CARBONLITE SKATE

CARBONLITE SKATE

The innovative Air Core Composite frame construction offers excellent vibration dampening for smooth, efficient performance that feels just like real snow. The Razor Shape Base guarantees sufficient ground clearance even with an extreme kick angle.

USER BENEFIT

- Quiet, dampens vibration
- Ground clearance even with extreme kick angles
- Low center of gravity and great snow ski simulation

PRODUCT INFO

Item Number	M01020
Wheel diameter / width	100/24mm
Ground Clearance	29
Axle-Centre Distance	630
Wheel Type	LP medium
Weight / piece	945
Splash Guards	Splash Guard 100

TECHNOLOGY HIGHLIGHT 1

SPEEDMAX CLASSIC MED

SPEEDMAX CLASSIC MED

The lightest rollerski made features a Bridge Arch Shape that produces a dynamic that is very close to skiing on snow. The Low-to-the ground stance, authentic ski flex, and Full Carbon Construction make it exceptionally stable and easy to control at high speeds.

USER BENEFIT

Lightest available rollerski
Authentic ski feel and flex
Steady at high speeds

PRODUCT INFO

Item Number	M01320
Wheel diameter / width	70/45mm
Ground Clearance	31,5
Axle-Centre Distance	745
Wheel Type	FR medium
Weight / piece	830
Splash Guards	Splash Guard 70

RC7 CLASSIC FR

RC7 CLASSIC FR

An excellent option for dedicated recreational classic skiers on various surfaces. Durable, lightweight aluminum frame is torsionally stiff for efficient skiing. Solid rubber wheels for excellent durability and added cushioning on uneven surfaces. Integrated rear backstop for efficient kick.

USER BENEFIT

Smooth, cushioned ride
Lightweight and long-lasting aluminum frame
Ratchet wheel design provides a solid kick

PRODUCT INFO

Item Number	M02319
Wheel diameter / width	70/38mm
Ground Clearance	25

RC5 SKATE

RC5 SKATE

Entry level roller ski with proven technology and performance features. 80mm wheels provide a low center of gravity for confident handling. A shortened wheelbase allows agility and easier turning. Durable, lightweight aluminum frame is torsionally stiff for efficient skiing.

USER BENEFIT

Entry level model
 Low center of gravity is highly stable
 Reduced lean tendency due to wider wheels

PRODUCT INFO

Item Number	M02618
Wheel diameter / width	80/28mm
Ground Clearance	30
Axle-Centre Distance	590
Wheel Type	LP medium
Weight / piece	755

RCJ SKATE

RCJ SKATE

Developed specifically for young skaters, with a lower balance point than the adult model for easier handling and control. Durable, lightweight aluminum frame is torsionally stiff for smooth, efficient skiing.

USER BENEFIT

- Low center of gravity is highly stable
- Exceptionally smooth ride
- Lightweight, durable aluminum frame

PRODUCT INFO

Item Number	M03018
Wheel diameter / width	80/28mm
Ground Clearance	30

RCJ COMBI

RCJ COMBI

Developed specifically for young skiers using skate or classic technique. The balance point is lower than the adult model for easier handling and control. Durable, lightweight aluminum frame is torsionally stiff for smooth, efficient skiing with a rear wheel backstop for the kick motion.

USER BENEFIT

- Usable for both ski techniques
- Exceptionally smooth ride
- Integrated rear wheel backstop for effective drive

PRODUCT INFO

Item Number	M03118
Wheel diameter / width	80/38mm

ACCESSORIES

SEASON 20|21

ROLLERBRAKE

ROLLERBRAKE

The new Fischer Rollerski Brake is a universal brake that can be used in connection with Fischer rollerskis and rollerski boots. The brake works completely detached from the rollerski, because it is directly attached to the boot. Due to the very low weight the brake remains virtually unnoticed during the running performance. The perfect accessory for increased safety and optimal control on rollerskis.

USER BENEFIT

Increased safety and control in any situation
Easy way to brake responsively and controlled
Virtually unnoticed during the running performance
