WHAT'S NEW?

„PATHS ARE MADE BY WALKING” (FRANZ KAFKA)

Each season, we create exceptional products for people who take on new challenges and blaze their own trail. By doing so, we continue to shape the world of mountain sports with our pioneering ideas

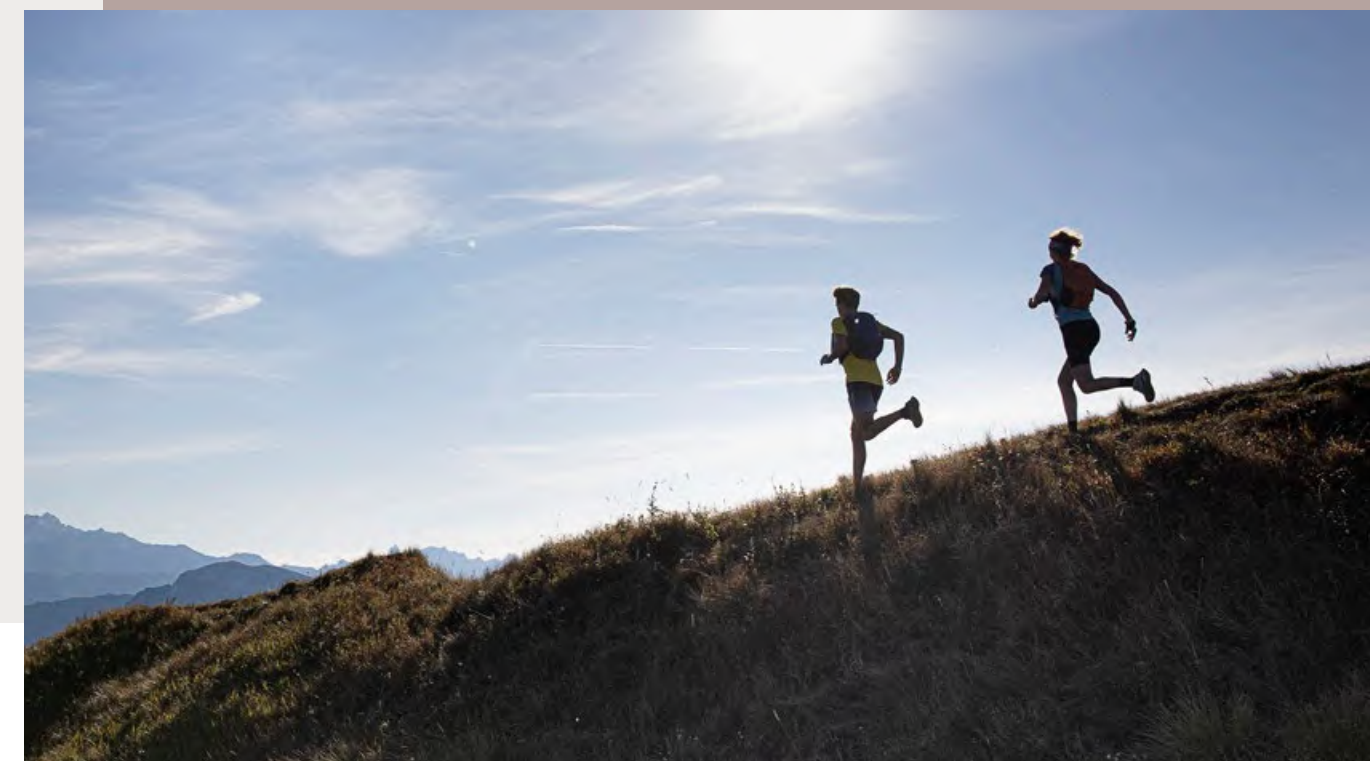

and give our customers greater freedom to pursue their love of mountains, break new ground and push their limits.

LIGHTWEIGHT RUNNING HAS A NEW NAME: TRAICK.

Following our successful debut in the trail running sector, we have now designed a lightweight hydration running vest for ambitious trail runners who want to keep things fast and light on the most diverse and challenging trails. And our approach to designing it has been just as ambitious. With the Traick, we're positioning ourselves in an important market that, to date, has been dominated by just a handful of brands. So, what's our competitive edge? We've made a vest that's meticulously engineered down to the last detail and stripped down to the bare essentials, but without compromising on comfort. Thanks to its body-hugging fit, bungee sternum closure, modular side compression, and highly breathable stretch fabric, this vest fits like a snug garment, with zero bounce, yet allows unrestricted range of movement and full breathing comfort at all levels of intensity. Four clever pockets on each shoulder strap provide on-the-go access without missing a stride. Stash pockets at the

back make for speedy hydration bladder refilling and quick jacket storage. And there are multiple options for stowing collapsible poles while keeping them at the ready.

As a bluesign® product that is climate neutral, PFAS free and meets the stringent criteria of the Green Button (Grünen Knopf), the Traick hydration running vest is further evidence that sustainability and performance can go hand-in-hand.

PRODUCT

THE XBERG IS ALL ABOUT VERSATILITY AND SUSTAINABILITY

Bicycle mobility is in the spotlight once again this season. Following the success of our commuting products, we are expanding our bike collection with yet another innovation. With the Xberg, we have come up with a climate neutral, PFAS-free, Green Button-certified bluesign® product for anyone looking for the perfect combination of a practical bicycle pannier and a comfortable day pack, to suit their daily commuting needs. It is highly adaptable and comfortable. Using the clever fold-up lower half of the back panel the Xberg converts from a backpack into a bike pannier and back again in no time at all. Press studs fix the panel in an up or down

position, revealing either the BagFix quick-release system (for attaching to a bike rack) or the Contact back system with ergonomic shoulder straps. A roll-top opening with buckle closure provides quick access to contents and the removable organizer unit in the main compartment. The universal attachment options on the lid, plus a handy front pouch – for a helmet, say – are further practical organization and stow options.

E-LEARNING

DEUTER TRAINING GOES DIGITAL

GET THE FACTS DIGITAL

deuter's retail training now includes eLearning – a smart way of increasing product knowledge for the whole team. And it's mobile too. So you can stay up to date with everything deuter-related, or quickly bring new employees up to speed. Because the more knowledge you have, the more we all benefit.

CSR „NEWS“

LESS IS MORE

Countless environmental changes clearly indicate that we cannot continue living and doing business in the way we have. Which is why more and more people are concerned with issues like their own environmental footprint, the sustainability of the products they buy and adopting a responsible approach toward people and nature.

We have also long grappled with the question of how to make outdoor products whose manufacture, use, and disposal have minimal impact on humans and the natural world. It's a challenge that many sectors must address, and where sustainably made, long-lasting products, with components that can be reused and recycled is part of the solution.

It is with this in mind that we keep developing our products, and are therefore launching new products for summer 2024 that are made using as much recycled content as possible, and with components made using environmentally-friendly, resource-efficient manufacturing practices. All of these new products – apart from the waterproof Drypack Pro – bear bluesign® product accreditation, meet the stringent Green Button standards, and are climate neutral and PFAS free.

Our partners and standards:

It is something we are not only incredibly proud of, but it also exceeds the already ambitious targets we set in 2020 in our sustainability strategy. Back then, the proportion of bluesign® products in the collection was 8%. In 2021, we wanted that figure to rise to 20%, with another series added each year until 2025. But our Summer 2024 collection includes 284 bluesign® products, out of a total of 958 products, which means we've hit 30% already.

And for the 2024 season, the proportion of recycled content is also greater than predicted, with 639 out of 958 models containing recycled materials, making it 67% of the collection.

So with the SS24 collection, we are sending out another clear message about sustainability and proving that economic and responsible business practices can also achieve ambitious goals.

WE TAKE OUR RESPONSIBILITY SERIOUSLY

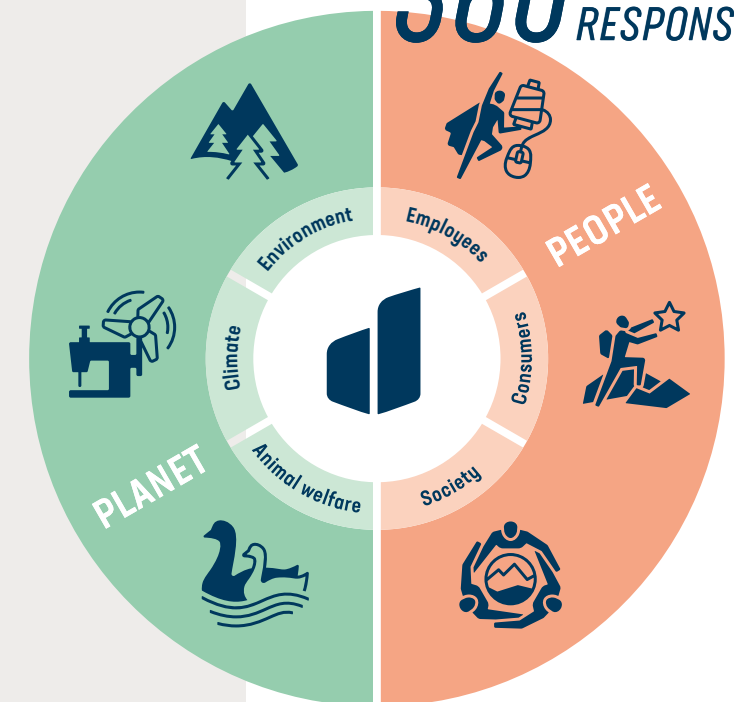

We are mountain sports pioneers. As Europe's largest backpack manufacturer, and sleeping bag experts, we have been shaping the international outdoor mountain sports scene for more than 125 years, and we take our responsibility to protect what we love for future generations very seriously.

To achieve this, we need people, nature and businesses to be in harmony. Or, as our vision puts it: 'Together For 360° Responsibility'. In keeping with our slogan „Changing for the better means taking responsibility“, we have committed to an all-encompassing approach to doing business more sustainably. It includes all the key aspects, such as environmental protection and climate action, animal welfare, social justice, and social welfare – as well as our collaboration with partners, associations, and institutions – so that we can manufacture using fewer resources, create long-lasting products and support fair working conditions.

Responsibility is at the heart of everything we do and woven into the fabric of who we are.

TOGETHER FOR 360° RESPONSIBILITY

WE MANUFACTURE ACCORDING TO BLUESIGN® STANDARDS – FOR THE SAKE OF PEOPLE AND PLANET

Even the most conscientiously made outdoor equipment creates an ecological footprint. We want to keep that footprint as small and light as possible. That's why we have adopted the bluesign® system standard – the world's strictest standard for environmental protection, occupational safety

and consumer protection in the textile industry – to guide us in our production. As part of the bluesign® partnership, we have worked to make our production processes and products more resource efficient and environmentally friendly since 2008. With impressive results: 100% of our direct manufacturing partners are bluesign® system partners and the number of bluesign® products in our collection is steadily rising.

FAIRNESS FROM A TO Z – WITH THE FAIR WEAR FOUNDATION

We have been Fair Wear Foundation members for more than 10 years now. The FWF is a multi-stakeholder initiative that works together with companies and factories to improve working conditions in textile

and garment factories, particularly on the ground in manufacturing countries. And our efforts are bearing fruit: German Sustainability Award for our long-standing collaboration with just two manufacturing partners; FWF Leader Status every year since 2013 and FWF Best Practice award in 2015.

PARTNERSHIP FOR SUSTAINABLE TEXTILES – UNITED FOR GREATER SUSTAINABILITY

We want to make outdoor equipment in an environmentally friendly, sustainable way, under fair working conditions and within socially responsible manufacturing and supply chains. These chains are long and complex, and often hard for one company alone

to clearly assess. Which is why we have teamed up with other manufacturing partners and businesses through our membership of the Bündnis für Nachhaltige Textilien (Partnership for Sustainable Textiles). The initiative, which was set up in 2014 by the German government, brings together stakeholders from business, civil society, standards organizations, and trade unions under one umbrella.

GREEN BUTTON FOR GREEN PRODUCTS

Policy makers have also recognized that textile manufacturing cannot become more sustainable without cross-border standards. deuter is collaborating with the international "Green Button" (Grüner Knopf) hallmark initiated by the German government. It is the world's first state-supervised certification mark

to establish compliance standards for sustainably produced textiles. This global seal of approval sets mandatory requirements to protect people and the environment. A total of 46 stringent social and environmental standards must be met, such as wastewater limits and the prohibition of forced labor.

RESPONSIBLE DOWN STANDARD – FOR THE LOVE OF ANIMALS

Even sustainable natural materials have to be produced in an environmentally sound way. That is why, since 2015, we've exclusively used high-quality feathers that are Responsible Down Standard (RDS)

certified for all of our down sleeping bags. In order to obtain RDS certification, animal welfare and farming practices have to be traceable throughout the entire production chain and meet the strictest requirements – from fledgling all the way through to finished sleeping bag.

SUSTAINABLE DEVELOPMENT GOALS – INTERNATIONAL GOALS FOR A SUSTAINABLE FUTURE

The 2030 Agenda is a roadmap for sustainable economic, social and environmental development worldwide, jointly developed by the member nations of the

United Nations (UN). It is based on 17 Sustainable Development Goals (SDGs), which we use to guide us in shaping our 'deuter promise' sustainability agenda.

CLIMATE NEUTRAL – REDUCING AND OFFSETTING

Climate change is one of the most urgent challenges facing our planet. Which is why we are taking action. Our headquarters in Gersthofen, Germany, has been climate neutral since 2021, and by 2023 a minimum

of 25% of our collection will be climate neutral. In order to achieve our climate goals, we are working closely together with the international experts at ClimatePartner.

OUR OWN INITIATIVES

We are especially proud of the sustainability initiatives that we have undertaken ourselves and which we have already been successfully implementing for some time. These are further grist for the mill in realizing our vision and our holistic, fully integrated road to sustainable business practices.

FROM PFC FREE TO PFAS FREE – WITH THE SAME GREEN STANDARDS

The acronym PFC is well known and has been used as a catch-all term to refer to the broad class of harmful but extremely useful chemicals used in water-, dirt- and grease-repellent finishes on textiles, for example, and in the manufacture of water-repellent and breathable membranes. However, in more specialist publications, the term PFAS (per- and polyfluoroalkyl substances) is now more widely used. The two acronyms, PFC and PFAS, are generally interchangeable. From the middle of 2019, we dispensed with all PFC/PFAS from our DWR (durable water repellent) finishes – these toxic substances nicknamed "forever chemicals" that leach into the environment during the manufacture, usage, and disposal of products, and are proven to cause harm to humans, animals and the environment. So while the acronym is now different, we can still enjoy the same high standards in water and dirt repellency with our environmentally friendly finish, which is also harmless to human and animal health.

TRUST AND COLLABORATION PAY OFF

The German Sustainability Award is the most coveted award of its kind in Germany, and Europe's biggest prize for environmental and social action. It recognizes exemplary global partnerships in the textile industry, where collaboration has led to the successful implementation of the 2030 Agenda for Sustainable Development and integration of accountability into supply chains. In 2022, we were the recipients of the German Sustainability Award with our Vietnamese partner Vina Duke, in acknowledgment of our 30-year partnership based on trust, our shared commitment to social and environmental responsibility, and our pioneering role in this field. And of course, the same goes for our other manufacturing partner, Bellmart, who have manufactured our sleeping bags in China and Myanmar since 2003.

STITCHING UP OUR FUTURE – DEUTER'S REPAIR SERVICE

However well you look after a product, at some stage, it will start to show signs of wear and tear. For us, there is no doubt that mending gear is better than throwing it away. And that's not just because we have some real miracle workers in our repairs department, but because providing a lifetime repair service also increases the lifespan of a product, which in turn saves resources.

www.deuter.com/responsibility

deuter has developed different systems specifically adapted to the various sports and their specific demands.

HIKING / TREKKING

On small to medium backpacks that are at home in easier terrain we go for maximum ventilation. The heart of the Aircomfort systems – tested and proven for decades – is its flexible spring steel frame. It is extremely durable, provides stable tension for the airy back mesh and creates the ventilation space between pack and wearer's back for the moist, warm air to dissipate. 1984 deuter invented & patented the first mesh back system worldwide.

THE RESULT:
Up to 25 % less perspiration thanks to the maximum ventilation achieved by the Aircomfort mesh construction. This reduces circulatory stress for more endurance – tested and proven by the renowned Research Institute Hohenstein.

TREKKING / HIKING

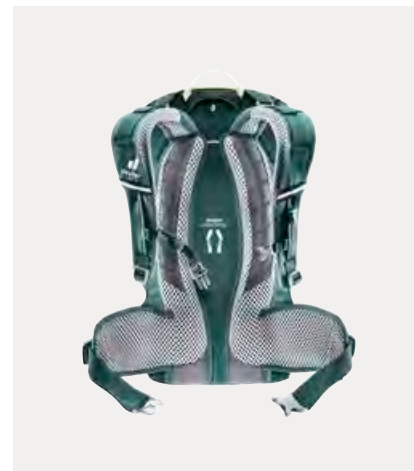

The easiest way to carry heavy loads is when backpack and wearer become one. This is what our Aircontact principle is all about: the body contact system brings the weight close to the body and therefore close to the center of gravity. This results in full pack control and an effective load transfer. Furthermore, our Aircontact cushions made from special hollow chamber foam guarantee fantastic ventilation due to the pump effect of every movement.

THE RESULT:
Up to 15 % less perspiration as with a standard compact back system (proven in tests conducted by Gabriel L&T and the University of Erlangen) – combined with outstanding load transfer and a secure, perfectly balanced fit.

BIKE / DAYPACK / HIKING

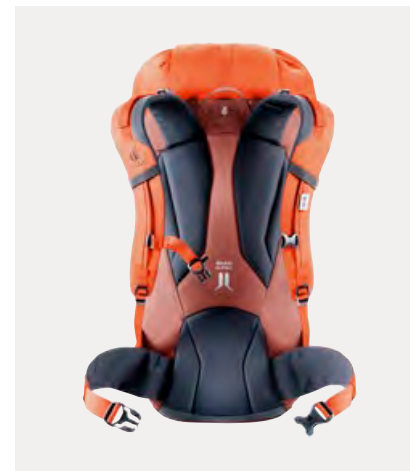

A bike pack always has to sit secure and snug on your back – even on the roughest rides. Our unique Airstripes System takes care of that and offers effective ventilation. It consists of two contoured, air-channelled foam profiles that are covered with a highly breathable Wide AirMesh lining. The reduced contact surface results in an optimized fresh air circulation. Also, the pack's load is kept close to the body and thus won't throw the rider off balance.

THE RESULT:
The minimal contact surface area of the profiled Airstripes allows free air circulation over 80 % of the riders back, while still providing a secure, compact fit even on rough rides.

ALPINE

For alpine backpacks the combination of comfort, durability, functionality and low weight is essential. deuter's Alpine System answers this challenge by focusing on a compact, secure yet comfortable fit with its two flexible softstripe back pads that are perfectly adapted to the anatomy and follow the wearer's movements. In combination with the pack's sleek shape this keeps the load always close to the centre of gravity – thus guaranteeing full pack control.

THE RESULT:
The Alpine back combines a secure, compact fit for full pack control and full focus on the terrain with a top carrying performance and a comfortable ventilation between the two softstripe back pads.

HIKING / ALPINE

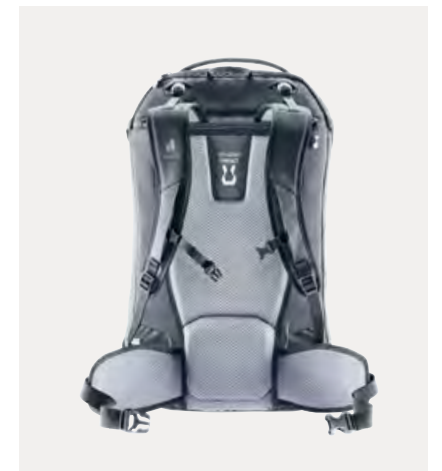

Our lightweight backpacks come into their own during endurance sports and Alpine day treks. Reduced to the essential, they are ideal for comfortably carrying light to medium loads depending on the volume. However, lightness must never come at the expense of durability. That is and always was our corporate philosophy, because disposable products put a strain on the environment and a backpack that falls apart high up in the mountains can also be dangerous.

THE RESULT:
Our lightweights are designed for everyone who wants to travel light without forgoing carrying comfort and durability.

TRAVEL

The ergonomically shaped back cushions of the Contact System hug the back and distribute the weight of the load evenly, relieving the load on the back. Additionally, loads are carried easiest when they are close to the body. Channels between the cushions as well the breathable, sturdy 3D Airmesh lining provide pleasant ventilation.

THE RESULT:
Ergonomically shaped Contact back cushions provide carrying comfort that relieves the back while keeping the weight of the load close to the body and distributing it evenly.

EL-SERIES

Extra Long Series

SL-COLLECTION

Female specific packs

deuter SL-Team

deuter's product development team for the women's specific SL line consists of female designers and top athletes from all disciplines / sports. It's almost an occupational habit that our experts can never stand still. Since 2006 they are always pushing forward - also when it comes to developing products.

Our rucksacks are designed to fit the average athletic build. However, since not everyone fits the norm it is likely that women's models will fit many male users perfectly well, and vice versa.

AC Lite EL

Futura 29 EL

Futura 34 EL

Futura Pro 42 EL

Trans Alpine 32 EL

Attack 22 EL

SHORTER BACK

Women usually have a shorter back than men. Our SL carrying systems are adapted to the female anatomy and therefore shorter.

SLIM-CUT SHOULDER STRAPS

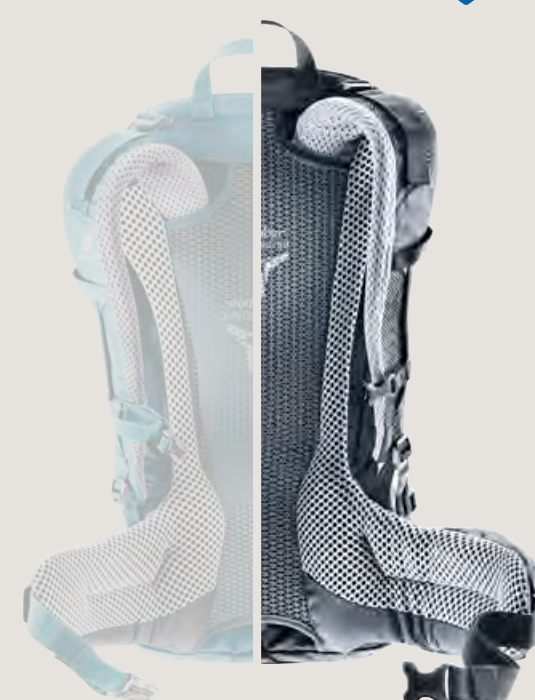

The SL shoulder straps have a distinct S-shape and all-round soft edges. In addition the straps become slimmer towards their ends. For a perfect fit around the shoulder area - no pinching or chaffing. The shoulder straps lie closer together and are adapted to slimmer female shoulders.

CONICAL HIP-FINS

The closed SL hip belt forms a cone to perfectly adapt to the female anatomy. The conical shape is the result of the the ends of the hipbelt coming together in an upward direction and the anatomically adapted design for the SL hip fins. The hip fins perfectly hug the female hips.

Standard Fit

Standard Fit

THE DEUTER EXTRA LONG SERIES

Tall people can enjoy a perfect fit with our Extra Long EL-models! Taller sportsmen and -women between 1.85 - 2 m often have difficulty finding backpacks that fit their longer backs. Our favourite deuter backpack models are available to suit taller people with extended back lengths by 6-9 cm. Overall, backpacks in the Extra Long (EL) series have also grown in terms of volume. Back systems, features and details remain the same in the EL models as they are in the standard models, however.

breathable, pivoting ActiveFit adjustable shoulder straps

Pull-Forward system for easy waist belt adjustment

detachable sternum strap

stabilizer straps

two extended stretch mesh side pockets and one on the front

stretch compartment inside

hydration compatible

height-adjustable, detachable lid ; spindrift collar for extra 5 liters capacity

large lid pocket

SOS label

- ergonomic, trapezoid-shaped lumbar pad for effective load transfer onto the pelvis
- two lightweight mesh, zippered hip fin pockets
- gear loops on the front and shoulder straps to secure a GPS device, map case etc.
- modular gear straps to attach a sleeping mat or tent, or to compress the load in the base of the pack
- bluesign® product
- Material: 175D PA RIPSTOP ULTRA HD

AIRCONTACT SYSTEM

EASY-ON-THE-BACK MESH COVERING

The reduced contact surface of the Aircontact back system's Air Spacer mesh cuts weight while generating increased ventilation across the back. The simple Clip & Loop back length adjustment and ergonomically shaped hip fins create a tailored fit with superior carrying comfort over long distances.

AIRCONTACT ULTRA

Trekking

LIGHT WEIGHT FOR MORE ENERGY
Reduced to the essentials, this lightweight pack expertly balances comfort and weight, so you can devote more energy to the trail. And its hardwearing ripstop fabric made from performance fibers means this pack can withstand anything you throw at it. The lid can be removed to shave off extra weight, using a drawcord and press stud closure to seal the main compartment.

MODULAR GEAR STRAPS FOR FLEXIBILITY
Depending on what you're undertaking, the lid can be detached, and the modular gear straps repositioned to attach a range of items.

- TÜV SÜD certified
- material:
420D PA RIPSTOP TPU / 200D PES

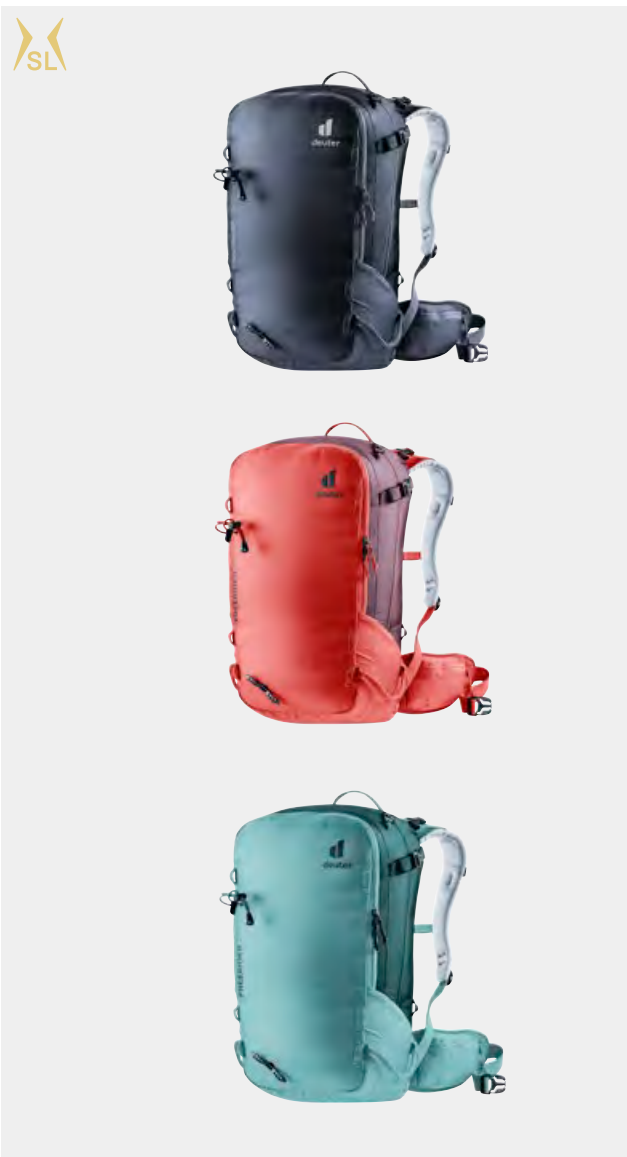

ALPROOF TOUR

LATEST AIRBAG TECHNOLOGY FOR RELIABLE SAFETY
The updated Alpride E2 avalanche airbag uses the latest supercapacitor technology and is one of the lightest fully electronic airbag systems on the market. It is also unaffected by low temperatures. In addition to fast, high-pressure airbag deployment, this proven technology has huge advantages when it comes to maintenance and transport compared to traditional cartridge-powered systems. An LED display and release valve on the outside of the pack gives it good handling and makes it easy to monitor system status. Deployment is also extremely intuitive and can be practiced before the start of the season at no cost.

XBERG SERIES

MARKETING STYLE RECYCLED FABRIC

RESOURCE-FRIENDLY MANUFACTURING
This bluesign® product uses body fabric made with recycled materials and components made using environmentally-friendly, resource-efficient manufacturing practices. It meets the Green Button standard, is climate neutral, PFAS free, and is a clear statement of our commitment to sustainability.

Details Xberg: 25

For anyone looking for the perfect combination of a bicycle pannier that converts to a comfortable day pack, to suit their daily commuting needs.

-  deuter Contact back system
-  adaptable BagFix quick-release system
-  zippered side pocket

-  extendable capacity (5L)
-  front pocket (open format)
-  reflective details

-  removable organizer unit for a tablet, laptop (up to 16") and documents
-  detachable rain cover

- top-loader with roll-top closure
- breathable shoulder straps
- fold-up back panel
- reinforced base
- 100 % recycled body fabric
- bluesign® product
- Material:
420D REC PA,
235D REC PA PLAIN

CONTACT SYSTEM

INNOVATIVE BACK PANEL CONVERSION FOR DUAL FUNCTIONALITY
Using the clever fold-up lower half of the back panel, the Xberg converts from a backpack into a bike pannier in no time at all. Press studs fix the panel in an up or down position, revealing either the BagFix quick-release system (for attaching to a bike rack) or the Contact back system with ergonomic shoulder straps.

PRACTICAL OPENINGS FOR QUICK ACCESS

A roll-top opening with buckle closure provides quick access to contents in the main compartment. A removable organizer unit and universal attachment options on the lid, plus a handy front pouch - for a helmet, say - are further practical organization and stow options.

CLEVER ORGANIZATION KEEPS EVERYTHING CLOSE AT HAND
Following years of product development and countless hours of practical experience with this spacious pack, the Trans Alpine now counts as one of the most sophisticated bike backpacks on the market and the number 1 choice for alpine traverses by mountain bike. The clever layout, with tool and pump compartments, for instance, plus a handy front stash pocket which can also accommodate a helmet, and a subdivided main compartment give this pack the kind of easy handling and clever organization you need on multi-day routes.

For professional trans-alp bikers that value the perfect fit during all riding situations as well as a functional distribution of pockets.

- excellent ventilation and compact, safe fit due to the Airstripes Pro System
- ActiveFit shoulder straps that adapt to any-body size guarantee perfect carrying comfort
- load distribution and stability through the light spring-steel frame
- padded hip fins
- side zipped pocket on back for smartphone, map etc.
- a separate, in the back lying pocket allows fast access to fill hydration system (suitable for 3.0 l Streamer) even with full backpack
- separate bottom compartment keeps load in place for an ideal center of gravity, intermediate zippable bottom partition
- load adjustment straps
- adjustable chest strap
- loop to attach sunglasses on shoulder strap
- abrasion-proof and anti-slip material on shoulder straps and back are reinforced for carrying the bike
- SOS label with emergency numbers and alpine emergency signals
- two elastic side pockets
- stretch inner compartment

- detachable rain cover with its own pocket
- robust carrying handle on top
- wallet, tool, pump etc. are well arranged in large zipped front compartment, including organisation with several zipped pockets and key clip
- all-round 3M reflectors
- zipped pockets on hip fins
- zipped pocket and two slot pockets in main compartment
- compression straps
- Material: 600D PES REC BS, 100D PA RIPSTOP

Kid Comfort Accessory

The flexible and durable sun roof is securely attached to the deuter child carrier with buckles. The sun roof protects the child from UV-rays and provides pleasant shade. Easy to stow thanks to its flexible construction. Fits the Kid Comfort Active, Kid Comfort Active SL, Kid Comfort.

Material: 210D PA

Kid Comfort Accessory

The complete rain and wind protection for the child carriers. Fits all child carriers with a sun roof.

Material: 70D PA

Kid Comfort Accessory

Our child carriers can be upgraded with the large, ergonomic pillow. It protects the tired child's head and gives support even in the corners of the cockpit, enabling a relaxing nap. The soft pillow and the removable cover are washable and easy to remove. The press-stud attachment fits all current Kid Comfort models.

Material: PES FLEECE / PES SUPER-SOFT / T/C COTTON HYBRID FABRIC

Kid Comfort Accessory

The height-adjustable foot loops for our child carriers are also available separately. They are now adjustable to accommodate different foot and shoe sizes.

Material: 210D PA

CAMERA

Jaypack 34+
3550022 | 2160 g | H 60 x W 30 x D 22
7000 black 5579 redwood
4 046051 144351 4 046051 144368

Details Jaypack 34+ Whether it's a moment in sporting history, beautiful landscapes, or wildlife up close and personal, with this professional camera backpack you'll never miss a shot.

-  flexi spring steel frame for effective load transfer
-  stabilizer straps
-  precision-adjustable sternum strap
-  detachable, ergonomic, padded hip fins with two zippered pockets
-  water-resistant, TPU-reinforced stable base
-  two large stretch side pockets for water bottles or small tripod

-  glasses stow system on shoulder strap
-  zippered valuables pocket inside lid
-  lockable zippered front compartment with double-padded laptop sleeve, three small, zippered pockets and a stash pocket for lens filters, flashes, light reflectors, plus loops for pens or brushes
-  quick and easy access to main compartment via sturdy zip around rear opening

- top-loading lockable lid compartment with 4 liters capacity extension for change of clothes, jacket, snacks, first aid kit etc.
- zip-through lid compartment base for direct access to main compartment
- three zippered pockets on reverse side of back panel for smaller items like filters etc.
- large main compartment with Velcro dividers that can be moved to accommodate a range of sizes and types of camera gear: 5 x 1-bay dividers, 3 x small 1-bay dividers, 2 x 2-bay dividers, 2 x 3-bay dividers, 2 x 4-bay dividers
- to fit a pro mirrorless or pro DSLR with portrait grip and accessories designed to fit telephoto up to 500 mm with lens hood, 600-800 mm telephoto with simple lens hood, and when using extended capacity, a camera with mounted telephoto
- four modular gear straps and one side strap with aluminum hook buckle to attach further gear like a sit mat, jacket, or big tripod
- precise tripod positioning means backpack remains upright when placed on the ground
- bluesign® certified body fabric
- Material: 330D TEXTURED WEFT REC PA

CLEVER FUNCTIONAL FEATURES FOR EASY HANDLING
The modular main compartment configuration makes for highly flexible, purpose-specific organization. The zip around closure on the back panel allows quick access to camera gear, and the extendable lid compartment has additional space for personal items and extra layers. The streamlined outside of the pack and stable TPU-reinforced base also adds to the overall ease of handling.

FUTURA PRO JAYPACK

For mountaineers and trekkers looking for maximum insulation at minimal weight for extreme conditions.

Thermo Stretch Comfort seams inside: faster to warm up and comfortable to sleep in thanks to the liner that stretches up to 25 % across the width

ErgoFootPro: more sensitive foot zone is given extra space in 3D ergonomic footbox for superior insulation

ThermoHood contoured hood for a cosy head with down held securely within chambers

inside pocket

PowerBox waffle structure in the lower part of the bag keeps the down in place no matter how much movement

Dryzone: water repellent fabric with PU coating at the foot and head

draft collar

Trapezoidal chamber design prevents the formation of cold spots

- top heat-to-weight ratio and packing dimensions
- contrasting draw cord toggles for easy hood adjustment (even in the dark)
- 360° insulation
- compression sack: light-weight, lateral compression, easy-to-use
- storage sack included – protects the down and keeps it well aired
- 2-way zip
- anti-snag zip baffle

- bluesign® product
- RDS certified down
- PFAS-free water and dirt repellent finish
- perfect for alpinists – both inside a tent under a starlit sky
- Filling: 750+ cuin / 90/ 10 Down RDS/ bluesign®
Inner shell: 20D PA RIPSTOP
Outer shell: 20D PA RIPSTOP + DWR

Details Astro Pro SL

- SL models are shorter in length and the shoulder and foot sections slightly narrower
- SL models have proportionally more down fill compared to REG models

360° fill system for 360° warmth

The top and bottom layers of a deuter sleeping bag are identical and contain the same amount. That's because we are aware that despite EN-norm tests assuming that a person will lie on their back, in reality, people move about in their sleep. By using our 360° fill system, we can guarantee our comfort ratings in all sleeping positions - and no more cold back!

100% RDS certified down: the Astro series

- No live plucking
- No forced feeding
- Traceability in the supply chain
- Animal welfare assured at all times
- Certified and controlled by accredited institutes worldwide

Details Starlight SQ

1-Layer-Construction

internal valuables pocket

For the outdoor offspring that would like a resistant, cozy companion with lots of leg room when camping.

- grows with the child: 30 cm zip extension at the foot end - when closed it serves as an additional insulation layer for the child's sensitive feet
- 2-way zip with easy handling for kids
- can be easily turned into a blanket by opening the all-round zip
- drawcord at the hood
- two step stuff sack
- Filling: High-Loft Hollowfibre
Lining: 75D PES
Outer material: 70D PA

- Filling: High-Loft Hollowfibre
- Shell: 40D REC PES RIPS
- Lining: 50D REC PES
- 100 % recycled shell and lining fabric

INFINITI SERIES- MADE FROM REMNANTS

And with it, we've managed to cut down our carbon footprint even further. By taking remnants from our production we've developed versatile, sustainable products in what we call the Infiniti series. These bags and packs are made from lovely fabric remnants from the manufacture of existing deuter products.

For the Infiniti series, we use remnants fabric from our production line that is 100% functional. This surplus fabric, which would otherwise go to waste, is turned into a series of bags and packs, thereby reducing the ecological footprint of our production. There are variations between the individual products in terms of the way these fabrics are applied, the surface area that is used and their aesthetics. But all fabrics are tested for functionality to ensure the end product is of a consistently high standard.

deuter is proud to support the 1 % for the Planet nonprofit organization with sales of its Infiniti series. 1 % for the Planet supports businesses and individuals in giving back to the planet in the most impactful way possible by building strategic partnerships that connect funds with causes.

By donating 10% of the buying price of the Infiniti series to 1% for the Planet, deuter is delighted to be supporting environmental projects throughout the world.

For more information about 1% for the Planet visit: www.onepercentfortheplanet.org

Travel

- TSA accepted cable lock with individually resettable 3-digit code
- write-on name tag included
- to secure valuables / goods of lower value or at a low risk of theft
- suitable e.g. to secure luggage
- ideal for journeys to the USA: the luggage can be opened/relocked by the US security authorities without damaging the lock
- Cable shackle opens by pressing the lever on the side
- visible red indicator at shackle: lock was opened by TSA
- to reset red indicator open lock and turn shackle by 360°
- Material: lock body made

Biking | Hiking | Mountaineering | Trekking | Endurance Sport

- keep fit for longer: enables regular hydration without interrupting sports activities
- large streamer opening for easy filling and cleaning
- very hygienic thanks to smooth surfaces
- leak-proof mouthpiece with push-fit cap: Twist-activated water-stop lock
- Material: CO-EXTRUDED PE – whole system is free of BPA and PFAS

TASTE-FREE™
The special film inside the bladder is as smooth as glass. Due to the special molecular properties, this system is very hygienic, taste-free and easy to clean.

GRUNGE-GUARD™
Antimicrobial technology blocks bacteria growth in the bladder.

Streamer Thermo Bag 3.0 (3 L)
3960623 | 120 g | H 44 x W 24 x D 2 cm
4014 graphite

Details Streamer Thermo Bag
Biking | Hiking | Mountaineering | Trekking

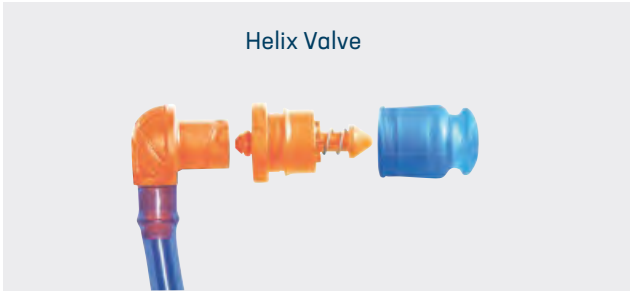

- insulating thermo-material keeps the drink warm in winter and pleasantly cool in summer
- can be carried inside the backpack or outside (on side loops)
- material: 210D PA RECYCLED

Streamer Tube Insulator
3960721 | 70 g | length 70 cm
7000 black

Details Streamer Tube Insulator
Biking | Hiking | Mountaineering | Trekking

- prevents the liquid from freezing quickly in the tube in cold conditions
- quick and easy to assembly thanks to a separable zip
- hook and loop strap for attachment to a shoulder strap
- material: NEOPRENE

Streamer Tube & Helix Valve

0000 transparent

Streamer Helix Valve
3960321
0000 transparent

Details Streamer Tube & Helix Valve
Biking | Hiking | Mountaineering | Trekking

With light pressure the drip-proof mouthpiece is activated and flows at a comfortable rate. The integrated spring valve causes the mouthpiece to shut automatically. Easy to take apart for cleaning.

Insulated Bottle Holder
3961124 | 30 g | H 21 x W 9 x D 9 cm
7000 black

Details Insulated Bottle Holder
Biking | Hiking | Mountaineering | Trekking

- Draw cord closure
- Compatible with shoulder strap attachments for hydration tube
- Insulating material maintains temperature of liquids
- To fit 74 mm diameter water bottles
- Material: 100D PA RIPSTOP

Streamer Slider
3960521
9000 orange

Details Streamer Slider

Easy Clean
Full width top opening for easy filling and cleaning. Absolutely leakproof thanks to the easy to use sliding clip.

Streamer Tube Brush
3960821 | 50 g | length 100 cm
0000 transparent

Details Tube Brush

- long flexible brush for removing residue from inside the streamer tube
- material: PA | STAINLESS STEEL

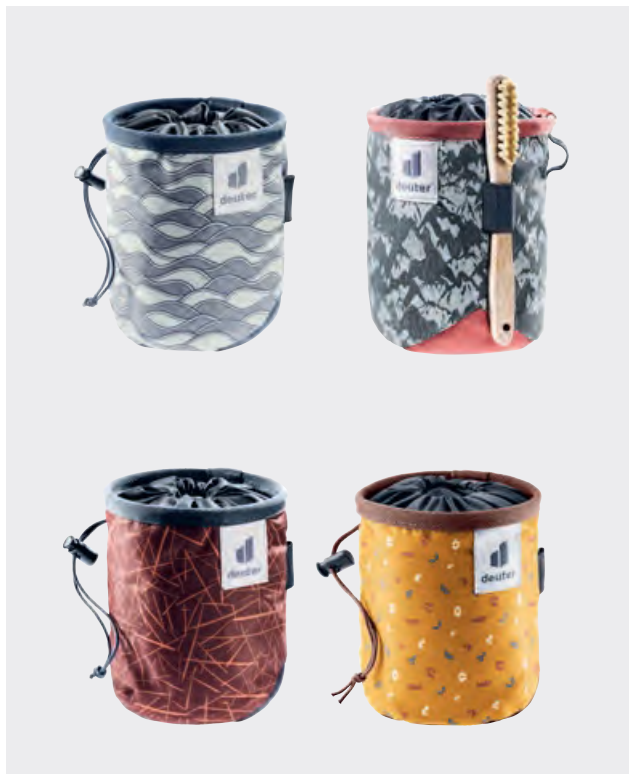

Streamer Flask 500 ml
3961022 | 50 g | H 19 Ø 8 cm
0000 transparent

Details Streamer Flask 500 ml
Trailrunning

- ultra-light soft flask
- leakproof / lock cap Helix bite valve
- soft, foldable, odor- and taste-neutral material Shrinks as you drink to limit water bounce
- large screw cap opening for quick access and easy cleaning
- stows easily in side pockets or vest-style shoulder strap pockets (like the Ascender)
- dishwasher safe
- materials: TPU | POM and BPA free

GRAVITY ACCESSORIES

Gravity Chalk Bag I
3391322 | 55 g | H 15 x W 12 x D 12

Details Gravity Chalk Bag I

- thin, lightweight fleece lining
- simple closure system at the side
- two deep-set attachment loops for a snug fit

Climbing

- brush loop
- fabric bluesign®-certified
- Materials: 150D PES bluesign®-certified, 600D PES, Material PES fleece with TPU Backing bluesign®-certified

Gravity Chalk Bag II M
3391422 | 100 g | H 19 x W 13 x D 11 cm

Details Gravity Chalk Bag II M

- thin, lightweight fleece lining
- additional waist strap with sturdy buckle
- two brush loops
- soft-feel fabric and wire rim for easy handling
- two deep-set attachment loops for a snug fit

Climbing

- zipper pocket on back (for keys, money or tape)
- Material: 140D PA RIPSTOP HT FD bluesign®-certified, 600D PES bluesign®-certified

Gravity Chalk Bag II L
3391522 | 110 g | H 21 x W 13 x D 11 cm

Details Gravity Chalk Bag II L

- thin, lightweight fleece lining
- additional waist strap with sturdy buckle
- two brush loops
- soft-feel fabric and wire rim for easy handling
- two, deep-set attachment loops for a snug fit

Climbing

- zipper pocket on back (for keys, money or tape)
- Material: 140D PA RIPSTOP HT FD, 600D PES bluesign®-certified

GRAVITY ACCESSORIES

RECYCLED FABRIC

Gravity Boulder
3391222 | 185 g | H 28 x W 30 x D 21 cm

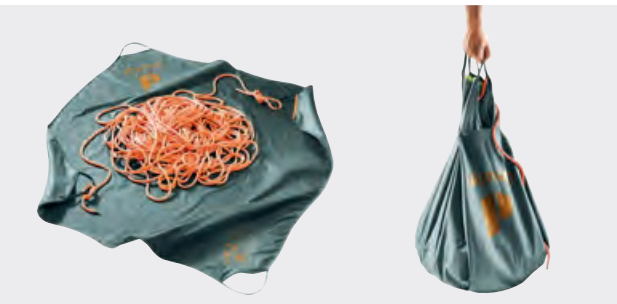

Details Gravity Boulder

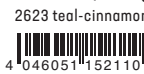

- thin, lightweight fleece lining
- extra-large opening
- easy-access Velcro closure
- airtight roll-top closure – keeps chalk dry and stops it escaping
- two zipper pockets on the back (with key clip)

Bouldering

- three sizes of brush loop
- stash pocket
- main fabric recycled
- materials: 330D PA RECYCLED TEXTURED / 600D PES bluesign®-certified

Gravity Rope Sheet
3391122 | 320 g | H 140 x W 140 cm

Details Gravity Rope Sheet

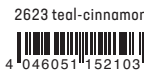

- interlocking handles carry function
- four grab handles
- color-coded corners to better locate tip and tail of rope

Climbing

- Partner-Check safety label
- Materials: 210D PA OXFORD

Gravity Rope Bag
3391022 | 590 g | H 22 x W 48 x D 30 cm

Details Gravity Rope Bag

- deuter rope groundsheet incl.
- long straps for crossways carry
- zipper pocket with key clip
- compression straps with metal hooks
- different strap colors for easy alignment

Climbing

- materials: 210D PA OXFORD

HELMET HOLDER / MODULAR GEAR STRAP / AIRCONTACT STOW STRAPS / RAIN COVER ULTRA

Helmet Holder
3922321 | 25 g
7000 black
4 046051 117843

Details Helmet Holder

- ultra-lightweight
- easy to use
- compatible with all current deuter alpine and winter pack series and the Race bike pack series

Ski | Climbing | Bike

- designed to accommodate climbing, skiing and cycling helmets
- material: PES MESH

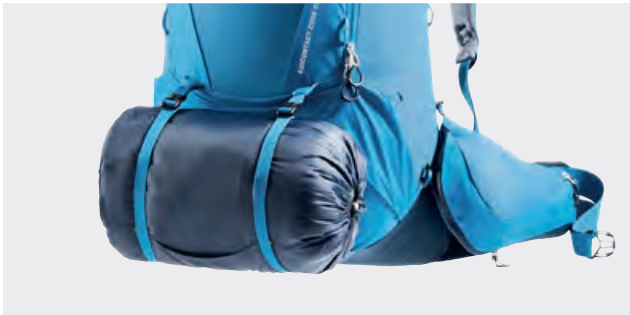

Modular Gear Strap
3990021 | 15 g | L 85 x W 2 cm
7000 black
4 046051 121628

Details Modular Gear Strap

- strap with metal hooks to attach gear to the outside of the pack
- skis can be attached diagonally or in an A-frame, tied together at the top

Ski | Mountaineering

- a snowboard or snowshoes can simply be strapped to the front of the pack
- also useful for compression
- models: Freerider, Freerider Pro, Freerider Lite, Freescape Lite, Freescape Pro

Aircontact Stow Straps
3359022
4014 graphite
4 046051 144481

Details Aircontact Stow Straps

- Modular gear straps to attach a sleeping mat or tent, or to compress the load in the base of the pack
- for compression

Trekking

- models: Aircontact Ultra, Aircontact Core, Aircontact X

Rain Cover Ultra
3942422 | 75 g | H 76 x W 30 x D 26 cm
4012 tin
4 046051 139777

Details Rain Cover Ultra

- outstanding protection from rain and water thanks to PU coating and taped seams
- extremely light material

Trekking

- for Aircontact Ultra Series
- material: 40D PA RIPSTOP

- grab handle
- free space for personal additions
- quick access to entire content thanks to all-round zip opening
- fold-out storage
- emergency instructions
- grab handle
- material: 420D PA RECYCLED

Our manufacturing process well as the quality of the textiles we use ensures the long-time durability and longevity of our products. The materials we use are adapted to their future use as backpack textiles and produced especially for deuter. Performance, deuter's standards, and their safety for consumers are regularly tested in labs and are therefore assured.

The majority of the raw material we use in our textiles is polyester (PES) and polyamide (PA). They handle well due to their properties and they are robust and tearproof. The outer fabrics we use, especially our rain covers, are water resistant. This provides ideal traits of products that are intensively used outside like our backpacks and sleeping bags.

All our textiles are coated on the inside, making the respective material more durable, more water repellent, and the seams more stable. The consistency and strength of this polyurethane coating (PU) varies depending on its future use. The outside of our textiles is treated with a DWR (Durable Water Repellent) coat to obtain a high level of water and dirt repellent properties. We only use PFAS free finishings.

We use textiles in differing strengths to make sure our products fulfil their respective function. We state these in denier (D). This measurement unit is established in the outdoor market and has lead to comparability within our own collection. It goes back to the old French unit of weight also called denier. This means that 1D = 1 gramme per 9000 meters of yarn. The lower the number in front of the "D" the thinner the respective textile. Our unit therefore describes fabrics that range from very sturdy and durable to extremely light textiles.

However, the durability and strength of a textile cannot only be taken from its denier number. The weave, structure, and application-oriented mix of raw materials also plays a role.

The finishing of the yarn before the weaving process also has a decisive impact. We also state relevant equipment and features. Weaving in stronger threads or reinforced structures can make thinner material more durable and more stable. We call this feature "Ripstop" for example. If other processed or surface-finished yarns are used then the product is labelled with "high tenacity".

YKK® zippers: The most high-quality zippers available on the market are absolutely robust and reliable.

Multi-chamber aluminium profile rails: The weight-bearing elements of our backpacks are made from high-quality aluminium. This makes them durable and light at the same time. Its special constructions makes it possible to combine these two traits. A flat aluminium rail is separated into several different chambers by internal partitions. The cross sections shows a hive-like structure that provides stability. The multi-chamber aluminium profile rails are used in differing widths depending on the model of the backpack.

Permanently elastic spring steel frames: Spring steel is incredibly durable and elastic. It springs back into form again and again nearly unbreakable after being deformed. A round profile allows a very flexible construction of the frame. A flat profile provides a frame with extremely high form stability. Both give our Aircomfort models with its patented ventilation a permanently stable tension of the back net.

Our upper materials and filling for sleeping bags are made of polyamide and also polyester for the most part. We predominantly process textiles with low deniers. These are also often structured. The fabrics are light and at the same time very durable and always moisture repellent. PFAS free materials are increasingly being used. In addition we also make sure to use breathable materials to ensure pleasant sleeping conditions.

Fabric in the so-called Dryzones is especially processed and enables a high water column. The sleeping bag stays comfortably dry.

Our fillings are also light and comfortable. Good insulation properties and breathability are necessary requirements for the materials that we use in our products.

Some of our sleeping bags used brushed materials like the Brushed Thermo Fleece. The light and very high-quality polyester fleece feels soft and cozy to the skin due to its fluffy brushed surface. The material offers an excellent warmth-weight ration. Furthermore it is highly breathable, long-lasting, and easy to clean. Its short drying time is another benefit.

Its high level of elasticity supports freedom of movement of the Thermo-Stretch-Comfort-construction in our Exosphere SL models. It also keeps warm in the Orbit SL models.

FILLING SLEEPING BAG

Synthetic

High-Loft Hollowfiber: Synthetic hollow fibres are processed to a filling fleece (by thermal bonding). To ensure good compression and high loft, silicone is added. Remarkable insulation rating, tear resistant and durable.

Thermo ProLoft®: A special thermal process turns Polyester fibres into top quality technical Thermo ProLoft® insulating fleece. The combination of dense and hollow fibres results in the perfect blend between durability, weight and warmth properties - a fleece material that is easy care and durable yet compact and offers excellent insulation at minimal weight. The synthetic fibres also absorb very little moisture. Short drying times, excellent loft and thus insulation properties even when damp, are all advantageous characteristics. deuter Thermo ProLoft® is also coated with a thin layer of silicone to give it good lofting properties.

Combining: deuter sleeping bags Orbit, Exosphere and Space can be zipped together. Use left-hand zip and right-hand zip versions when combining.

Down

Since June 2005 we only use down feathers certified in accordance with the Responsible Down Standard (RDS) - benefits: no live plucking, no force feeding, supply chain traceability, animal welfare guaranteed at every stage and verification by independent certification institutes around the world.

Composition: The deciding factor in a down sleeping bag is the down quality. Primarily this is a matter of the weight ratio of down to small feather mixture, which is expressed in percent. deuter uses only the high performance filling ratio of 90% down to 10% small feather (90/10).

Fill power / cuin: High quality sleeping bags should have a fill power of at least 650 cuin (cubic inches). This measurement in cubic inches per ounce of down shows the quality of the bulking and expansion power of the filling. High quality down has a bulking volume of 650 cuin (10.6 litres) per 1 ounce (28.3g). A bulking power of 550 cuin, and higher is good; of 650 - excellent; and 800 is almost impossible. In the end: the higher the volume the better the insulation value.
