion power of the filling. High quality down has a bulking volume of 650 cuin (10.6 litres) per 1 ounce (28.3g). A bulking power of 550 cuin, and higher is good; of 650 - excellent; and 800 is almost impossible. In the end: the higher the volume the better the insulation value.
