# WHAT'S NEW?

## CYCLING INTO THE FUTURE

The coronavirus pandemic has been a stark reminder that it's time to usher in a 'new normal'. The fast-spreading neo-ecology movement brings with it a new kind of consumerism. One in which resources are used intelligently and sustainably. In particular, transportation will undergo radical changes. The movement envisions a future in which the automobile is no longer a status symbol and the bicycle gains traction – in which entirely car-free systems move people, goods and services. With this shift in mind, and the resulting consumer needs, this next

season at deuter is all about urbanization and travel on two wheels.

That's why we are expanding our bike collection with new, innovative commuting products and introducing a promising new product range – bike panniers – for a target group with great potential.

### BAGFIX QUICK-RELEASE SYSTEM

A key component of our new panniers is the BagFix quick-release innovation, which we developed in-house. It's extremely easy to use, can accommodate heavy loads, is designed for everyday practicality and can be mounted on all industry-standard bike racks.

### WATERPROOF

To make them reliable companions all day, every day, these new bike products are, of course, fully waterproof. Durable materials taped and welded seams, and TPU-covered zippers ensure that the contents are protected from road spray and rain.

## DEUTER TRAINING GOES DIGITAL

### GET THE FACTS DIGITAL

deuter's retail training now includes eLearning – a smart way of increasing product knowledge for the whole team. And it's mobile too. So you can stay up to date with everything deuter-related, or quickly bring new employees up to speed. Because the more knowledge you have, the more we all benefit.

Scan the QR code  
or head to

**360° CORPORATE RESPONSIBILITY**  
eLearning also provides details about deuter's sustainability initiatives

### USER-FRIENDLY

Access training any time and on any device, with one-time registration only

### BITE-SIZED LEARNING

Information about our latest product developments and topics close to our heart, like sustainability.

### INTERACTIVE & VARIED

Each module concludes with a short quiz

## E-LEARNING NEWS

### OUTDOOR

Available now:  
Kid Comfort Pro, Futura and Futura Pro, AC Lite, Astro and Astro SQ & Astro Pro

From August 2021: Gravity Series, Rise, Freescape Pro & Freescape Lite

From March 2022: Ascender, Speed Lite, Aircontact Series, Orbit

### BIKE

Available now:  
Compact EXP, Attack, Flyt

From March 2022:  
Amager, Mainhattan, Rotsoord, Weybridge

### URBAN

From August 2021:  
Heritage Series

From March 2022:  
Cotogy and Scula

### SUSTAINABILITY

Available now:  
PFC free, FWF, RDS & bluesign®

# DEUTER PROMISE

## OUR PLEDGE

Business must operate in harmony with people and the natural world. This basic sustainability principle underpins our corporate philosophy. Preserving natural and man-made resources is at its core, as is adopting responsible practices to make sure we tread as lightly as possible. But it takes more than a few token gestures to make it a reality. The 'deuter promise' goes the distance – and then some. Under the slogan 'Together for 360° Responsibility', it is the holistic, all-encompassing approach we take to doing business sustainably. It may not be the easiest path. And it's certainly not the most direct one. But we're convinced that it will reap sustainability.

We have set firm goals in this regard, and are constantly driving them forward across all areas of our business. They incorporate all the key aspects: the environment and climate, animal welfare, social justice and social welfare – and of course, our customers.

### WE TAKE OUR RESPONSIBILITY SERIOUSLY

At the heart of our sustainability strategy lies our responsibility for people and planet. Responsibility toward our customers and our employees means offering our customers durable, high-quality products and ensuring fair working conditions for our employees, who work hard to create these products. That responsibility reaches beyond our company to the society in which we live. And beyond that, to nature itself. The planet we live on is our only source of food, water, oxygen and precious resources. It also offers uniquely beautiful places that provide us all – not just outdoor enthusiasts – with a fascinating range of ecosystems and environments that energize and sustain us.

Responsibility is at the heart of everything we do and woven into the fabric of who we are.

## TOGETHER WE ARE STRONGER

Each and every one of us has a part to play, a contribution to make. But together, we are greater than the sum of our parts. And that's why we work closely with our longstanding partners in manufacturing and design, recruit further partners with specialist skills and knowledge, and measure our efforts against the highest standards. Because sustainability isn't just a corporate vision, it's a philosophy that guides all our daily actions.

**WE MANUFACTURE ACCORDING TO BLUESIGN® STANDARDS, TO PROTECT PEOPLE AND PLANET**  
Even the most conscientiously made outdoor equipment creates an ecological footprint. At deuter, we want to keep that footprint as small and light as possible. That's why we have adopted the bluesign® system – the world's strictest standard for environmental protection, occupational safety and consumer protection in the textile industry – to guide us in our production. By using

the bluesign® system, which deuter adopted in 2008, we aim to make our products and the entire production cycle progressively more resource efficient and more environmentally friendly. And we're improving all the time. 100% of our manufacturing partners are bluesign® system partners and the number of bluesign® products in our collection is steadily rising: It currently includes the Heritage series, Astro series, UP series, Kikki, Urban Belts, Cotogy and Scula.

#### **FAIRNESS FROM A TO Z – WITH THE FAIR WEAR FOUNDATION**

We're celebrating a small anniversary – ten years' membership of the Fair Wear Foundation (FWF). It's a milestone in our efforts to achieve fair working conditions throughout the entire production and supply chain. The FWF is a multi-stakeholder initiative that works together with companies and factories

to improve working conditions in textile and garment factories, particularly on the ground in production countries. Recognition of our efforts, which include focusing on just two manufacturing partners, shows us we're on the right path. We've earned FWF Leader Status every year since 2013 and received the FWF Best Practice award in 2015.

#### **PARTNERSHIP FOR SUSTAINABLE TEXTILES – UNITED FOR GREATER SUSTAINABILITY**

We want to make outdoor equipment in an environmentally friendly, sustainable way, under fair conditions and within socially responsible manufacturing and supply chains. These chains are long and complex, and often hard for one company alone to clearly assess. That's why we have teamed up with other manufacturing partners and businesses

through our membership of the Bündnis für nachhaltige Textilien (Partnership for Sustainable Textiles). Our aim is to improve the social, environmental and economic conditions along the whole supply chain. The Partnership for Sustainable Textiles was set up in 2014 by the German government and brings together stakeholders from business, civil society, standards organizations and trade unions under one umbrella.

#### **GREEN BUTTON FOR GREEN PRODUCTS**

Policymakers have also recognized that textile manufacturing cannot become more sustainable without cross-border standards. deuter is collaborating with the international "Green Button" (Grüner Knopf) hallmark initiated by the German government. It is the world's first state-supervised certifi-

cation mark to establish compliance standards for sustainably produced textiles. This global seal of approval sets mandatory requirements to protect people and the environment. A total of 46 stringent social and environmental standards must be met, such as wastewater limits and the prohibition of forced labor.

#### **RESPONSIBLE DOWN STANDARD – FOR THE LOVE OF ANIMALS**

Even sustainable natural materials have to be produced in an environmentally sound way. That is why, since 2015, we've exclusively used high-quality feathers that are Responsible Down Standard (RDS)

certified for all of our down sleeping bags. In order to obtain RDS certification, animal welfare and farming practices have to be traceable throughout the entire production chain and meet the strictest requirements – from fledgling all the way through to finished sleeping bag.

#### **SUSTAINABLE DEVELOPMENT GOALS**

Can you imagine a world without poverty or famine? Fewer natural disasters and diminished impact from climate change? A world where humans and animals are less vulnerable? It's a worthwhile ambition, but one that's only possible if we all pull together. In 2015, member states of the United Nations ad-

opted the 2030 Agenda, which serves as a comprehensive roadmap to a peaceful, sustainable and prosperous world for us all. It's built around 17 Sustainable Development Goals (SDGs). We have joined this collective group and use the SDGs to guide us in shaping our 'deuter promise' agenda.

# OUR OWN INITIATIVES

We are especially proud of the sustainability initiatives that we have undertaken ourselves and which we have already been successfully implementing for some time. These are further grist for the mill in realizing our vision and our holistic, fully integrated road to sustainable business practices.

#### **WATERPROOFING THAT DOESN'T COST THE EARTH – PFC FREE SINCE 2020**

Traces of PFCs are everywhere – in drinking water, breast milk, and the air we breathe – and they can even affect reproduction. These harmful fluorocarbons also degrade slowly, if at all, over time. They're a ticking time bomb for humans, animals and the environment. We have eliminated PFCs from our DWR (Durable Water Repellency) since the start of 2020, while still maintaining the highest performance in repelling dirt and water from our products. This new coating, which is environmentally friendly and not harmful to human or animal health, brings us one step closer to our goal of conducting our business more responsibly and sustainably.

#### **MUTUAL TRUST IS GOOD. LONG-TERM COOPERATION IS EVEN BETTER.**

Fair and cooperative partnerships and an understanding of the shared responsibility of all parties involved are the foundations for stable global supply chains. By using just two long-standing, trusted manufacturing partners we are able, on the one hand, to guarantee the high quality and durability of our products. And on the other hand, we are able to ensure that all parties adopt fair working conditions, and that manufacturing processes are sustainable and resource efficient. Duke, Vietnam, has exclusively manufactured all of our backpacks, bags and accessories for us since 1994. Our sleeping bags have been made in China and Myanmar by our partner Bellmart since 2013.

#### **STITCHING UP OUR FUTURE – DEUTER'S REPAIR SERVICE**

However well you look after a product, at some stage, it will start to show signs of wear and tear. For us, there is no doubt that mending gear is better than throwing it away. And that's not just because we have some real miracle workers in our repairs department, but because providing a lifetime repair service also increases the lifespan of a product, which in turn saves resources. In 2020 alone, we carried out 3,307 repair jobs, which equates to 13 per working day. We're really proud of that.

deuter has developed different systems specifically adapted to the various sports and their specific demands.

HIKING / TREKKING

On small to medium backpacks that are at home in easier terrain we go for maximum ventilation. The heart of the Aircomfort systems – tested and proven for decades – is its flexible spring steel frame. It is extremely durable, provides stable tension for the airy back mesh and creates the ventilation space between pack and wearer's back for the moist, warm air to dissipate. 1984 deuter invented & patented the first mesh back system worldwide.

**THE RESULT:**  
Up to 25 % less perspiration thanks to the maximum ventilation achieved by the Aircomfort mesh construction. This reduces circulatory stress for more endurance – tested and proven by the renowned Research Institute Hohenstein.

TREKKING / HIKING

The easiest way to carry heavy loads is when backpack and wearer become one. This is what our Aircontact principle is all about: the body contact system brings the weight close to the body and therefore close to the center of gravity. This results in full pack control and an effective load transfer. Furthermore, our Aircontact cushions made from special hollow chamber foam guarantee fantastic ventilation due to the pump effect of every movement.

**THE RESULT:**  
Up to 15 % less perspiration as with a standard compact back system (proven in tests conducted by Gabriel L&T and the University of Erlangen) – combined with outstanding load transfer and a secure, perfectly balanced fit.

BIKE / DAYPACK

A bike pack always has to sit secure and snug on your back – even on the roughest rides. Our unique Airstripes System takes care of that and offers effective ventilation. It consists of two contoured, air-channelled foam profiles that are covered with a highly breathable Wide AirMesh lining. The reduced contact surface results in an optimized fresh air circulation. Also, the pack's load is kept close to the body and thus won't throw the rider off balance.

**THE RESULT:**  
The minimal contact surface area of the profiled Airstripes allows free air circulation over 80 % of the riders back, while still providing a secure, compact fit even on rough rides.

ALPINE

For alpine backpacks the combination of comfort, durability, functionality and low weight is essential. deuter's Alpine System answers this challenge by focusing on a compact, secure yet comfortable fit with its two flexible softstripe back pads that are perfectly adapted to the anatomy and follow the wearer's movements. In combination with the pack's sleek shape this keeps the load always close to the centre of gravity – thus guaranteeing full pack control.

**THE RESULT:**  
The Alpine back combines a secure, compact fit for full pack control and full focus on the terrain with a top carrying performance and a comfortable ventilation between the two softstripe back pads.

HIKING / ALPINE

Our lightweight backpacks come into their own during endurance sports and Alpine day treks. Reduced to the essential, they are ideal for comfortably carrying light to medium loads depending on the volume. However, lightness must never come at the expense of durability. That is and always was our corporate philosophy, because disposable products put a strain on the environment and a backpack that falls apart high up in the mountains can also be dangerous.

**THE RESULT:**  
Our lightweights are designed for everyone who wants to travel light without forgoing carrying comfort and durability.

TRAVEL

The ergonomically shaped back cushions of the Contact System hug the back and distribute the weight of the load evenly, relieving the load on the back. Additionally, loads are carried easiest when they are close to the body. Channels between the cushions as well the breathable, sturdy 3D Airmesh lining provide pleasant ventilation.

**THE RESULT:**  
Ergonomically shaped Contact back cushions provide carrying comfort that relieves the back while keeping the weight of the load close to the body and distributing it evenly.

# EL-SERIES

Extra Long Series

## SL-COLLECTION

### Female specific packs

#### deuter SL-Team

deuter's product development team for the women's specific SL line consists of female designers and top athletes from all disciplines / sports. It's almost an occupational habit that our experts can never stand still. Since 2006 they are always pushing forward - also when it comes to developing products.

Our rucksacks are designed to fit the average athletic build. However, since not everyone fits the norm it is likely that women's models will fit many male users perfectly well, and vice versa.

AC Lite EL

Futura 29 EL

Futura 34 EL

Futura Pro 42 EL

Trans Alpine 32 EL

Giga EL

#### SHORTER BACK

Women usually have a shorter back than men. Our SL carrying systems are adapted to the female anatomy and therefore shorter.

#### SLIM-CUT SHOULDER STRAPS

The SL shoulder straps have a distinct S-shape and all-round soft edges. In addition the straps become slimmer towards their ends. For a perfect fit around the shoulder area - no pinching or chaffing. The shoulder straps lie closer together and are adapted to slimmer female shoulders.

#### CONICAL HIP-FINS

The closed SL hip belt forms a cone to perfectly adapt to the female anatomy. The conical shape is the result of the the ends of the hipbelt coming together in an upward direction and the anatomically adapted design for the SL hip fins. The hip fins perfectly hug the female hips.

Standard Fit

#### THE DEUTER EXTRA LONG SERIES

Tall people can enjoy a perfect fit with our Extra Long EL-models! Taller sportsmen and -women between 1.85 - 2 m often have difficulty finding backpacks that fit their longer backs. Our favourite deuter backpack models are available to suit taller people with extended back lengths by 6-9 cm. Overall, backpacks in the Extra Long (EL) series have also grown in terms of volume. Back systems, features and details remain the same in the EL models as they are in the standard models, however.

# SPEED LITE SERIES

MARKETING STYLE

MARKETING STYLE

**RECYCLED FABRIC****ULTRA-LIGHT TO PRESERVE ENERGY**

Its lightweight construction, lightweight materials, the deuter Lite back system and pared down features combine to make the Speed Lite 30 a featherweight in the hiking category (28 L model just 840 g). That means you can put more energy into the trail and less into carrying the load.

For ambitious hikers who want to keep things fast & light in the mountains.

**Details Speed Lite:**  
13, 17, 21, 23 SL  
page 34

**Details Speed Lite:**  
25, 28 SL 30  
page 36

LITE SYSTEMdeuter  
LITE**ERGONOMIC BACK COMFORT**

Wide, ergonomically shaped shoulder straps with full ventilation, supple hip fins and a precision-adjustable, lightly elasticated sternum strap create a snug fit with zero load wobble and distribute the weight evenly between the hips and shoulders. This minimizes strain on the shoulders and therefore also on the back.

(Speed Lite 23 SL, 25, 28 SL, 30)

**SUSTAINABLE** and resource-saving.

Our main material yarn is made from 100% recycled industrial waste and certified to recognised standards.

large lid pocket

SOS label

- ergonomic, trapezoid-shaped lumbar pad for effective load transfer onto the pelvis
- two lightweight mesh, zippered hip fin pockets
- gear loops on the front and shoulder straps to secure a GPS device, map case etc.
- modular gear straps to attach a sleeping mat or tent, or to compress the load in the base of the pack
- bluesign® certified body fabric
- Material: 200D 2X2 PA RIPSTOP

AIRCONTACT SYSTEM

**LIGHT WEIGHT FOR MORE ENERGY**  
Reduced to the essentials, this lightweight pack expertly balances comfort and weight, so you can devote more energy to the trail. The lid can also be detached to reduce overall weight.

**EASY-ON-THE-BACK MESH COVERING**  
The new Air Spacer mesh performs three functions in one: Comfort, cushioning and ventilation. These attributes make this a weight-optimized backpack. With the addition of the Clip & Loop adjustable back length it also offers a tailored fit and superior carry comfort over longer distances.

ON-THE-MOVE HIP FIN POCKETS

Very large, detachable hip fin pockets (3 L) provide extra storage and better organization to keep items within reach. A zip-out 1.5-liter bottle holster built into the right-hand pocket also lets you hydrate on the move.

MODULAR GEAR STRAPS FOR FLEXIBILITY

Depending on what you're undertaking, the modular gear straps on this pack can be positioned to attach a range of items.

# AMAGER SERIES

MARKETING STYLE

### WATERPROOF TO KEEP CONTENTS DRY

Contents are protected from rain and road spray thanks to the waterproof performance of this backpack. And a zip-in organizer unit keeps a laptop, tablet, folders and paperwork securely in place. The roll-top closure lets you extend the capacity by 5 liters. This means there's easily space for a change of clothes when a quick trip to your favorite restaurant is on the cards.

### Details Amager: 25 + 5

For urban riders who want a bike backpack that suits their lifestyle of commuting, shopping and everyday life.

**AIRSTripES** deuter Airstripes back system with new Air Spacer mesh for superior ventilation

ergonomic shoulder straps

supple, breathable hip fins

precision-adjustable sternum strap

stowable hip fins

gear loops to attach a padlock or helmet

valuables pocket inside

waterproof zippered cell phone pocket at the side

zip-in organizer unit for a tablet, documents etc. with padded laptop sleeve (15")

waterproof

- closure strap can also be used to attach a newspaper or jacket
- roll-top extends capacity by 5 liters
- reflective details
- Material: 420D PA PLAIN TPU

## AIRSTripES SYSTEM

deuter  
AIRSTripES

### SNUG-FITTING FOR BETTER LOAD CONTROL

Sudden changes in direction, turning left, turning right, overtaking - the city streets can require your full focus, so keeping your balance is key. That's why it's important to keep the weight of the load close to your center of gravity. And why bike-specific details like the comfortable Airstripes back system,

ergonomic shoulder straps, adjustable sternum strap and wrap-around hip fins are so important.

### SUPERIOR VENTILATION FOR A DRY BACK

The reduced contact surface of the Airstripes back system, the new Air Spacer mesh covering, and the perforated shoulder straps and hip fins ensure maximum airflow on your daily commute. So you won't turn up at work with a sweat-soaked shirt.

**Trans Alpine Pro 26 SL**  
# 3201021  
6207 sand-teal  
1450 g | H 51 x W 27 x D 20 cm

**Trans Alpine Pro 28**  
# 3201121  
7403 black-graphite | 6314 clay-marine  
1550 g | H 54 x W 29 x D 21 cm

Details Trans Alpine Pro:  
26 SL, 28

For professional trans-alp bikers that value the perfect fit during all riding situations as well as a functional distribution of pockets.

- AIRSTRIPES: excellent ventilation and compact, safe fit due to the Airstripes Pro System
- ACTIVE FIT: ActiveFit shoulder straps that adapt to any-body size guarantee perfect carrying comfort
- load distribution and stability through the light spring-steel frame
- padded hip fins
- side zipped pocket on back for smartphone, map etc.
- a separate, in the back lying pocket allows fast access to fill hydration system (suitable for 3.0 l Streamer) even with full backpack
- separate bottom compartement keeps load in place for an ideal center of gravity, intermediate zippable bottom partition

- load adjustment straps
- adjustable chest strap
- loop to attach sunglasses on shoulder strap
- abrasion-proof and anti-slip material on shoulder straps and back are reinforced for carrying the bike
- SOS label with emergency numbers and alpine emergency signals
- two elastic side pockets
- stretch inner compartment

- detachable rain cover with its own pocket
- robust carrying handle on top
- wallet, tool, pump etc. are well arranged in large zipped front compartment, including organisation with several zipped pockets and key clip
- all-round 3M reflectors
- zipped pockets on hip fins
- zipped pocket and two slot pockets in main compartment
- compression straps
- Material: 600D PES / 100D PA RIPSTOP

- mesh hip fins with two zipped pockets
- reflective detailing
- Free Crash Replacement: free of charge post-crash back protector replacement
- If you have detailed questions about crash replacement, please contact your deuter contact person.
- Material: 210D PA, 100D PA high tenacity

**SECURELY STASHED**  
full-face or open-face helmets. Open-face helmets can be stashed on the front of the pack using special clips, and the side compression straps are designed to accommodate full-face helmets.

**MORE SPACE**  
Stowable new protector straps leave more space. Two straps that stow away in the rain cover pocket can be used to attach protection equipment to the lower pack, leaving more space inside the pack.

# *KID CARRIER*

Kid Carrier

## KID COMFORT ACCESSORIES

**KC Sun Roof**  
# 3690021 | 4014 graphite  
160 g

### Kid Comfort Accessory

The flexible and durable sun roof is securely attached to the deuter child carrier with buckles. The sun roof protects the child from UV-rays and provides pleasant shade. Easy to stow thanks to its flexible construction.

Fits the Kid Comfort Active, Kid Comfort Active SL, Kid Comfort.

**KC Raincover Deluxe**  
# 3690121 | 2004 kiwi  
165 g

### Kid Comfort Accessory

The complete rain and wind protection for the child carriers. Fits all child carriers with a sun roof.

**KC Chin Pad**  
# 3690221 | 4003 grey  
150 g

### Kid Comfort Accessory

Our child carriers can be upgraded with the large, ergonomic pillow. It protects the tired child's head and gives support even in the corners of the cockpit, enabling a relaxing nap. The soft pillow and the removable cover are washable and easy to remove. The press-stud attachment fits all current Kid Comfort models.

**KC Foot Loops**  
# 3690321 | 4014 graphite

### Kid Comfort Accessory

The height-adjustable foot loops for our child carriers are also available separately. They are now adjustable to accommodate different foot and shoe sizes.

Details Giga  
SL, REG, EL

For urban commuters who value functionality and carrying comfort - the SL models are ergonomically optimised for the female anatomy.

- Airstripes back system for outstanding ventilation
- detachable hip belt
- continuously adjustable chest strap
- front pocket with organiser and large opening thanks to an asymmetrical zipper

- second large and padded main compartment for 15,6" [Giga, Giga SL] or 17" [Giga EL] Laptop and tablet PC
- large main compartment suitable for folders with an integrated document pocket
- stretch side pockets

- internal valuable pocket
  - padded handhold
  - detachable key holder
  - padded base
  - Material: 300D PES RIPSTOP RECYCLED, 600D PES
- the SL-versions designed specifically for the female anatomy
- long EL-fit for people with a height between 170 cm and 195 cm
- the "mobile office" is easy to carry since the slim, high design of the Giga keeps the weight of the load close to the body

DESIGNED FOR WOMEN

The shorter cut SL Women's Fit models feature a soft, cosy fleece lining in the hip zone and the foot box and are perfect for women up to 175 cm.

Details Astro Pro  
400, 600, 800, 1000

For mountaineers and trekkers looking for maximum insulation at minimal weight for extreme conditions.

Thermo Stretch Comfort seams inside: faster to warm up and comfortable to sleep in thanks to the liner that stretches up to 25 % across the width

ErgoFootPro: more sensitive foot zone is given extra space in 3D ergonomic footbox for superior insulation

ThermoHood contoured hood for a cosy head with down held securely within chambers

inside pocket

PowerBox waffle structure in the lower part of the bag keeps the down in place no matter how much movement

Dryzone: water repellent fabric with PU coating at the foot and head

draft collar

Trapezoidal chamber design prevents the formation of cold spots

- top heat-to-weight ratio and packing dimensions
- contrasting draw cord toggles for easy hood adjustment (even in the dark)
- 360° insulation
- compression sack: light-weight, lateral compression, easy-to-use
- storage sack included - protects the down and keeps it well aired
- 2-way zip
- anti-snap zip baffle

- bluesign® product
- RDS certified down
- PFC-free water and dirt repellent finish
- perfect for alpinists - both inside a tent under a starlit sky
- Filling: 650+ cuin / 90/ 10 Down RDS/ bluesign®  
Inner shell:  
20D PA RIPSTOP  
Outer shell:  
20D PA RIPSTOP + DWR

Details Astro Pro SL

- SL models are shorter in length and the shoulder and foot sections slightly narrower
- SL models have proportionally more down fill compared to REG models

360° fill system for 360° warmth

The top and bottom layers of a deuter sleeping bag are identical and contain the same amount. That's because we are aware that despite EN-norm tests assuming that a person will lie on their back, in reality, people move about in their sleep. By using our 360° fill system, we can guarantee our comfort ratings in all sleeping positions – and no more cold back!

100% RDS certified down: the Astro series

- No live plucking
- No forced feeding
- Traceability in the supply chain
- Animal welfare assured at all times
- Certified and controlled by accredited institutes worldwide

DREAMLITE

SYNTHETIC

**Dreamlite REG**

Sleeping Bag

# ORBIT SQ SERIES

MARKETING STYLE

GOOD INSULATION FOR  
REGENERATIVE SLEEP

The high-loft hollowfiber fill and soft lining fabric made of cotton blend creates a pleasant sleep-inducing environment inside the bag. As a rectangular sleeping bag, it also offers more space to move about.

RECYCLED FABRIC

100% RECYCLED SHELL FABRIC FOR  
A GREENER CONSCIENCE

Anyone spending time in nature knows just how important it is to protect what we love. That's why the shell fabric of this sleeping bag is made from 100% recycled materials. It also has a pleasant feel.

Details Orbit SQ:  
+6°, -5°

Single-layer construction  
(Orbit SQ + 6°)

2-layer construction  
(Orbit SQ -5°)

zip-together function

internal pocket

- seam-free shell fabric produces better thermal efficiency and also increases water resistance
- 360° insulation for evenly distributed fill throughout the entire bag

- soft, cozy cotton blend lining
- contrasting drawcord toggles for easy hood adjustment in the dark
- wide opening for easy entry
- all-around zipper for quilt function
- pillow section can be zipped off and washed separately
- 2-way zipper
- anti-snap zipper guard
- easy-to-use stuff sack
- fill: HIGH-LOFT HOLLOWFIBER  
Lining fabric: T/C  
shell fabric: 50D REC PES RIPSTOP
- 100% recycled shell fabric

For nature-loving campers who want a good night's sleep with a clear green conscience.

EASY-CARE DURABILITY

Whether opened out as a quilt inside your camper van or zipped together as a double sleeping bag for a night under the stars, the hardwearing functional shell fabric makes this a versatile year-round sleeping bag for all your camping trips. It packs away easily inside the larger-style stuff sack too.

- anti-catch strip with extra reinforcement
- 2-way, centrally placed zip with easy handling for kids
- Filling: HIGH-LOFT HOLLOWFIBRE  
Lining: 75D PES  
Outer material: 70D PA

## INFINITI SERIES- MADE FROM REMNANTS

And with it, we've managed to cut down our carbon footprint even further. By taking remnants from our production we've developed versatile, sustainable products in what we call the Infiniti series. These bags and packs are made from lovely fabric remnants from the manufacture of existing deuter products.

For the Infiniti series, we use remnants fabric from our production line that is 100% functional. This surplus fabric, which would otherwise go to waste, is turned into a series of bags and packs, thereby reducing the ecological footprint of our production. There are variations between the individual products in terms of the way these fabrics are applied, the surface area that is used and their aesthetics. But all fabrics are tested for functionality to ensure the end product is of a consistently high standard. deuter is proud to support the 1 % for the Planet

nonprofit organization with sales of its Infiniti series. 1 % for the Planet supports businesses and individuals in giving back to the planet in the most impactful way possible by building strategic partnerships that connect funds with causes. By donating 10% of the buying price of the Infiniti series to 1% for the Planet, deuter is delighted to be supporting environmental projects throughout the world.

For more information about 1% for the Planet visit:

0000 transparent

**Details Streamer Tube & Helix Valve**

Biking | Hiking | Mountaineering | Trekking

With light pressure the drip-proof mouthpiece is activated and flows at a comfortable rate. The integrated spring valve causes the mouthpiece to shut automatically. Easy to take apart for cleaning.

**Streamer Slider**  
# 3960521  
9000 orange

**Details Slider**

Biking | Hiking | Mountaineering | Trekking

**Easy Clean**  
Full width top opening for easy filling and cleaning. Absolutely leakproof thanks to the easy to use sliding clip.

**Streamer Thermo Bag 3.0 (3 L)**  
# 3960621  
4000 granite  
120 g | H 44 x W 24 x D 2 cm

**Details Streamer Thermo Bag**

Biking | Hiking | Mountaineering | Trekking

- insulating thermo-material keeps the drink warm in winter and pleasantly cool in summer
- can be carried inside the backpack or outside (on side loops)
- Material: 210D PA RIPSTOP

**Streamer Tube Insulator**  
# 3960721  
7000 black  
70 g | length 70 cm

**Details Streamer Tube Insulator**

Biking | Hiking | Mountaineering | Trekking

- prevents the liquid from freezing quickly in the tube in cold conditions
- quick and easy to assembly thanks to a separable zip
- hook and loop strap for attachment to a shoulder strap
- Material: NEOPRENE

**Streamer Tube Brush**  
# 3960821  
0000 transparent  
50 g | length 100 cm

**Details Tube Brush**

Biking | Hiking | Mountaineering | Trekking

- long flexible brush for removing residue from inside the streamer tube
- Material: NYLON / STAINLESS STEEL

**Streamer Flask 500 ml**  
# 3961022  
0000 transparent  
50 g | H 19 Ø 8 cm

**Details Streamer Flask 500 ml**

Trailrunning

- ultra-light soft flask
- leakproof / lock cap Helix bite valve
- soft, foldable, odor- and taste-neutral material Shrinks as you drink to limit water bounce
- large screw cap opening for quick access and easy cleaning
- stows easily in side pockets or vest-style shoulder strap pockets (like the Ascender)
- dishwasher safe
- Materials: PVC and BPA free

Helmet Holder  
# 3922321  
7000 black  
25 g

Details Helmet Holder

- ultra-lightweight
- easy to use
- compatible with all current deuter alpine and winter pack series and the Race bike pack series

Ski | Climbing | Bike

- designed to accommodate climbing, skiing and cycling helmets
- Material: PES MESH

Modular Gear Straps  
# 3990021  
7000 black  
15 g | L 85 x W 2 cm

Details Modular Gear Straps

- two straps with metal hooks to attach gear to the outside of the pack
- skis can be attached diagonally or in an A-frame, tied together at the top

Ski | Mountaineering

- a snowboard or snowshoes can simply be strapped to the front of the pack
- also useful for compression
- Modelle: Freerider, Freerider Pro, Freerider Lite, Freescape Lite, Freescape Pro

Details Rain Cover Ultra

- outstanding protection from rain and water thanks to PU coating and taped seams
- extremely light material
- for Aircontact Ultra Series
- Material: 40D PA RIPSTOP

- comprehensive emergency package equipped pursuant to medical recommendations

**Travel | Trekking | Family- and Grouptours**

- includes numerous bandages, tick remover, clothing scissors, tweezers and instructions on administering first aid to injured persons
- grab handle
- free space for personal additions
- quick access to entire content thanks to all-round zip opening
- fold-out storage
- loop for hip belt attachment
- emergency instructions
- grab handle
- Material: 420D PA RIPSTOP

## BACKPACK MATERIAL

Our manufacturing process well as the quality of the textiles we use ensures the long-time durability and longevity of our products. The materials we use are adapted to their future use as backpack textiles and produced especially for deuter. Performance, deuter's standards, and their safety for consumers are regularly tested in labs and are therefore assured.

The majority of the raw material we use in our textiles is polyester (PES) and polyamide (PA). They handle well due to their properties and they are robust and tearproof. The outer fabrics we use, especially our rain covers, are water resistant. This provides ideal traits of products that are intensively used outside like our backpacks and sleeping bags.

All our textiles are coated on the inside, making the respective material more durable, more water repellent, and the seams more stable. The consistency and strength of this polyurethane coating (PU) varies depending on its future use. The outside of our textiles is treated with a DWR (Durable Water Repellent) coat to obtain a high level of water and dirt repellent properties. We only use PFC free finishings.

We use textiles in differing strengths to make sure our products fulfil their respective function. We state these in denier (D). This measurement unit is established in the outdoor market and has lead to comparability within our own collection. It goes back to the old French unit of weight also called denier. This means that 1D = 1 gramme per 9000 meters of yarn. The lower the number in front of the "D" the thinner the respective textile. Our unit therefore describes fabrics that range from very sturdy and durable to extremely light textiles.

However, the durability and strength of a textile cannot only be taken from its denier number. The weave, structure,

and application-oriented mix of raw materials also plays a role. The finishing of the yarn before the weaving process also has a decisive impact. We also state relevant equipment and features. Weaving in stronger threads or reinforced structures can make thinner material more durable and more stable. We call this feature "Ripstop" for example. If other processed or surface-finished yarns are used then the product is labelled with "high tenacity".

**YKK® zippers:** The most high-quality zippers available on the market are absolutely robust and reliable.

**Multi-chamber aluminium profile rails:** The weight-bearing elements of our backpacks are made from high-quality aluminium. This makes them durable and light at the same time. Its special constructions makes it possible to combine these two traits. A flat aluminium rail is separated into several different chambers by internal partitions. The cross sections shows a hive-like structure that provides stability. The multi-chamber aluminium profile rails are used in differing widths depending on the model of the backpack.

**Permanently elastic spring steel frames:** Spring steel is incredibly durable and elastic. It springs back into form again and again nearly unbreakable after being deformed. A round profile allows a very flexible construction of the frame. A flat profile provides a frame with extremely high form stability. Both give our Aircomfort models with its patented ventilation a permanently stable tension of the back net.

## SLEEPING BAG MATERIAL

Our upper materials and filling for sleeping bags are made of polyamide and also polyester for the most part. We predominantly process textiles with low deniers. These are also often structured. The fabrics are light and at the same time very durable and always moisture repellent. PFC free materials are increasingly being used. In addition we also make sure to use breathable materials to ensure pleasant sleeping conditions.

Fabric in the so-called Dryzones is especially processed and enables a high water column. The sleeping bag stays comfortably dry.

Our fillings are also light and comfortable. Good insulation properties and breathability are necessary requirements for the materials that we use in our products.

Some of our sleeping bags used brushed materials like the Brushed Thermo Fleece. The light and very high-quality polyester fleece feels soft and cozy to the skin due to its fluffy brushed surface. The material offers an excellent warmth-weight ration. Furthermore it is highly breathable, long-lasting, and easy to clean. Its short drying time is another benefit. Its high level of elasticity supports freedom of movement of

the Thermo-Stretch-Comfort-construction in our Exosphere SL models. It also keeps warm in the Orbit SL models.

## FILLING SLEEPING BAG

### Synthetic

**High-Loft Hollowfiber:** Synthetic hollow fibres are processed to a filling fleece (by thermal bonding). To ensure good compression and high loft, silicone is added. Remarkable insulation rating, tear resistant and durable.

**Thermo ProLoft®:** A special thermal process turns Polyester fibres into top quality technical Thermo ProLoft® insulating fleece. The combination of dense and hollow fibres results in the perfect blend between durability, weight and warmth properties - a fleece material that is easy care and durable yet compact and offers excellent insulation at minimal weight. The synthetic fibres also absorb very little moisture. Short drying times, excellent loft and thus insulation properties even when damp, are all advantageous characteristics. deuter Thermo ProLoft® is also coated with a thin layer of silicone to give it good lofting properties.

**Combining:** deuter sleeping bags Orbit, Exosphere and Space can be zipped together. Use left-hand zip and right-hand zip versions when combining.

### Down

Since June 2005 we only use down feathers certified in accordance with the Responsible Down Standard (RDS) - benefits: no live plucking, no force feeding, supply chain traceability, animal welfare guaranteed at every stage and verification by independent certification institutes around the world.

**Composition:** The deciding factor in a down sleeping bag is the down quality. Primarily this is a matter of the weight ratio of down to small feather mixture, which is expressed in percent. deuter uses only the high performance filling ratio of 90% down to 10% small feather (90/10).

**Fill power / cuin:** High quality sleeping bags should have a fill power of at least 650 cuin (cubic inches). This measurement in cubic inches per ounce of down shows the quality of the bulking and expansion power of the filling. High quality down has a bulking volume of 650 cuin (10.6 litres) per 1 ounce (28.3g). A bulking power of 550 cuin, and higher is good; of 650 - excellent; and 800 is almost impossible. In the end: the higher the volume the better the insulation value.
