Smith innovation featuring *Koroyd*[®]

FINALLY, PROTECTION AS PROGRESSIVE AS YOU ARE.

Koroyd[®] provides superior impact absorption, design flexibility, and ventilation when compared to materials traditionally used in helmet construction. By utilizing crumple-zone cylinders that crush uniformly on impact, Koroyd[®] manages energy more efficiently with less volume than any other protection material on the market.

Unlike traditional protection materials, Koroyd[®] cylinders absorb and convert more kinetic energy, while increasing airflow and reducing overall weight. Not all helmets are created equal.

Developed as an energy absorber in the aerospace industry, cylindrical structures were found to be one of nature’s strongest forms; a form that could offer the greatest impact absorption for a given length. Koroyd[®] utilizes cylinders to create a structure that behaves differently than traditional protection materials. Traditional materials act like a spring which stores energy and then releases it, Koroyd[®] is a true energy absorber which converts the kinetic energy by crumpling. This translates into better absorption of impact energy.

**THE ULTIMATE
DAMAGE CONTROL SYSTEM**

Koroyd’s[®] welded tubes crumple instantly and consistently on impact, absorbing maximum force in a controlled manner, minimizing energy transferred to your head.

**DIRECT & ANGLED
IMPACT PROTECTION**

This unique behavior helps to protect your skull and brain from direct and angled impacts which may reduce the risk of suffering a life-changing injury.

**ADVANCED
BREATHABILITY & COOLING**

Air flows consistently through the open-cells, whilst hot air from your head can easily escape, ensuring more efficient cooling in the most intense conditions.

**PROTECTION NEVER
FELT SO LIGHT**

Koroyd[®] features the world’s thinnest walled tubes, resulting in a structure which is 95% air. This reduces weight and enhances comfort without compromising on safety.

Inner Strength.

PROTECTED BY KORoyD[®]

Koroyd[®] absorbs more kinetic energy on impact than traditional protection materials.

How *ChromaPop*[™] Works

Experience *ChromaPop*[™]
AS NATURE INTENDED.

ChromaPop[™] lens technology amplifies natural color and enhances definition.

WITHOUT CHROMAPOP[™]

WITH CHROMAPOP[™]

WHEN YOU SEE MORE, YOU CAN DO MORE.

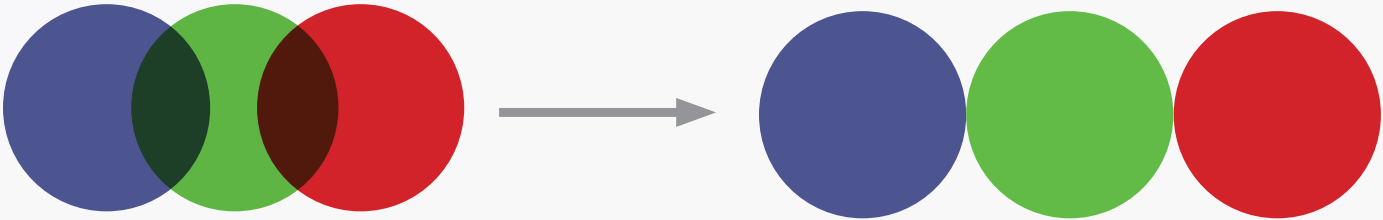

Charge harder, faster, and longer with the amplified detail and enhanced natural color of *ChromaPop*[™]. Through our proprietary *ChromaPop*[™] lens technology, we help you see detail and color beyond normal capabilities. *ChromaPop*[™] filters two specific wavelengths of light that cause color confusion. By doing this the lens delivers greater definition, more natural color, and unmatched clarity to allow you to see more detail.

NORMALLY

The eye's retina has trouble perceiving the difference between blue and green, and red and green light.

WITH CHROMAPOP[™]

ChromaPop[™] filters these specific crossovers, allowing greater definition, natural color, and clarity.

Adapt with *MAG*

CHANGE IS EASY.

MAG technology allows you to quickly adapt for any condition.

© Smith Sport Optics Inc. 2023

1.

Smith *MAG* Family

Environments can change in an instant, so having options for performance in any condition is key. Smith MAG technology gives you the possibility of having an advantage. Whether it's fast lens swapping options on both the Attack MAG MTB and the Shift MAG, or the light-blocking performance temples, the advantages of MAG technology make change easy for any adventure.

White 3K0
MIPS® only

Matte Stone / Moss 0XL
MIPS® only

Sustain your speed when every second counts. Our top-performing time-trial helmet, the Smith Jetstream TT has a lightweight aerodynamic design ideal for race day. Zonal Koroyd® and MIPS® come together to provide energy-absorbing impact protection so you have full confidence as you maintain your momentum through the toughest sections of the course. A magnetic visor makes it easy to switch between a color-enhancing ChromaPop™ lens or a clear option. Five strategically placed vents help keep you cool without adding drag so you can put all your focus into securing your place on the podium.

PROTECTION

Zonal Koroyd® coverage for lightweight energy-absorbing and ventilated impact protection

MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head

FIT / INTEGRATION

- VaporFit™ dial adjustment system offers 270-degree fit adjustment with the turn of a dial
- Low-profile Y-strap divider provides a secure fit to reduce wind noise and aerodynamic drag
- Five strategically placed vents for optimal airflow
- Ionic+® antimicrobial lining offers sweat-activated odor control
- Lightweight, low-bulk single layer webbing
- Premium Smith helmet case

VISION

- Magnetic visor with option of ChromaPop™ or clear lenses
- ChromaPop™ lenses enhance contrast and natural color to make the details pop
- One ChromaPop™ lens and one clear lens

SIZING: SMALL 51-55 CM • MEDIUM 55-59 CM • LARGE 59-62 CM	VAPORFIT™ SYSTEM	CERTIFICATION: CPSC, CE EN 1078
WEIGHT: (SIZE M, MIPS®) 14 OZ/410 GRAMS		

Every Second Counts

SUPERIOR AERODYNAMICS AND PROTECTION DESIGNED FOR RACEDAY

AERODYNAMIC WIND TUNNEL DATA

No one questions wind tunnel data and we are not about to start. However, the science does require expertise. Through a partnership with the University of Washington wind tunnel and world-renowned aerodynamicist Len Brownlie, we tested the Jetstream TT helmet against the current best-in-class helmets using the Wind Averaged Drag (WAD) methodology. This Methodology was developed for the automobile industry decades ago but at Brownlie’s direction, has been modified for cycling-specific tests.

To make it as simple as possible for athletes and consumers to understand, the WAD method aggregates the drag measurements from several discrete yaw angles into a single “wind averaged” measure of drag. This provides final estimated time savings for 40k and 180k time trials.

			TIME DIFFERENCE		
			40KM TT @ 330W (30MPH)	180KM @ 250W (27MPH)	
TIME TRIAL	HELMET MODEL	DRAG @ 30 MPH AND 0 YAW (% INCREASE FROM 0)	WIND AVERAGED DRAG @ 30 MPH (% INCREASE FROM 0)	0 (baseline)	0 (baseline)
	Jetstream TT	0 (baseline)	0 (baseline)	0 (baseline)	0 (baseline)
	Aerohead	+ 2%	+ .2%	+1 sec	+24 sec
	Bambino	+ 12%	+ 7%	+18 sec	+86 sec
	S-Works TT	+ 13%	+ 7%	+17 sec	+67 sec
	AR07	+ 19%	+ 13%	+31 sec	+117 sec
	Mistral	+ 17%	+ 13%	+32 sec	+91 sec

RESULTS

Whether you’re talented enough to hold an elite level pace of 32 mph for 40K, or if 25mph for 40K is more in reach, you’ll appreciate the best-in-class aerodynamics of the Jetstream TT. Regardless of pace, all riders will benefit from the progressive protection of *Koroyd®* and the amplified color and enhanced definition of the *ChromaPop™* shield.

For Jetstream testing, at 30mph and 0 yaw, 95% Confidence Interval is +/- 4 g (+/-0.99%). Jetstream data was collected at a later date with a time trial-specific aerodynamic rider model and may not be compared directly to that of Ignite and Trace.

Ignite

Aerodynamic road helmet featuring **Koroyd®**
cod. **E00735**

Make sure you're all in on race day when you buckle up in the Smith Ignite race helmet. Its aerodynamic shape, energy-absorbing Koroyd® impact protection, and MIPS® liner system give you the confidence and advantage you'll need to attack with speed and catch the breakaway. Fully integrated eyewear storage allows you to pull on your shades fumble-free, so you never miss an opening.

PROTECTION

Zonal Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection
MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head

FIT /INTEGRATION

It's time for reflection.

THE VIZ COLLECTION FROM SMITH.

Incorporating premium reflective elements with progressive styling. Daytime riders can take confidence in a proven & road-ready Neon Yellow colorway highly visible from all directions. At night – the Viz collection transforms into an 360 degree halo of reflectivity illuminating the shell and retention systems.

Trace

Performance road helmet featuring **Koroyd®**
cod. **E00728**

Long winding descents and race-day lead-outs, the Smith Trace is all about versatility. Road, gravel or bikepacking, this bike helmet pairs complete Koroyd® with MIPS® for protection you can trust if the route gets hairy. And when the day heats up, you'll stay cool thanks to internal air channels with intake and exhaust ports that keep the air flowing. Side channels let you securely stash your sunglasses when you don't need them, and when you do, our AirEvac™ ventilation system prevents them from fogging up.

PROTECTION

Network

Versatile style and performance featuring **Koroyd®**
cod. E00732

You've always been drawn to the challenge of a new route, a new trail, the thrill of the unexpected. Designed for whatever you get into on two wheels, the Smith Network is our versatile, shred-ready bike helmet. Safety techs like **Koroyd®** and **MIPS®** offer protection and enhanced energy absorption should you need it. When the sun is blazing and you're heating up, the ventilation system keeps air flowing and your eyewear fog-free. Later, when the light dips beneath the hills, store your shades in pass-through channels on the front.

Persist

Classic bike helmet for the everyday rider
cod. E00756

Fast-paced lunch ride or weekend 60-miler, the Smith Persist road helmet is down for whatever you’ve got in mind. Designed to feel like it’s tailor-made for your head, you can fine tune the fit on the fly with an easy to use dial adjuster. When you’re sweating it out on the climb, 21 fixed vents and our *AirEvac™* ventilation system keep the air flowing, your head cool and your glasses from fogging. Energy absorbing zonal *Koroyd®* complements *MIPS®* Brain Protection System to reduce impact forces in the event of a crash and for the confidence to tuck every descent.

Signal

Classic bike helmet for the everyday rider
cod. E00740

Made for great days on the bike and the daily commute alike, the Smith Signal helmet gives you the protection you need no matter where your wheels take you. MIPS® brain protection system helps reduce angled impact forces in the event of a crash, and an adjustable dial on back lets you fine-tune a secure fit. Strategic venting keeps the air flowing, your glasses fog-free, and your head cool. And whether you're grabbing a coffee or walking into the office, engineered eyewear channels make for convenient hands-free glasses storage.

MOUNTAIN COLLECTION

Mainline

DH certified, full face enduro helmet featuring **Koroyd®**
cod. E00742

Give credit where credit's due. Thank your mom, your legs, and your gear for giving you the opportunity to land that rocky gap. Made for going big, going fast, or both, the Smith Mainline is our pinnacle, downhill certified enduro bike helmet. Safety innovations like Koroyd® and MIPS® provide energy-absorbing impact protection so you have the confidence to get aggressive on the trail. It doesn't matter if you're slaying the EWS in Whistler or suffering through the last stage of your local enduro race, you need a breathable, lightweight helmet that pairs well with goggles and fits like a glove. The Mainline integrates with your bike goggles for efficient venting and fog-free vision. Multiple pad sets including liners and neck-rolls let you customize the fit.

PROTECTION

Complete Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection

MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head

FIT / INTEGRATION

Three washable cheek pad kits, two crown liners and two neck rolls let you fine tune the fit

D-ring chin strap fastener for a snug fit

Designed for ultimate integration with Smith performance goggles or maximum comfort, venting and storage convenience

AirEvac™ ventilation system integrates with Smith goggles for fog-free lenses

Session

High performance, trail helmet with **Aerocore™** construction featuring **Koroyd®**
cod. E00731

You earn your ride through the climb, but you're really in it for the downhill. Our Smith Session helmet is made for the all-mountain rider that wants speed and style in one protective package. The ultralight feel and innovative protection of Koroyd® in strategic, zonal impact areas let you bomb and blaze with confidence. Generous air ports on the top work with internal air channels to provide ventilation that keeps you cool on the uphill and helps maintain your focus in descent mode. Plus, it accommodates easy goggle or eyewear storage so you can sit back and enjoy the view from the top without accidentally smashing your gear.

Convoy

Classic bike helmet for the everyday rider
cod. E00741

When designing the Smith Convoy, we set out to create a mountain bike helmet that felt like it was tailor-made for your head. When it comes to comfort and protection, this helmet ticks all the boxes. An easy to use dial adjuster lets you fine tune the fit, and a MIPS® liner system helps reduce angle impact forces in a crash. 20 fixed vents provide all the ventilation you'll need to stay cool through the hottest days on the trail. In addition to easy integration with performance eyewear, side channels let you secure your shades when dusk sets in.

cod. E00752

School, park, or neighborhood trails, kids and bikes go places. No matter where their wheels take them, the Smith Zip Jr. bike helmet delivers enhanced angle impact protection with *MIPS*® in a lightweight design that kids want to wear. A dial-adjustable system gets the fit right every time. There's a low-profile lining for extra comfort plus plenty of vents to keep the air flowing and kids cool. Just buckle 'em up and start pedaling.

PROTECTION

Lightweight in-mold construction
MIPS® Brain Protection System reduces rotational forces caused by angled impacts to the head

FIT / INTEGRATION

Adjustable dial fit system for a customized fit
Designed for ultimate integration with Smith performance eyewear for maximum comfort, venting and storage convenience
AirEvac™ ventilation system integrates with Smith eyewear for fog-free lenses
21 fixed vents for consistent airflow
Performance comfort lining
Lightweight, low-bulk single layer webbing

Mips

Wilder Jr.

cod. E00751

When your young rider is dedicated to the dirt, you need gear that keeps pace with their skill set. The Smith Wilder Jr. mountain bike helmet combines the enhanced angle impact protection of *MIPS*® with a lightweight, ventilated design just like our adult helmets. 21 fixed vents keep the air flowing as kids bomb down their favorite trails. A dial-adjustable fit system lets you get the right fit every time. There's a built-in visor to cut glare and integrated sunglasses storage, so kids can stow their glasses just like mom or dad.

NEW ChromaPop™

Rhythm MTB

Cylindrical series
cod. M00441

Whether it's race day or you're on the party lap train, clear vision can make or break the day. The race-inspired Smith Rhythm Mountain Bike Goggles set you up for maximum clarity and a wide field of view in any conditions. When it's wet and muddy, the roll-off compatible design lets you maintain full speed ahead. When the sun shines bright, *ChromaPop™* makes sure every root, rut, and landing comes through loud and clear. Low-profile outriggers make sure they fit comfortable around a full face helmet. A removable microscreen for additional dirt and debris protection as well as compatible roll-offs are sold separately.

OPEN LATTICE DESIGNED FOR MAXIMUM VENTILATION

VISION

ChromaPop™ anti-fog lenses enhance contrast and natural color to make the details pop
Cylindrical Carbonic-x anti-fog lens for clarity and impact resistance
Open ventilation paths let the air flow to eliminate fog
Select colorways available with clear lens only

INCLUDED

Extra clear lens 
Microfiber goggle bag

FIT / INTEGRATION

Designed for ultimate integration with Smith helmets for maximum comfort, venting and storage convenience
Low profile outriggers compatible with full-face MTB helmets
Three-layer DriWix face foam wicks moisture
Low nose bridge for wide field of view
Ultra-wide silicone-backed strap stays put
Medium fit
Roll-off compatible with Rhythm MTB Roll Off's Kit, sold separately
Removable micro-screen for additional dirt and debris protection, sold separately

NEW

Rhythm MTB Dirt Screen

Dry and dusty or wet and muddy, Mother Nature has a way of clouding your view. The Smith Rhythm MTB Dirt Screen adds an extra layer of dust and dirt protection to the Rhythm MTB goggles. The reusable micro-screen seals out dirt and debris while still letting air flow for a clear view of the trail ahead.

NEW

Rhythm MTB Roll Off's

Whether you're racing for the podium or simply chasing friends, clear vision gives you the upper hand. The Smith Rhythm MTB Roll Offs come set up on a clear Rhythm MTB lens and ready for action. Just pull the tab to advance the film, and it's full speed ahead with a clear line of sight. They're compatible with the Rhythm MTB goggles and include two film canisters to keep you riding.

ChromaPop™

Squad XL MTB

Cylindrical series
cod. M00842

Take a deep breath and hit the reset button. Drop in with new-found focus. Made for challenging downhills where crystal-clear vision is mandatory, the Smith Squad XL MTB goggles are the bigger version of our Squad MTB. They have a massive curved shape and come with one clear and one high-contrast *ChromaPop™* lens so you can easily see all the details of the run. Maximum ventilation and a design that integrates with our helmets make these goggles a no-brainer when high speed is on your agenda.

OPEN LATTICE DESIGNED FOR MAXIMUM VENTILATION

VISION

Bobcat

Available with **ChromaPop™**

INTERCHANGEABLE LENS

cod. 204927

135 | 59 | 130

Enduro trail riding to gravel adventure or backcountry powder mission, the Smith Bobcat sunglasses are for riders and skiers who want the full coverage of the Wildcat with a smaller fit and a lightweight feel. This hybrid design pairs goggle-like coverage with the airflow and easy-wear feel of sunglasses. **ChromaPop™** brings out the details on forested trails and in bright alpine bowls. The lens is interchangeable, and a bonus clear lens is included for low-light needs. No-slip fit details keeps them in place through rocky terrain and high-speed descents.

VISION

ChromaPop™ lenses enhance contrast and natural color to make the details pop
Light sensitive photochromic lenses adapt to changing light conditions
Interchangeable lenses

FRAME

Evolve™ bio-based frame material is lightweight and durable
AutoLock hinges hold frames open for easy one-hand on and off

MIPS technology

MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

In a helmet with *MIPS* Brain Protection System (BPS) the shell and the liner are separated by a Low Friction Layer. When a helmet with *MIPS* Brain Protection System is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The *MIPS* BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both affects the brain and increases the risk for minor and severe brain injuries. *MIPS* BPS has been scientifically proven to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain.

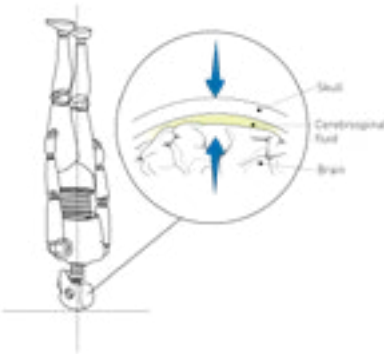

THE GREAT MISCONCEPTION

Accident statistics show that many injuries occur due to angled impact to the head. However, in standard helmet tests the helmet is dropped vertically onto a flat surface. The results are helpful for measuring precise vertical impacts, but inferior for measuring the more realistic scenario of an angled impact. *MIPS*® has been developed for reality and increases protection against angled impacts.

MIPS IN ACTION

When you fall to the ground at an angle rotational forces are generated. A helmet integrating *MIPS* technology creates a sliding layer between the outer shell and the head. This allows the helmet's outer shell to slide relative to the head when hitting the ground, so the rotational force is decreased, reducing the potential to damage your brain.

HOW HELMETS ARE TESTED TODAY

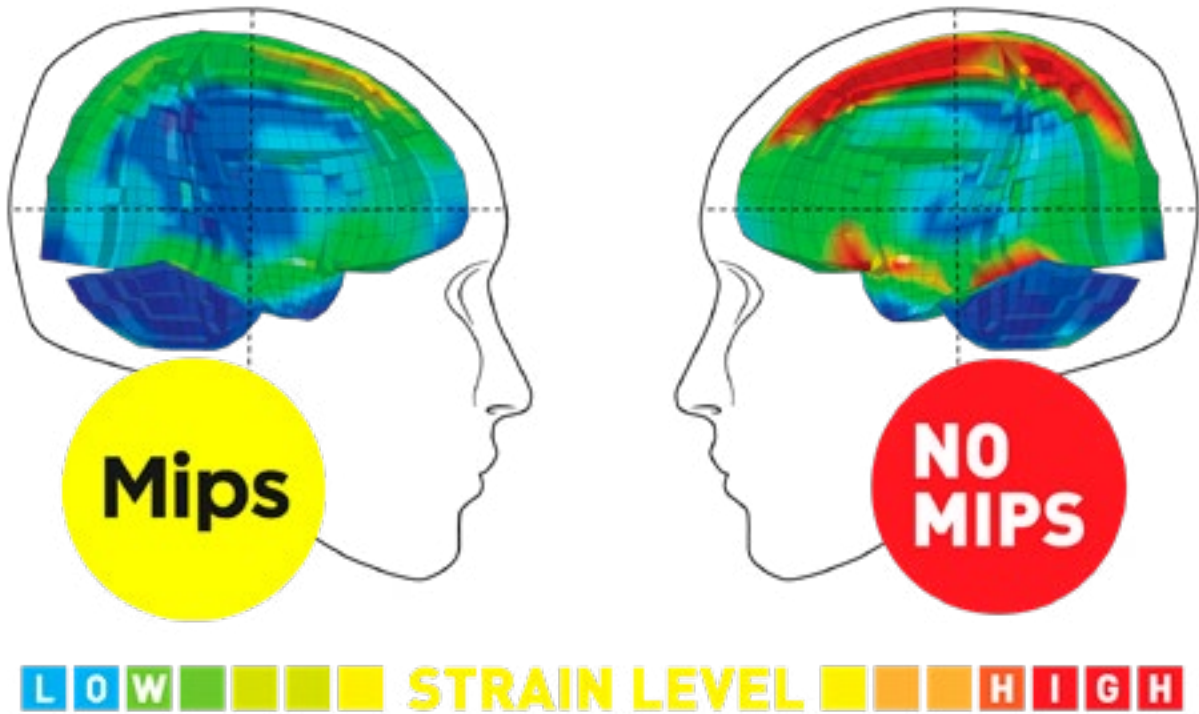

HOW YOU ARE MORE LIKELY TO FALL

STRAIN LEVELS

Simulated deformation of the brain from angled impact when the user is wearing a helmet with and without *MIPS*.

VaporFit™ ACCOMMODATES A SMALLER FIT

VaporFit™ EXPANDS TO ACCOMMODATE A LARGER FIT

VaporFit™ 360° HALO FIT SYSTEM

VAPORFIT™

Crafted with ease-of-use and superior comfort in mind, the *VaporFit*™ system relies on a tried-and-true rotary dial adjustment system integrated with a tuned elastic fit using engineered shapes. Each *VaporFit*™ system has a full 5cm of rotary adjustability. Additionally, the system can be moved up/down or forward/backward at the attachment points. The final result is increased comfort with a personalized, secure fit.

Available in the Jetstream TT, Forefront 2, Trace, Ignite, Session, Network, Engage, Persist, Convoy and Signal helmets..

LFS ACCOMMODATES A SMALLER FIT

LFS EXPANDS TO ACCOMMODATE A LARGER FIT

LIFESTYLE FIT SYSTEM (LFS)

Built around the forgiving properties of elastic, the self-adjusting Lifestyle Fit System is designed to flex around the rider's head, providing a dynamic fit that will move as you do. Additional lateral adjustability on the fit system arms allows it to accommodate a wide range of head sizes. With the Lifestyle Fit System, you'll experience comfort and mobility from a fit system that you'll never have to think about.

Available in the Maze.

Displays

Notes:

HERO DISPLAY KIT

82046A

- KIT INCLUDES:
 - GLASS DOORS
 - 3 GLASS SHELVES
 - 4 ACRYLIC RACKS
 - 12 SUNGLASS STACKERS
- 9.5"D x 27.5"W x 77"h

UNIVERSAL SHELVES COUNTERTOP

820188

- DISPLAY SITS DIRECTLY ON COUNTERTOP OR 820189 BASE
 - INCLUDES LOCKABLE GLASS DOOR
 - TWO ADJUSTABLE SHELVES
 - LOCKABLE STORAGE BASE WITH THREE SHELVES
- 76.27" H x 15.75" W x 16.75" D

28 PC DOUBLE-SIDED SPINNING COUNTERTOP

820237 & 820189

- DISPLAY SITS DIRECTLY ON COUNTERTOP OR BASE
 - INCLUDES LOCKABLE GLASS DOOR
 - LOCKABLE STORAGE BASE WITH THREE SHELVES
- 23.75"H x 15.75"W x 16.75"D

HELMET & GOGGLE TOWER

82018B & 8201NM

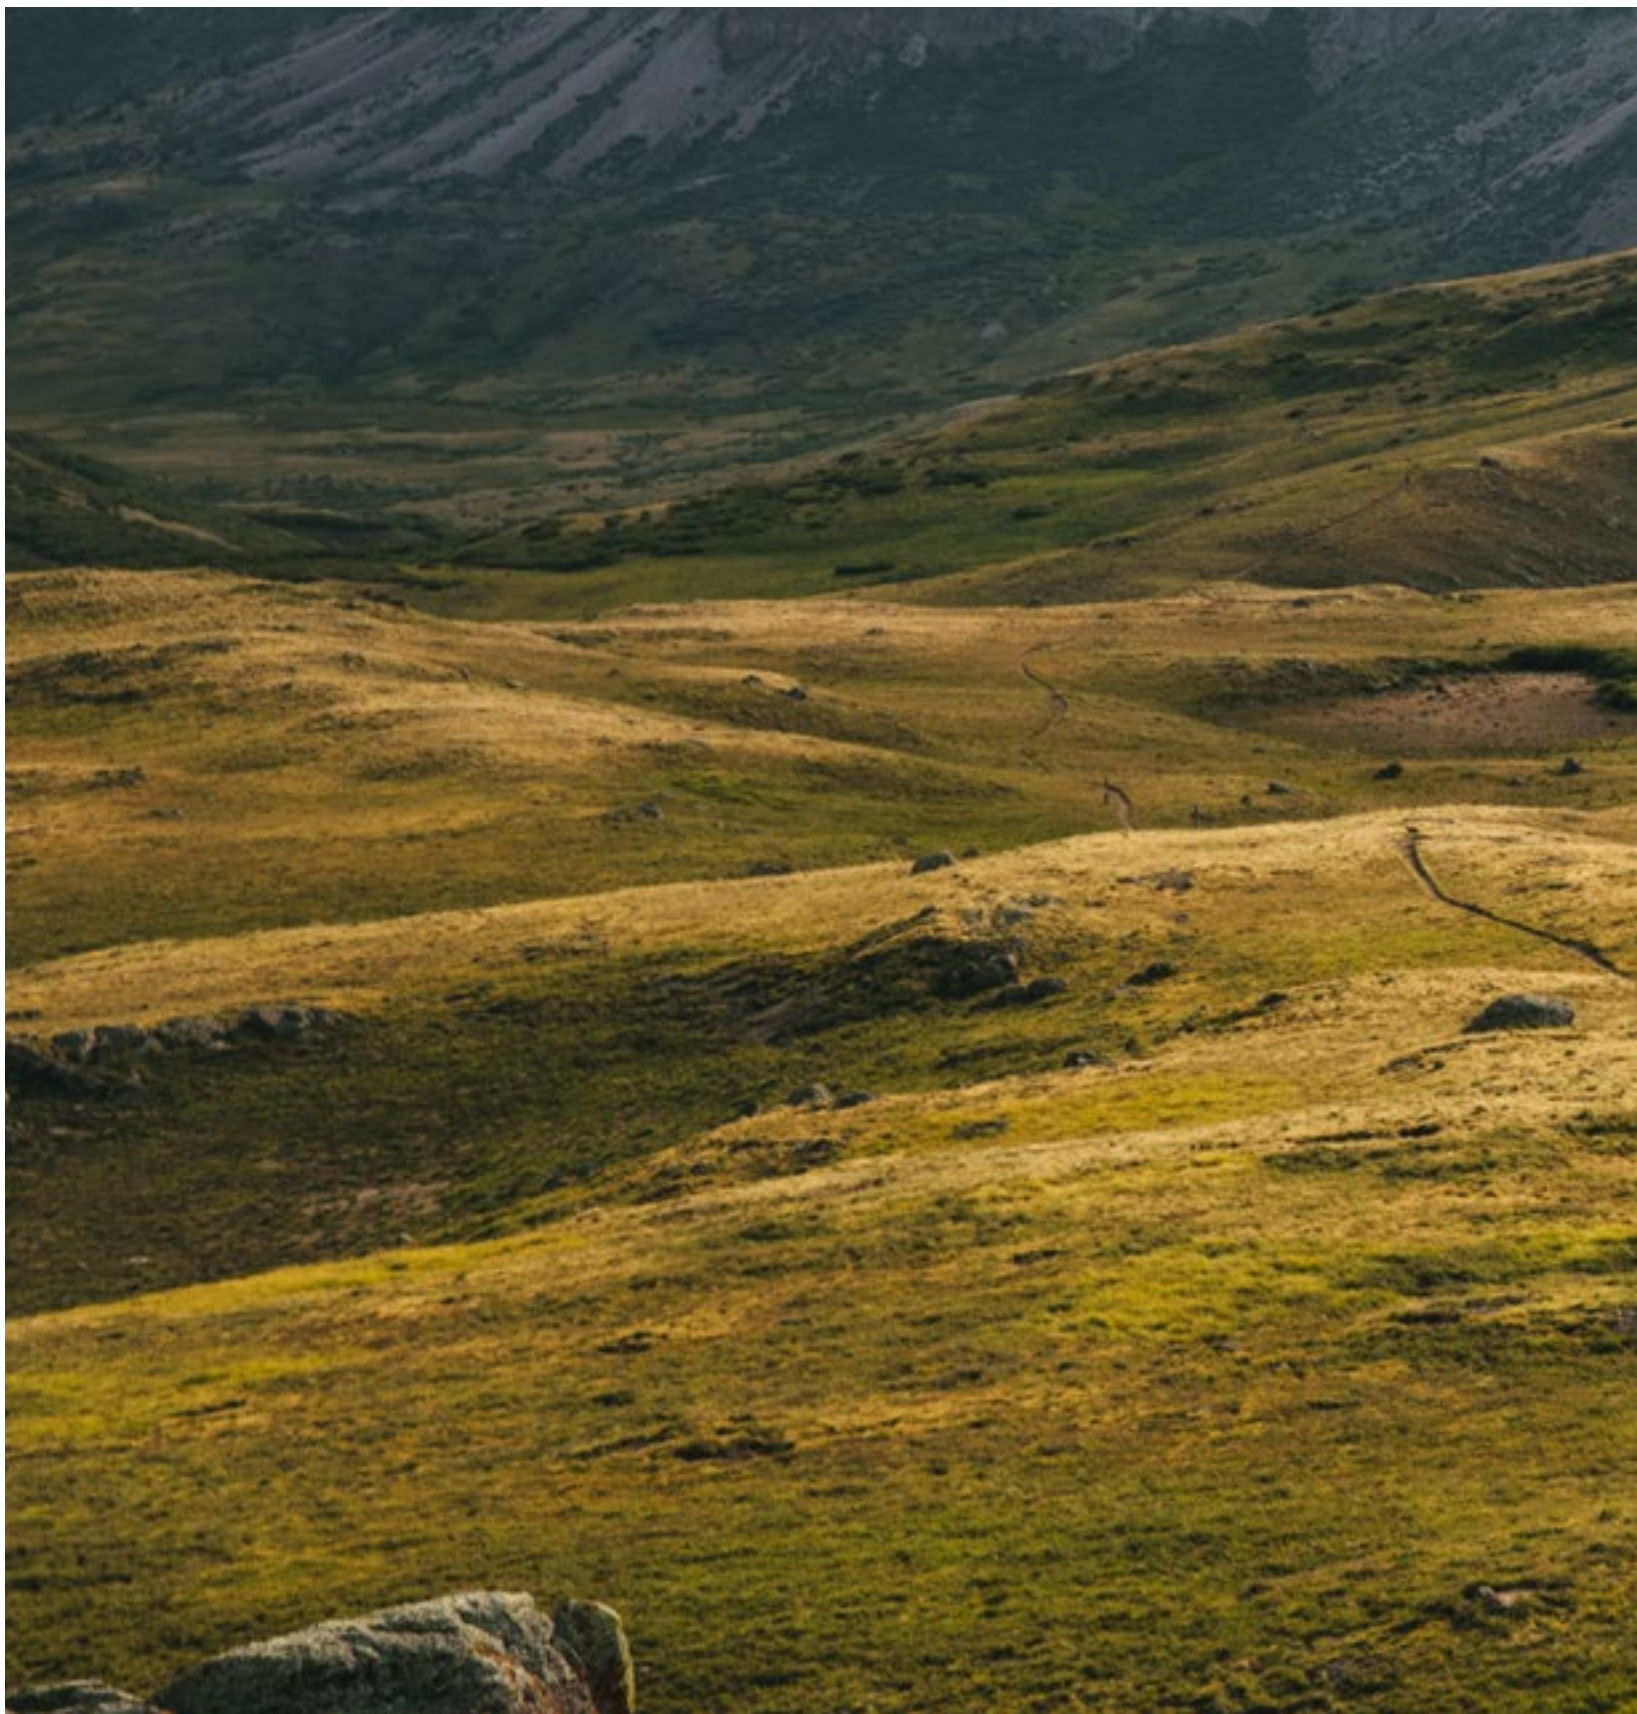

- DISPLAYS 10 HELMETS OR 20 GOGGLES
 - HELMET OR GOGGLE HOLDERS ORDERED SEPARATELY
 - RUBBER FEET TO PROTECT FLOORS
- 79" H x 14" W x 21" D

HELMET & GOGGLE CAPACITY

8201KO & 8201K1

- DISPLAYS 30 HELMETS OR 60 GOGGLES
 - HELMET OR GOGGLE HOLDERS ORDERED SEPARATELY
 - INCLUDES WHEELS FOR EASY MOVEABILITY
- 76.24" H x 29" W x 27" D
