I/O MAG XL

MAG series

cod. M00713

You can only scope your line if you can see where you're going. Putting on the Smith I/O MAG XL goggles is like flipping the switch from regular to extra-widescreen. Our ChromaPop™ lens tech boosts color and contrast, so you get the clearest picture of the terrain ahead. Our highest level of anti-fog treatment and air flow keep the view sharp. Whether the day dawns clear or stormy, lens swaps are a snap thanks to our quick-swap MAG lens system. Because no two faces are the same, the XL model expands on the standard size for those looking for the largest possible lens.

VISION

Smith MAG lens change system uses magnets for quick, easy lens changes
ChromaPop™ lenses enhance contrast and natural color to make the details pop
Spherical Carbonic-x lens for distortion-free optics and impact resistance
5X™ anti-fog inner lens for advanced fog-free performance
TLT lens technology for crystal clear vision
Fits over the glasses (OTG) and is compatible with our optical docking system (ODS) prescription lens insert

FIT

Large fit
Responsive Fit™ frame adjusts to your face for a precise, comfortable fit
QuickFit strap adjustment system lets you find the right fit fast

Squad MAG

MAG series

cod. M00756

From bright and sunny to dark and stormy, everyday on the mountain has its own personality. The Smith Squad MAG goggles include two interchangeable lenses and our easiest lens change system so you always have the right tint for the conditions. Six magnetic contact points and two simple levers let you change lenses anywhere, anytime. The cylindrical lens design offers a wide field of view and our contrast-enhancing, color-boosting ChromaPop™ technology gives you elevated clarity and detail for alpine runs and tree stashes alike, all with the option of a quick lens change anytime the conditions warrant. Our AirEvac™ helmet integration design helps keep them fog free through it all.

VISION

Smith MAG lens change system uses magnets for quick, easy lens changes
ChromaPop™ lenses enhance contrast and natural color to make the details pop

Cylindrical Carbonic-x lens for distortion-free optics and impact resistance

NEW ChromaPop™

Sequence OTG

Over the glass series

cod. M00768

From dark and stormy to bright and sunny and everything in between, the Smith Sequence OTG goggles give you the visual advantage of our ChromaPop™ lens tech with the trusted fit of our over-the-glasses specific shape. Designed with medium size faces in mind, they offer a helmet-compatible, pressure-free fit that lets your glasses sit naturally for comfort that lasts all day. Their spherical lens maintains distortion-free clarity across your full range of peripheral vision, and the ventilated construction regulates air flow for a fog free view even when wearing a helmet. Welcome to a contrast-enhancing, color-popping world to define every terrain feature, no matter the lighting.

VISION

Available with ChromaPop™ lens: ChromaPop™ enhances contrast and natural color to make the details pop
Spherical Carbonic-x lens for distortion-free optics and impact resistance
Patented regulator system for adjustable lens ventilation
Fog-X anti-fog inner lens for fog-free performance
TLT lens technology for crystal clear vision

FIT

Medium fit
QuickFit strap adjustment system lets you find the right fit fast
Two-layer DriWix face foam wicks moisture for a fog-free fit

INTEGRATION

Designed for ultimate integration with Smith helmets for maximum comfort, venting and fog-free performance
Fits over the glasses (OTG) and is compatible with our optical docking system (ODS) prescription lens insert
Floating foam membrane eliminates eyeglass temple pressure

Showcase OTG

Over the glass series
cod. M00670

One size definitely does not fit all, especially in over-the-glass (OTG) goggles. The Smith Showcase OTG goggles are designed specifically for smaller adult faces looking for eyeglass compatibility. Their semi-rimless frame provides a wide field of view, while our ChromaPop™ lens tech brings enhanced contrast and color definition to every light condition. The whole idea behind wearing goggles is for the best vision possible. You might as well get the fit to match.

VISION

Available with ChromaPop™ lens: ChromaPop™ enhances contrast and natural color to make the details pop
Spherical Carbonic-x lens for distortion-free optics and impact resistance
Fog-X anti-fog inner lens for fog-free performance

Reason OTG

Over the glass series
cod. M00772

We never take clear vision for granted, so that you can. The Smith Reason OTG goggles are over-the-glasses and optical docking station compatible (ODS). In other words, you can wear them over your prescription glasses or use our ODS prescription lens insert to maintain the sharpest vision possible. Designed with larger face shapes in mind, they provide a helmet-compatible, pressure-free fit that lets your glasses sit naturally for comfort that lasts all day. The ventilated design regulates air flow for a fog free view even when wearing a helmet.

HELMETS

Icon

FIS approved protection for podium-worthy performances

cod. E00507

Compatible slalom chin guard sold separately
cod. I700119AH0000

Like heightened race-day focus, the Smith Icon helmet brings elevated impact absorption and fit technology to every run. This FIS-approved race helmet gives alpine ski racers the peace of mind to focus on reaching the podium with the angled impact benefits of MIPS® plus the energy-absorption advantage of Koroyd® throughout. Match it to the Smith goggles of your choice for the best airflow and fog-free performance possible.

PROTECTION

Advanced ABS construction for increased impact protection and all-around durability
Complete Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection
Engineered EPP foam core enhances durability in repeat-impact zones
MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head
Conforms to FIS RH 2013 requirements

FIT

Ionic+™ antimicrobial lining offers sweat-activated control
Plush lining and ear pad construction reduces noise interference
Fidlock® strap buckle offers easy one-hand operation

INTEGRATION

Designed for ultimate integration with Smith goggles for maximum comfort and venting
Compatible slalom chin guard sold separately

INCLUDED

Smith helmet bag

SIZING: SMALL 51-55 CM • MEDIUM 55-59 CM • LARGE 59-61 CM

Nexus

Exoskeleton protection with complete **Koroyd®** construction
cod. E00534

When you spend more days on the mountain than off, the Smith Nexus is your helmet for bomber protection that holds up season after season. In addition to a hybrid shell that balances a lightweight, low-profile design with a durable hardshell exterior, the Nexus steps up impact coverage with Koroyd® throughout the helmet, a fully-vented material that absorbs more energy in a crash than traditional foam construction alone. Add MIPS® for increased safety during angled impacts, and you have our most advanced helmet design. Since all this protection is useless if you don't want to wear it, we dialed up the comfort level with a micro-adjustable BOA® 360 Fit System that adapts to your whole head. A sweat-wicking, odor-fighting liner keeps you warm, while a front and rear adjustable 24-vent design lets you regulate airflow as needed.

PROTECTION

Hybrid shell construction blends a durable exterior with a lightweight in-molded shell for durability where you need it most while keeping the helmet light
Complete Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection
MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head
Exoskeleton enhances impact protection in side impact zones

FIT

BOA® 360 Fit System offers the most adjustable fit with the turn of a dial for on-the-fly micro-adjustability
Ionic+™ antimicrobial lining offers sweat-activated control
Fidlock® strap buckle offers easy one-hand operation
Removable ear pads for form-fitting comfort

INTEGRATION

AirEvac™ ventilation system integrates with Smith goggles for fog-free lenses
24 vents
Aleck™ audio system compatible

Vantage

Lightweight and tough with zonal **Koroyd®** construction

MIPS: **cod. E00675**

Standard: **cod. E00655**

When you're dedicated to skiing or riding all season long, little things make a big difference when it comes to comfort, safety, and durability. The Smith Vantage helmet is loaded with tech that makes a difference. Zonal Koroyd™ complements MIPS® for energy-absorbing impact protection to give you confidence while exploring in or out of bounds. The hybrid shell enhances day-to-day durability and includes a full 21 vents with dual adjustability that lets you fine-tune airflow to meet the conditions. As for fit, The Vantage uses the BOA® 360 Fit System for the ability to micro-adjust the size around your whole head with the turn of dial. Add the proven Smith AirEvac™ tech for a fog-free goggle interface, and you have a helmet to match your dedication.

Level

Lightweight and tough with zonal **Koroyd®** construction

MIPS: **cod. E00628**

Standard: **cod. E00629**

Like a good day on the mountain, the Smith Level ski and snowboard helmet is at your service for ranging far and wide. It brings the added energy absorption of zonal Koroyd® and the advanced angled impact protection of MIPS® to let you focus on ripping high speed arcs in the alpine and chasing untracked lines in the trees. The hybrid shell design adds durability without weighing you down for a helmet that you will actually take with you when the backcountry beckons. And because you love to ski all day, the fit and vents are adjustable on the fly, so you never need to slow down.

PROTECTION

Hybrid shell construction blends a durable exterior with a lightweight in-molded shell for durability where you need it most while keeping the helmet light
Zonal Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection

Mission

Lightweight with zonal **Koroyd®** construction

MIPS: **cod. E00697**

Standard: **cod. E00696**

There is the gear you need and there is gear you love. The Smith Mission ski and snowboard helmet is both. Its lightweight design brings the latest safety innovations including MIPS® and zonal Koroyd® for enhanced energy absorption in the event of a crash. Because you head to the mountain in all conditions, adjustable vents let you dial in the climate control. And because we live in a connected world, it has audio compatible ear pads. It's lined for instant comfort, and you can fine tune the fit with the adjustable dial.

PROTECTION

Mirage

Lightweight with zonal **Koroyd®** construction

MIPS: **cod. E00699**

Standard: **cod. E00698**

Like layering up for a powder day, pulling on the Smith Mirage ski and snowboard helmet is a sure sign of a good day to come. Its lightweight design brings the latest safety innovations including MIPS™ and zonal Koroyd® for enhanced energy absorption in the event of a crash. Because you head to the mountain in all conditions, adjustable vents let you dial in the climate control. And because we live in a connected world, it has audio compatible ear pads. A plush fleece lining offers instant comfort, and you can fine-tune the fit with the adjustable dial.

PROTECTION

Lightweight in-mold construction fuses the exterior shell and EPS foam for a one-piece design that's lightweight and durable

Zonal Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection

MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head

Select colorways offered without MIPS® system

FIT

Adjustable dial fit for easy, on-the-go size adjustment

Removable Snapfit SL2 ear pads add warmth and are audio-chip compatible

INTEGRATION

Designed for ultimate integration with Smith goggles for maximum comfort and venting

AirEvac™ ventilation system integrates with Smith goggles for fog-free lenses

Regulator climate control allows easy, one-handed vent adjustment

14 vents

Aleck™ audio system compatible

ChromaPop™

Survey

Lightweight with zonal **Koroyd®** construction
and integrated **ChromaPop™** visor

cod. **E00531**

The Smith Survey ski and snowboard helmet combines zonal Koroyd® safety innovations with a lightweight design for all-mountain use. An integrated visor simplifies goggle wear and offers the terrain-defining clarity of ChromaPop™. The helmet is lined for comfort with adjustable vents to regulate airflow. An adjustable dial fine-tunes fit, and the visor is over the glasses compatible.

PROTECTION

Lightweight in-mold construction fuses the exterior shell and EPS foam for a one-piece design that's lightweight and durable

Zonal Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection

VISION

Integrated ChromaPop™ visor for a wide field of view with contrast, color, and terrain-enhancing clarity

Designed to fit over your glasses (OTG)

Integrated light sensitive photochromic visor for a wide field of view that adapts to changing light conditions (Optional)

FIT

Adjustable dial fit for easy, on-the-go size adjustment

Removable Snapfit SL2 ear pads add warmth and are audio-chip compatible

INTEGRATION

Designed for ultimate integration with Smith eyewear for maximum comfort and venting

NEW Mips Koroyd BOA

Summit

Low profile with zonal **Koroyd®** construction

cod. E00536

Go light. Go Far. From skin track to boot pack and summit bids, the Smith Summit snow helmet is our lightweight go-to lid for backcountry touring and ski mountaineering. Its triple-certified design meets global alpine ski certs plus international mountaineering standards. The design blends a minimalist approach with mountaineering-specific details to keep it ultra-light yet ready for alpine pursuits. Zonal Koroyd® and MIPS® impact protection absorb energy in the event of a fall. A Smith custom BOA® 360 Fit System offers a micro-adjustable fit that also collapses into the helmet for easy stuffing into your pack. External bungee loops offer secure attachment to the outside of a pack, too. Integrated headlamp strap routing keeps a light in place, and a beanie and ball cap-compatible design lets you match the weather conditions. Thirty-three fixed vents keep the air moving and your goggles or glasses fog-free. Go ahead and set your sights on the summit.

PROTECTION

Hybrid shell construction blends a durable exterior with a lightweight in-molded shell for durability where you need it most

Zonal Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection

MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head

Certifications: ASTM F 2040, CE EN 1077: 2007 CLASS B, EN 12492

FIT

Custom Smith x BOA® Fit System folds into helmet for easy packability

Ionic+™ antimicrobial lining offers sweat-activated odor control

AirEvac™ ventilation system integrates with Smith goggles for fog-free lenses

INTEGRATION

Designed for ultimate integration with Smith

goggles for maximum comfort and venting

Mips Koroyd

Code

Low profile with zonal **Koroyd®** construction

cod. **E00538**

It's the little things that make a difference. Fresh snow, a day off, and a helmet that prioritizes comfort and style right along with crash protection. The Smith Code ski and snowboard helmet does it all. Zonal Koroyd® and MIPS® impact protection absorb energy in the event of a crash. The super-adjustable BOA® 360 Fit System and a warm, knit liner let you customize the fit for comfort that lasts from first chair to last. Six engineered vents work with your goggles for fog-free vision, and a magnetic chinstrap buckle makes for easy one-hand operation. Not to mention it's nice and light, too. The little things add up.

PROTECTION

Lightweight in-mold construction fuses the exterior shell and EPS foam for a one-piece design that's lightweight and durable
Zonal Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection
MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head

JUNIORS

ChromaPop™

Grom

Junior series

cod. E00666

Amplify your young shredder's view of the mountain. The Smith Grom goggles share the same color- and contrast-boosting ChromaPop™ lens tech as our adult goggles, so kids get a clear read on every wind lip, landing, and tree glade. Add distortion-free clarity and impact resistance, and you have the goggle to fuel the fire for keeping it creative on the mountain. They are over-the-glass compatible with a pressure-free fit that feels good all day.

VISION

Available with ChromaPop™ lens: ChromaPop™ enhances contrast and natural color to make the details pop
Spherical Carbonic-x lens for distortion-free optics and impact resistance
Fog-X anti-fog inner lens for fog-free performance
TLT lens technology for crystal clear vision

FIT

Youth fit medium
Dual-slide strap for easy size adjustment
Two-layer DriWix face foam wicks moisture for a fog-free fit

INTEGRATION

Designed for ultimate integration with Smith helmets for maximum comfort, venting and fog-free performance
Designed to fit over your glasses (OTG)
Floating foam membrane eliminates eyeglass temple pressure
Silicone-backed strap stays put

Scout Jr.

Tough for all-season use

cod. E00637

Bombshell durability. Check. MIPS® multi-directional impact protection. Check. The Smith Scout Jr. ski and snowboard helmet blends everyday hardshell durability with the latest impact absorbing tech so young skiers and riders can focus on progression in the park or anywhere on the hill. Because no two kids are the same, the fit adapts to different head shapes. Pull the ear pads come spring or add a beanie on the coldest storm days. No matter the weather, eight fixed vents keep the air flowing for fog-free goggles and climate-controlled comfort. Certified for snow and bike wear, the Scout Jr. is the only helmet a kid needs.

PROTECTION

Advanced ABS construction for increased impact protection and all-around durability
MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head

FIT

Self-adjusting lifestyle fit system flexes to match your head shape for maximum comfort
Removable bombshell ear pads for form-fitting comfort and audio-compatible
Beanie compatible

INTEGRATION

Designed for ultimate integration with Smith goggles for maximum comfort and venting
AirEvac™ ventilation system integrates with Smith goggles for fog-free lenses
Eight fixed vents for consistent airflow
Removable goggle strap lock for streamlined shell when goggles are worn under helmet

INCLUDED

WEIGHT (SIZE YM): 16 OZ / 450 GRAMS

Holt Jr.

Tough for all-season use

cod. E00682

A quiver of one. The Holt Jr. helmet serves up four-season certification, so your young sports junkie can reach for one helmet for coverage from terrain park to skate park or backcountry kicker. Smith's bombshell construction means it holds up to the hard knocks of living the life. Plenty of vents keep the air flowing and their goggles fog-free. An adjustable dial provides just the right fit for the season. Add the audio of your choice for inspired sessions, or pull the ear pads for room to breathe during the summer season.

PROTECTION

Advanced ABS construction for increased impact protection and all-around durability
Dual certification all-season use

FIT

Adjustable dial fit for easy, on-the-go size adjustment
Plush, fuzzy lining adds warmth and comfort
Bombshell ear pads for form-fitting comfort

INTEGRATION

Designed for ultimate integration with Smith goggles for maximum comfort and venting
AirEvac™ ventilation system integrates with Smith goggles for fog-free lenses
14 fixed vents for consistent airflow

Mips

Glide Jr.

Lightweight and cozy

MIPS: **cod. E00525**

Standard: **cod. E00526**

The Smith Glide Jr. helmet offers the widest youth size range of any model in our line. Its lightweight design includes the advanced impact protection of MIPS®.

An intuitive dial control adjusts fit, and a super-soft liner adds warmth. Fixed vents keep air the flowing for fog-free goggles.

PROTECTION

Lightweight in-mold construction fuses the exterior shell and EPS foam for a one-piece design that's lightweight and durable
MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head

Select colorways offered without MIPS® system

Experience *ChromaPop*[™]

AS NATURE INTENDED.

ChromaPop[™] lens technology amplifies natural color and enhances definition.

How *ChromaPop*[™] Works

WITHOUT CHROMAPOP[™]WITH CHROMAPOP[™]

WHEN YOU SEE MORE, YOU CAN DO MORE.

Charge harder, faster, and longer with the amplified detail and enhanced natural color of *ChromaPop*[™]. Through our proprietary *ChromaPop*[™] lens technology, we help you see detail and color beyond normal capabilities. *ChromaPop*[™] filters two specific wavelengths of light that cause color confusion. By doing this the lens delivers greater definition, more natural color, and unmatched clarity to allow you to see more detail.

NORMALLY

The eye's retina has trouble perceiving the difference between blue and green, and red and green light.

WITH CHROMAPOP[™]

ChromaPop[™] filters these specific crossovers, allowing greater definition, natural color, and clarity.

Which *ChromaPop*[™] lens is right for you?

DO MORE WITH LESS.

ChromaPop[™] Snow lenses do more work. With just one *ChromaPop*[™] lens you experience enhanced definition and clarity across a greater range of conditions than with traditional lenses.

CHROMAPOP[™] SUN

Perfect for cloudless, blazing light conditions, these lenses ease the harsh glare of high elevation sun while helping your eyes see more information in the terrain ahead of you.

CHROMAPOP[™] EVERYDAY

Suited for a range of conditions, enhances every undulation of snow so you get more out of every moment.

CHROMAPOP[™] STORM

Tuned to bring the most out of an environment when the storm moves in and the lights go out. Optimize contrast even on the worst days, so you can stay out longer.

VLT - VISUAL LIGHT TRANSMISSION

The VLT rating on Smith lenses shows how much light passes through them. The higher the VLT rating, the more light comes through that lens. Lower VLT rated lenses are good for bright, sunny days, whereas higher rated lenses are best in cloudy or low light situations.

VLT: 0%

No light passes through

VLT: 100%

All light passes through

PHOTOCHROMIC

These lenses feature UV sensitive, self-tint-adjusting photochromic technology to bring you lenses that adapt to changing light conditions, so you always have the perfect tint for the amount of light.

Adapt with *MAG*

CHANGE IS EASY.

MAG technology allows you to quickly
adapt for any condition.

Smith *MAG*

Smith *MAG* proprietary technology enables you to quickly adapt to varying light conditions with the confidence of lens security. The next generation of Smith interchangeability has arrived.

DUAL LOCKING MECHANISMS

Once in position, the lens carrier provides a patent-pending dual locking mechanical engagement to secure the lens. With the Smith *MAG*'s two locking mechanisms, the lens stays locked tight for whatever the hill throws at you. A simple push of one lever at either side of the lens releases the lens for easy swapping as the light and conditions change.

MAGNETIC CONTACT POINTS

Strong and weatherproof N52 magnets automatically guide the lens into the anchored position. The magnetic function speeds up lens changes to get you back out riding faster.

CONSIDERED DESIGN

Plastic grips are carefully considered and designed at the corners of the lens for easy interchangeability while protecting the surface of the lens.

Inner Strength.

PROTECTED BY KORROYD®

Koroyd® absorbs more kinetic energy on impact than traditional protection materials.

Smith innovation featuring Koroyd®

FINALLY, PROTECTION AS PROGRESSIVE AS YOU ARE.

Koroyd® provides superior impact absorption, design flexibility, and ventilation when compared to materials traditionally used in helmet construction. By utilizing crumple-zone cylinders that crush uniformly on impact, Koroyd® manages energy more efficiently with less volume than any other protection material on the market.

Unlike traditional protection materials, Koroyd® cylinders absorb and convert more kinetic energy, while increasing airflow and reducing overall weight. Not all helmets are created equal.

Developed as an energy absorber in the aerospace industry, cylindrical structures were found to be one of nature's strongest forms; a form that could offer the greatest impact absorption for a given length. Koroyd® utilizes cylinders to create a structure that behaves differently than traditional protection materials. Traditional materials act like a spring which stores energy and then releases it, Koroyd® is a true energy absorber which converts the kinetic energy by crumpling. This translates into better absorption of impact energy.

ENGINEERED ABSORPTION

The combination of Koroyd's® precise and unique thermal welding process leads to a structure with both extremely efficient and consistent energy absorption properties. Upon impact, the cores crush in a completely controlled manner, decelerating the energy from the impact and reducing the final trauma levels.

ENGINEERED PROTECTION

Thousands of co-polymer extruded tubes, thermally welded to create an unparalleled consistent and fully engineered core. Each Koroyd® section is engineered to precise durometer, size, and thickness specifications to provide the greatest impact resistance.

FULL BREATHABILITY

Koroyd® is an energy absorber which is fully breathable and doesn't compromise impact performance. Koroyd's® open cell construction allows cool air in, while expelling hot air from the rider's head. The completely open cell construction integrates with internal channels providing well ventilated protection.

MIPS® technology

MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

In a helmet with MIPS® Brain Protection System (BPS) the shell and the liner are separated by a Low Friction Layer. When a helmet with MIPS® Brain Protection System is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS® BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both affects the brain and increases the risk for minor and severe brain injuries. MIPS® BPS has been scientifically proven to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain.

THE GREAT MISCONCEPTION

Accident statistics show that many injuries occur due to angled impact to the head. However, in standard helmet tests the helmet is dropped vertically onto a flat surface. The results are helpful for measuring precise vertical impacts, but inferior for measuring the more realistic scenario of an angled impact. MIPS® has been developed for reality and increases protection against angled impacts.

MIPS® IN ACTION

When you fall to the ground at an angle rotational forces are generated. A helmet integrating MIPS® technology creates a sliding layer between the outer shell and the head. This allows the helmet's outer shell to slide relative to the head when hitting the ground, so the rotational force is decreased, reducing the potential to damage your brain.

HOW HELMETS ARE TESTED TODAY

HOW YOU ARE MORE LIKELY TO FALL

STRAIN LEVELS

Simulated deformation of the brain from angled impact when the user is wearing a helmet with and without MIPS®.

Ultimate Integration

At Smith, we design helmets and goggles to work together as a fully integrated system. For the helmet line, the most important factor in integration is the *AirEvac™* ventilation system. This is the bridge that allows goggles and helmets to function as one system, venting warm, moist air away from the goggles, through the helmet climate control system and ultimately away from the head.

INTEGRATION BEGINS WITH A PRECISE FIT

Ultimate integration starts with the precise fit of the Smith goggle and helmet. Our helmets are designed to match the curvature of the goggle frame, eliminating “gaper gap” and allowing precise alignment between the helmet *AirEvac™* and the goggle venting systems.

AIREVAC: MAXIMUM AIRFLOW IS CRUCIAL

Goggles fog when standard helmets trap warm, moist air in the goggle chamber. Smith's *AirEvac™* ventilation systems generate maximum airflow that pulls warm, fog-causing air out of the goggle. The warm air is allowed to exhaust out of the top of the goggle and begin its path through the helmet's *AirEvac™* system.

REAR EXHAUST VENTILATION

The warm air that originally built up in the goggle has been forced out via the *AirEvac™* ventilation system, has traveled through the *AirEvac™* EPS vent channels, and is now being exhausted at the furthest distance possible from the goggle. Ultimate integration between goggle and helmet from start to finish.

How to choose the right goggle.

Ventilation and Construction

HYBRID SHELL CONSTRUCTION: *Lightweight and low profile*

Smith's hybrid shell construction combines separate lightweight and durable shells to create an entirely new helmet category. By fusing our tough bombshell ABS construction with flyweight in-mold technology, our hybrid shell construction optimizes the favorable traits of each material in this revolutionary process. The result is a modern design that provides a lightweight, low profile, perfectly fitting helmet. hybrid shell construction also creates a clean, smooth top surface by enabling the low profile Regulator to function with reduced mass and volume.

IN-MOLD SHELL CONSTRUCTION: *Lightweight and low profile*

The performance standard for many years, in-mold construction creates a PC shell helmet with an EPS liner to maximize weight reduction. Lightweight, comfortable and offering value for every ounce, in-mold construction is the flyweight winner.

BOMBSHELL CONSTRUCTION: *Tough for all-season use*

Bombshell construction uses an injection molded ABS shell to withstand high-impacts and offer unparalleled durability, dent, and ding resistance. If you expect your helmet to be as tough as your truck, bombshell delivers.

IN-MOLD MATERIAL

BOMBSHELL MATERIAL

DUAL REGULATOR ADJUSTABLE VENTILATION

Temperature control is the most important feature when considering how to enjoy the entire day on the hill. Our Dual Regulator ventilation system independently controls the front and rear sections of the helmet's venting, allowing you to moderate your body temperature even in extremely cold conditions. By exhausting heat through the rear vents while maintaining a sealed front end, your body can effectively cool down if needed and avoid the dreaded "ice cream headache."

SINGLE REGULATOR ADJUSTABLE VENTILATION

Adjustable, easy to use and extremely effective climate control, our low profile Regulator ventilation system allows you to modify the amount of airflow and heat exhaust even with a gloved hand.

AIRFLOW VENTILATION

Airflow ventilation utilizes strategically placed vents for easy climate control in all conditions. Vent placement maximizes airflow and heat exhaustion in warm temperatures while minimizing undesired cold air drafts. Fabric flaps in the lining design on certain models allow you to open and close the airflow vents for adjustable comfort.

SMITH | ALECK 006

Mountain Electronics

Music adds to the thrill of your mountain experience and sometimes, making the first powder day of the year means taking a work call on the lift. Either way, rely on Smith's audio program powered by Aleck®. From basic direct-line and bass-thumping audio to advanced iPhone® and Android® compatible features, we've got you covered.

DROP-IN AUDIO PROGRAM

By integrating universally compatible ear pads with super-thin, bass-thumping drivers, our Drop-In audio program for all adult helmets makes fumbling through lengthy instruction manuals a thing of the past. You are no longer bound to basic black helmets or forced to worry about which parts fit with which helmet.

Both the Aleck 006® Wireless and Wired headphones are equipped with full range, 40mm drivers set solidly in the squircle shaped casing. This housing, coupled with a fully customizable audio EQ (via the Aleck GO!® app), allows for epic in-helmet acoustics, creating the best Hi-Fi experience in the business. What's more, the Aleck GO!® app for iOS® and Android® means your friends and family are just a tap away with our one-touch, walkie-talkie system. Lost a group member on the mountain? No problem. GPS gives you the peace of mind of knowing exactly where your friends and family are. All tested to work perfectly at -20°C/-4F, with IPX-4 sweat & water resistance.

ALECK 006® | WIRELESS *cod. 1701230AC0000*

The Aleck 006® Wireless is the universal helmet audio + walkie-talkie, preferred by Smith. Connect them to your Bluetooth® enabled device, drop them into your audio compatible helmet and enjoy 10 hours of continuous playtime. Loaded with full audio & volume controls, phone call capability, the power of voice command (Siri® & Google Assistant®) and a one-touch, push-to-talk walkie-talkie. Do it all while keeping your mittens where they belong ... waving in the air, like you just don't care. Imagine it: warm hands, fresh powder, total audio and communication control, and no wires inside your jacket. No more fear of dropping your phone on a lift.

ALECK 006® | WIRED *cod. 1701220AC0000*

The Aleck 006® Wired is also loaded with a glove-friendly, on-device button for audio control. Siri® & Google Assistant® provide for volume control and a built-in microphone means you can answer your next call without removing your helmet or your gloves. The Aleck 006® Wired effortlessly provides unsurpassed, helmet-filling music from your audio device. It's everything you need to have a great time on the hill.

Displays

HERO CABINET

Cod. 8202JF

- Optional glass doors for security
 - Led lighting for bright display
 - Adjustable, led underlit shelving
 - Optional lcd monitor
 - Includes wheels for easy moveability
- 19.5" D x 27.5" W x 77" H

UNIVERSAL SHELVES

COUNTERTOP AND STORAGE BASE

Cod. 820188 & 820189

- Includes lockable glass door
 - Two adjustable shelves
 - Lockable storage base with three shelves
 - Rubber feet to protect floors
- 76.27" H x 15.75" W x 16.75" D

HELMET & GOGGLE CAPACITY

Cod. 8201K0 & 8201K1

- Displays 30 helmets or 60 goggles
 - Helmet or goggle holders ordered separately
 - Includes wheels for easy moveability
- 76.24" H x 29" W x 27" D

HELMET & GOGGLE TOWER

Cod. 82018B & 8201NM

- Displays 10 helmets or 20 goggles
 - Helmet or goggle holders ordered separately
 - Rubber feet to protect floors

Cross Merchandising

GOOGLE AND HELMET MODELS/COLORWAYS

Smith goggles and helmets are designed with the integration of style in mind. Properly merchandising Smith helmets and goggles to show this relationship will draw customers to your Smith wall like moths to a lamp. Below are a few examples of how to help your presentation and tell the Smith product line color and graphic stories so your patrons get the most out of their shopping experience. These are just a few ideas to get you started, so be creative and maximize your opportunities with your Smith Optics program.

Weight 16 oz / 450 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B

**MISSION**

Sizing (Dial fit system DFS2)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm XL: 63-67 cm
Weight 16 oz / 450 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B, CPSC, CE EN 1078

**MIRAGE**

Sizing (Dial fit system DFS2)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm
Weight 16 oz / 450 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B, CPSC, CE EN 1078

**SURVEY**

Sizing (VaporFit™ fit system)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm XL: 63-67 cm
Weight 19 oz / 550 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B

**SUMMIT**

Sizing (Custom Boa® fit system)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm XL: 63-67 cm
Weight 16 oz / 400 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B, EN12492

**CODE**

Sizing (Boa® 360 fit system)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm XL: 63-67 cm
Weight 16 oz / 450 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B

**MAZE**

Sizing (Lifestyle fit system)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm XL: 63-67 cm
Weight 12 oz / 350 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B

**ALLURE**

Sizing (Lifestyle fit system)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm
Weight 12 oz / 350 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B

**SCOUT**

Sizing (Lifestyle fit system)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm XL: 63-67 cm
Weight 16 oz / 450 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B

**HOLT**

Sizing (Lifestyle fit system)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm XL: 63-67 cm
Weight 19 oz / 550 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B, CPSC, CE EN 1078

**HOLT RENTAL 2**

Sizing (Lifestyle fit system)
S: 51-55 cm M: 55-59 cm
L: 59-63 cm XL: 63-67 cm
Weight 19 oz / 550 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B, CPSC, CE EN 1078

JUNIOR HELMETS

**ICON JR.**

Sizing
YS: 48-53 cm YM: 53-58 cm
Weight 25 oz / 700 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B, FIS RH 2013

**COUNTER JR.**

Sizing (Dial fit system DFS2)
YS / YM: 48-56 cm
Weight 16 oz / 450 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B, FIS RH 2013

**PROSPECT JR.**

Sizing (Dial fit system DFS2)
YS / YM: 48-56 cm
Weight 16 oz / 450 grams
Certification
ASTM F 2040, CE EN 1077:2007
CLASS B, CPSC, CE EN 1078

**SURVEY JR.**

Sizing
YS: 48-53 cm YM: 53-58 cm
Weight 25 oz / 700 grams
Certification
ASTM F 2040, CE EN 1077:
2007 CLASS B

**SCOUT JR.**

Sizing (Lifestyle fit system)
YS: 48-53 cm YM: 53-58 cm
Weight 17.5 oz / 500 grams
Certification
