

SMITH

A full-page photograph of a male mountain biker in mid-air, performing a jump over a dirt trail. The rider is wearing a white helmet, sunglasses, a grey t-shirt, and black shorts. He is on a black mountain bike. The background is a dense forest with tall, thin trees and green foliage. The ground is a dirt trail with some rocks and sparse vegetation.

You exist to love, learn and experience.

PURSUE YOUR THRILL.

A man wearing a white helmet, sunglasses, and a teal jacket is standing on a rocky mountain trail. He is holding a slice of pizza in his right hand and has his left hand on the handlebars of a blue mountain bike. The background shows a steep, grassy mountain slope with some rocky patches under a cloudy sky.

Vision + Protection

EYEWEAR AND HELMETS DESIGNED TO FUNCTION TOGETHER AS THE ULTIMATE SYSTEM.

EXPERIENCE **CHROMAPOP™**

When you see more, you can do more. Charge harder, faster, and longer with the amplified detail and enhanced natural color of **ChromaPop™** lens innovation.

DEMAND SMITH WITH **KOROYD®**

Finally, protection as progressive as you are. **Koroyd®** crumple-zone cylinders crush uniformly on impact, converting and absorbing more kinetic energy than traditional protection materials. Not all helmets are created equal.

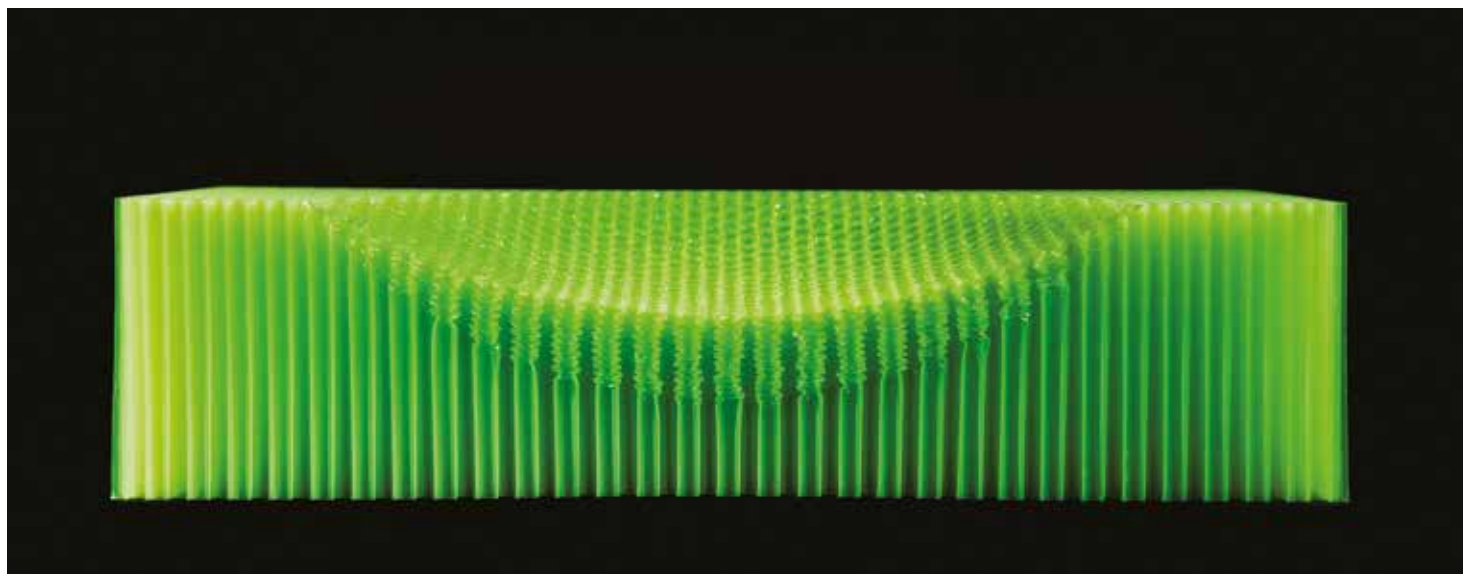

Inner Strength.

PROTECTED BY KOROYD®

Koroyd® absorbs more kinetic energy on impact than traditional protection materials.

Smith innovation featuring *Koroyd*[®]

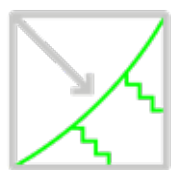

FINALLY, PROTECTION AS PROGRESSIVE AS YOU ARE.

Koroyd[®] provides superior impact absorption, design flexibility, and ventilation when compared to materials traditionally used in helmet construction. By utilizing crumple-zone cylinders that crush uniformly on impact, Koroyd[®] manages energy more efficiently with less volume than any other protection material on the market.

Unlike traditional protection materials, Koroyd[®] cylinders absorb and convert more kinetic energy, while increasing airflow and reducing overall weight. Not all helmets are created equal.

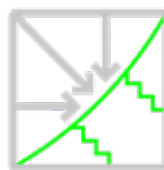

Developed as an energy absorber in the aerospace industry, cylindrical structures were found to be one of nature's strongest forms; a form that could offer the greatest impact absorption for a given length. Koroyd[®] utilizes cylinders to create a structure that behaves differently than traditional protection materials. Traditional materials act like a spring which stores energy and then releases it, Koroyd[®] is a true energy absorber which converts the kinetic energy by crumpling. This translates into better absorption of impact energy.

DIRECT IMPACT

THE ULTIMATE DAMAGE CONTROL SYSTEM

Koroyd's[®] welded tubes crumple instantly and consistently on impact, absorbing maximum force in a controlled manner, minimising energy transferred to your head.

DIRECT & ANGLED

DIRECT & ANGLED IMPACT PROTECTION

This unique behaviour helps to protect your skull and brain from direct and angled impacts which may reduce the risk of suffering a life-changing injury.

AIRFLOW

ADVANCED BREATHABILITY & COOLING

Air flows consistently through the open-cells, whilst hot air from your head can easily escape, ensuring more efficient cooling in the most intense conditions.

ULTRALIGHT

PROTECTION NEVER FELT SO LIGHT

Koroyd[®] features the world's thinnest walled tubes, resulting in a structure which is 95% air. This reduces weight and enhances comfort without compromising on safety.

Experience *ChromaPop*[™]

AS NATURE INTENDED.

ChromaPop[™] lens technology amplifies
natural color and enhances definition.

How *ChromaPop*[™] Works

WITHOUT CHROMAPOP[™]WITH CHROMAPOP[™]

WHEN YOU SEE MORE, YOU CAN DO MORE.

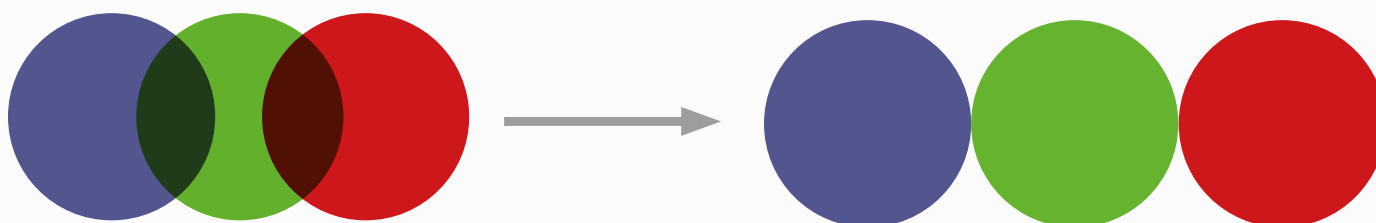

Charge harder, faster, and longer with the amplified detail and enhanced natural color of *ChromaPop*[™]. Through our proprietary *ChromaPop*[™] lens technology, we help you see detail and color beyond normal capabilities. *ChromaPop*[™] filters two specific wavelengths of light that cause color confusion. By doing this the lens delivers greater definition, more natural color, and unmatched clarity to allow you to see more detail.

NORMALLY

The eye's retina has trouble perceiving the difference between blue and green, and red and green light.

WITH CHROMAPOP[™]

ChromaPop[™] filters these specific crossovers, allowing greater definition, natural color, and clarity.

Adapt with *MAG*

CHANGE IS EASY.

MAG technology allows you to quickly adapt for any condition.

Smith *MAG* technology

CHANGE IS EASY WITH THE SMITH MAG QUICK RELEASE LENS CHANGE SYSTEM

The next generation of Smith performance eyewear has arrived. The aerodynamically designed Attack MAG, Attack Max MAG and the Attack MTB MAG are faster in every detail. With a simple click, experience the sound of speed with Smith MAG interchangeable technology; an innovation that enables fast *ChromaPop™* lens swapping for varying light conditions.

MECHANISM

Two opposing N52 neodymium magnets, with the highest attraction to size ratio, in the injection molded temple lug intuitively separate to allow the temple to slide on to the lens carrier providing a locking mechanical engagement that resists forces and rotation during over-extension and reduces optical stress on the lens.

EXPANDED FIELD OF VIEW

When you see more, you can do more. With an expansive field of view and uninterrupted sightlines even in an aggressive riding position; the Attack MAG, Attack Max MAG and the Attack MTB MAG lenses provide unrivaled levels of protection from sunlight, wind, and debris.

CHROMAPOP™ PERFORMANCE

Whether on the trail or on the road, our proprietary lens technology helps you see detail and color beyond normal capabilities. *ChromaPop™* filters specific wavelengths that cause color confusion and delivers greater definition, more natural color, and unmatched clarity via an installed Sun tint for bright conditions and an included Contrast tint for low light conditions.

NARROW FIT

WIDE FIT

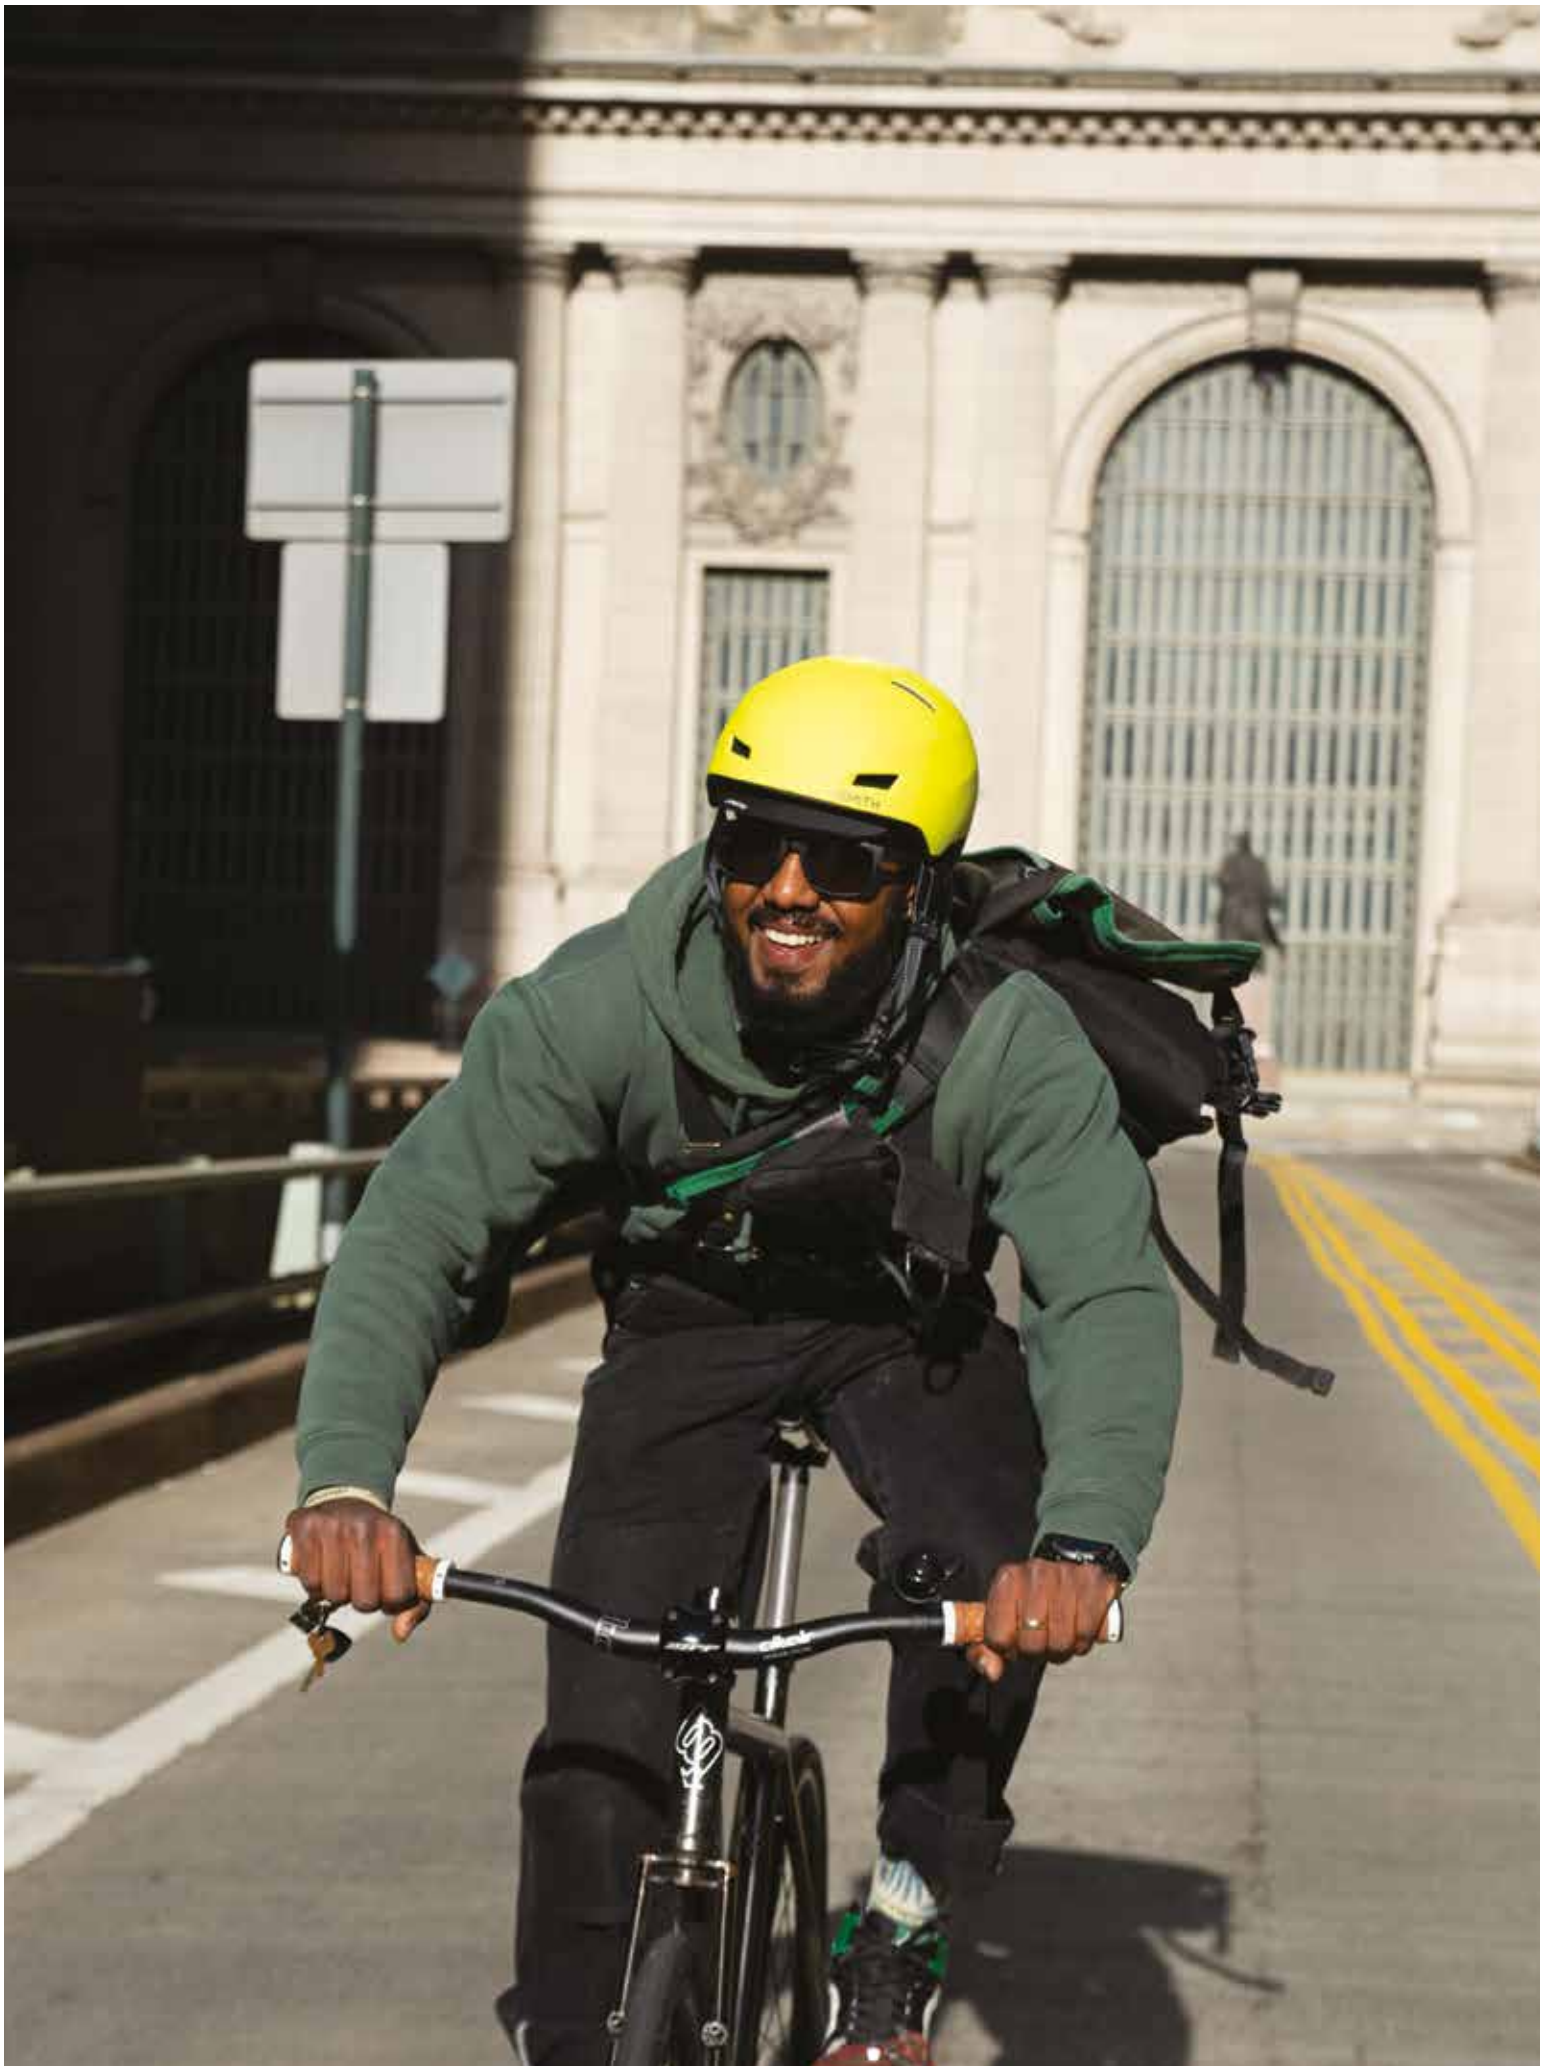

TWO-POSITION ADJUSTABLE NOSE PADS

Upgraded two-position adjustable nose pads enables you to customize the comfort and fit based on the shape of your nose bridge. This also allows you to strategically position Attack MAG, Attack Max MAG and the Attack MTB MAG further from your brow to maximize ventilation and help prevent lens fogging during varying efforts and conditions.

INVISIBLE FIT

With a frameless, lightweight wrap-around design, Attack MAG, Attack Max MAG and the Attack MTB MAG disappear on the rider's face while maximizing ventilation and integration with Smith cycling helmets. Expanded hydrophilic megol temples and upgraded two-position nose pads provide a secure comfortable fit.

ROAD COLLECTION

It's time for reflection.

THE VIZ COLLECTION FROM SMITH.

Trace

Network

Incorporating premium reflective elements with progressive styling. Daytime riders can take confidence in a proven & road-ready Neon Yellow colorway highly visible from all directions. At night – the Viz collection transforms into an 360 degree halo of reflectivity illuminating the shell and retention systems.

NEW

Jetstream

Aerodynamic road helmet featuring **Koroyd®**

code E00743

Sustain your speed when every second counts. Our top-performing time-trial helmet, the Smith Jetstream TT has a lightweight aerodynamic design ideal for race day. Zonal Koroyd® and MIPS come together to provide energy-absorbing impact protection so you have full confidence as you maintain your momentum through the toughest sections of the course. A magnetic visor makes it easy to switch between a color-enhancing *ChromaPop™* lens or a clear option. Five strategically placed vents help keep you cool without adding drag so you can put all your focus into securing your place on the podium.

PROTECTION

Zonal Koroyd® coverage for lightweight energy-absorbing and ventilated impact protection

MIPS Brain Protection System reduces rotational forces caused by angled impacts to the head

FIT / INTEGRATION

VaporFit™ dial adjustment system offers 270-degree fit adjustment with the turn of a dial

Low-profile Y-strap divider provides a secure fit to reduce wind noise and aerodynamic drag

Five strategically placed vents for optimal airflow

Ionic+® antimicrobial lining offers sweat-activated odor control

Lightweight, low-bulk single layer webbing

Premium Smith helmet case

Every Second Counts

SUPERIOR AERODYNAMICS AND PROTECTION DESIGNED FOR RACEDAY

AERODYNAMIC WIND TUNNEL DATA

No one questions wind tunnel data and we are not about to start. However, the science does require expertise. Through a partnership with the University of Washington wind tunnel and world-renowned aerodynamicist Len Brownlie, we tested the Jetstream TT helmet against the current best-in-class helmets using the Wind Averaged Drag (WAD) methodology. This Methodology was developed for the automobile industry decades ago but at Brownlie's direction, has been modified for cycling-specific tests.

To make it as simple as possible for athletes and consumers to understand, the WAD method aggregates the drag measurements from several discrete yaw angles into a single "wind averaged" measure of drag. This provides final estimated time savings for 40k and 180k time trials.

				TIME DIFFERENCE		
HELMET MODEL		DRAG @ 30 MPH AND 0 YAW (% INCREASE FROM 0)	WIND AVERAGED DRAG @ 30 MPH (% INCREASE FROM 0)	40KM TT @ 330W (30MPH)	180KM @ 250W (27MPH)	
TIME TRIAL	Jetstream TT	0 (baseline)	0 (baseline)	0 (baseline)	0 (baseline)	FASTER
	Aerohead	+ 2%	+ .2%	+1 sec	+24 sec	
	Bambino	+ 12%	+ 7%	+18 sec	+86 sec	
	S-Works TT	+ 13%	+ 7%	+17 sec	+67 sec	SLOWER
	AR07	+ 19%	+ 13%	+31 sec	+117 sec	
	Mistral	+ 17%	+ 13%	+32 sec	+91 sec	

© Smith Sport Optics, Inc. 2021

RESULTS

Whether you're talented enough to hold an elite level pace of 32 mph for 40K, or if 25mph for 40K is more in reach, you'll appreciate the best-in-class aerodynamics of the Jetstream TT. Regardless of pace, all riders will benefit from the progressive protection of Koroyd® and the amplified color and enhanced definition of the ChromaPop™ shield.

For Jetstream testing, at 30mph and 0 yaw, 95% Confidence Interval is +/- 4 g (+/-0.99%). Jetstream data was collected at a later date with a time trial-specific aerodynamic rider model and may not be compared directly to that of Ignite and Trace.

Ignite

Aerodynamic road helmet featuring **Koroyd®**

code E00735

Make sure you're all in on race day when you buckle up in the Smith Ignite race helmet. Its aerodynamic shape, energy-absorbing **Koroyd®** impact protection, and **MIPS** liner system give you the confidence and advantage you'll need to attack with speed and catch the breakaway. Fully integrated eyewear storage allows you to pull on your shades fumble-free, so you never miss an opening.

PROTECTION

Zonal **Koroyd®** coverage for lightweight, energy-absorbing and ventilated impact protection

MIPS Brain Protection System reduces rotational forces caused by angled impacts to the head

FIT /INTEGRATION

VaporFit™ dial adjustment system offers 270-degree fit adjustment with the turn of a dial

Low-profile Y-strap divider provides a secure fit to reduce wind noise and aerodynamic drag

Designed for ultimate integration with Smith performance eyewear for maximum comfort, venting and storage convenience

AirEvac™ ventilation system integrates with Smith goggles and eyewear for fog-free lenses

Eight fixed vents for consistent airflow

Speed with Benefits

SUPERIOR AERODYNAMICS, IMPROVED PROTECTION, AND ULTIMATE VENTILATION

The most complete helmet on the market.

AERODYNAMIC WIND TUNNEL DATA

No one questions wind tunnel data and we are not about to start. However, the science does require expertise. Through a partnership with the University of Washington wind tunnel and world-renowned aerodynamicist Len Brownlie, we tested the Ignite and Trace helmets against the current best-in-class helmets using the Wind Averaged Drag (WAD) methodology. This methodology was developed for the automobile industry decades ago but at Brownlie's direction, has been modified for cycling-specific tests.

To make it as simple as possible for athletes and consumers to understand, the WAD method aggregates the drag measurements from several discrete yaw angles into a single "wind averaged" measure of drag. This provides final estimated time savings for 40k and 180k time trials.

	HELMET MODEL	WIND AVERAGED DRAG @ 30 MPH (G)	TIME DIFFERENCE		
			40KM TT @ 200W (25MPH)	40KM TT @ 400W (32.2MPH)	180KM @ 250W (27MPH)
AERO ROAD	SMITH Ignite	-8%	-13 sec	-17 sec	-77 sec
	Evade II	-8%	-12 sec	-17 sec	-74 sec
	Vanquish (no visor)	-7%	-11 sec	-15 sec	-67 sec
	SMITH Podium (w/ visor)	-6%	-8 sec	-13 sec	-54 sec
	Protone	-1%	-1 sec	-1 sec	-5 sec
ALL-AROUND	SMITH Trace	0 (baseline)	0 (baseline)	0 (baseline)	0 (baseline)
	Synthe	+3%	+5 sec	+7 sec	+31 sec
	Prevail II	+3%	+5 sec	+7 sec	+31 sec
	SMITH Overtake	+6%	+9 sec	+12 sec	+52 sec

RESULTS

Whether you're talented enough to hold a pro tour speed of 32 mph for 40K, or if 25mph for 40K is more in reach, you'll appreciate the best in class aerodynamics of the Ignite and Trace. Regardless of pace, all riders will benefit from the progressive protection of Koroyd® and the secure eyewear integration.

Wind averaged bike axis drag calculated using average of multiple runs and wind speed velocity sweep through four yaw angles. At 25mph and 0 yaw, 95% confidence interval is +/- 5.5g. All data collected at University of Washington Kirsten Wind Tunnel over the course of a single day under similar environmental conditions. Helmets were installed on the headform using consistent brow position, strap, and fit system adjustment. Rider head angle was also maintained. Time savings calculated for a 160lb (72.5kg) rider, including all clothing, and a 17lb (7.7kg) bike at sea level with 0 grade and no wind.

Network

Versatile style and performance featuring **Koroyd®**

code E00732

You've always been drawn to the challenge of a new route, a new trail, the thrill of the unexpected. Designed for whatever you get into on two wheels, the Smith Network is our versatile, shred-ready bike helmet. Safety techs like **Koroyd®** and **MIPS** offer protection and enhanced energy absorption should you need it. When the sun is blazing and you're heating up, the ventilation system keeps air flowing and your eyewear fog-free. Later, when the light dips beneath the hills, store your shades in pass-through channels on the front.

Session

High performance, trail helmet with **Aerocore™** construction featuring **Koroyd®**

code E00731

You earn your ride through the climb, but you're really in it for the downhill. Our Smith Session helmet is made for the all-mountain rider that wants speed and style in one protective package. The ultralight feel and innovative protection of Koroyd® in strategic, zonal impact areas let you bomb and blaze with confidence. Generous air ports on the top work with internal air channels to provide ventilation that keeps you cool on the uphill and helps maintain your focus in descent mode. Plus, it accommodates easy goggle or eyewear storage so you can sit back and enjoy the view from the top without accidentally smashing your gear.

PROTECTION

Zonal Koroyd® coverage for lightweight, energy-absorbing and ventilated impact protection

Engage

Feature packed mountain bike helmet for the everyday rider

code E00745

Big berms, rock gardens or flowy rollers. No matter the trail, get after it with confidence in the Smith Engage mountain bike helmet. MIPS Brain Protection System helps reduce angled impact forces in the event of a crash, while the VaporFit™ dial adjustment and extended back coverage provide a locked-in feel. On hot days or exposed climbs, 20 fixed vents and our AirEvac™ ventilation system keep you cool and comfortable. Channels on the front make it easy to stow eyewear and a two-position visor rotates up for on-the-go goggle storage.

PROTECTION

Lightweight in-mold construction

MIPS Brain Protection System reduces rotational forces caused by angled impacts to the head

FIT / INTEGRATION

VaporFit™ dial adjustment system offers 270-degree fit adjustment with the turn of a dial

Designed for ultimate integration with Smith performance eyewear and goggles for maximum comfort, venting and storage convenience

AirEvac™ ventilation system integrates with Smith eyewear for fog-free lenses

20 fixed vents for consistent airflow

Two-position adjustable visor

Performance comfort lining

Lightweight, low-bulk single-layer webbing

SIZING: SMALL 51-55 CM • MEDIUM 55-59 CM • LARGE 59-62 CM • X-LARGE 61-65 CM

Convoy

Classic bike helmet for the everyday rider

code E00741

When designing the Smith Convoy, we set out to create a mountain bike helmet that felt like it was tailor-made for your head. Turn the dial in back, and the *VaporFit™* system adjusts like a halo around the skull. When it comes to comfort and protection, the helmet ticks all the boxes. It has a *MIPS* liner system and all the ventilation you'll need through the hottest days on the trail. In addition to easy integration with performance eyewear, it also features outside channels that store your shades when dusk sets in.

PROTECTION

Lightweight in-mold construction

MIPS Brain Protection System reduces rotational forces caused by angled impacts to the head

FIT / INTEGRATION

VaporFit™ dial adjustment system offers 270-degree fit adjustment with the turn of a dial

JUNIOR COLLECTION

NEW

Mips

Zip Jr.

code E00752

School, park, or neighborhood trails, kids and bikes go places. No matter where their wheels take them, the Smith Zip Jr. bike helmet delivers enhanced angle impact protection with MIPS in a lightweight design that kids want to wear. Our dial-adjustable VaporFit™ gets the fit right every time. There's a low-profile lining for extra comfort plus plenty of vents to keep the air flowing and kids cool. Just buckle 'em up and start pedaling.

Mips

Wilder Jr.

code E00751

When your young rider is dedicated to the dirt, you need gear that keeps pace with their skill set. The Smith Wilder Jr. mountain bike helmet combines the enhanced angle impact protection of *MIPS* with a lightweight, ventilated design just like our adult helmets. 21 fixed vents keep the air flowing as kids bomb down their favorite trails. Our *VaporFit™* dial system adjusts around the head with the turn of a dial to get the right fit every time. There's a built-in visor to cut glare and integrated sunglasses storage, so kids can stow their glasses just like mom or dad.

Parallel 2 Max

INTERCHANGEABLE LENS

cod. 201907

The Parallel 2 Max employs the same performance-driven frame and features you look for in the Parallel 2 with an enlarged size so you can still get that minimal look with more coverage. Add in a great new option of an ignitor lens for those low-light moments and you have the perfect accessory for any outdoor endeavor.

PERFORMANCE

LIFESTYLE

The Smith Pinpoint sunglass delivers precision performance in a subdued angular design. In a flash, the Pinpoint transform from a functional street-style sunglass to race-ready performance equipment with the addition of the saddle bridge nose pad. Both of the interchangeable nose pads feature the comfort and traction of megol rubber, with the performance pad offering enhanced stability and grip for running and biking. The *ChromaPop™* lenses provide unmatched clarity and detail while enhancing natural color. Whether running, biking or pounding the pavement, the eco-friendly Pinpoint sunglasses don't just perform, they excel.

MIPS technology

MULTI-DIRECTIONAL IMPACT PROTECTION SYSTEM

In a helmet with *MIPS* Brain Protection System (BPS) the shell and the liner are separated by a Low Friction Layer. When a helmet with *MIPS* Brain Protection System is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The *MIPS* BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both affects the brain and increases the risk for minor and severe brain injuries. *MIPS* BPS has been scientifically proven to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain.

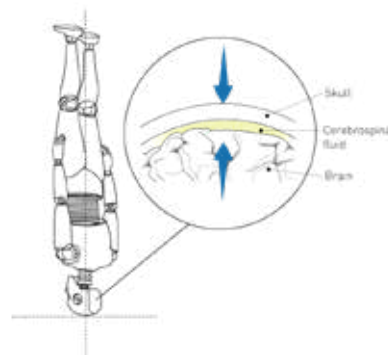

THE GREAT MISCONCEPTION

Accident statistics show that many injuries occur due to angled impact to the head. However, in standard helmet tests the helmet is dropped vertically onto a flat surface. The results are helpful for measuring precise vertical impacts, but inferior for measuring the more realistic scenario of an angled impact. *MIPS*® has been developed for reality and increases protection against angled impacts.

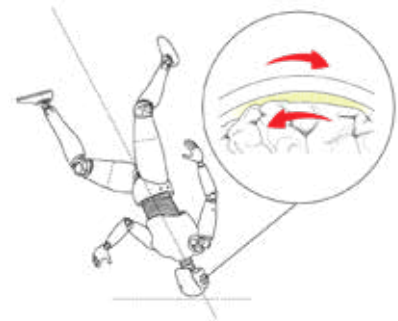

MIPS IN ACTION

When you fall to the ground at an angle rotational forces are generated. A helmet integrating *MIPS* technology creates a sliding layer between the outer shell and the head. This allows the helmet's outer shell to slide relative to the head when hitting the ground, so the rotational force is decreased, reducing the potential to damage your brain.

HOW HELMETS ARE TESTED TODAY

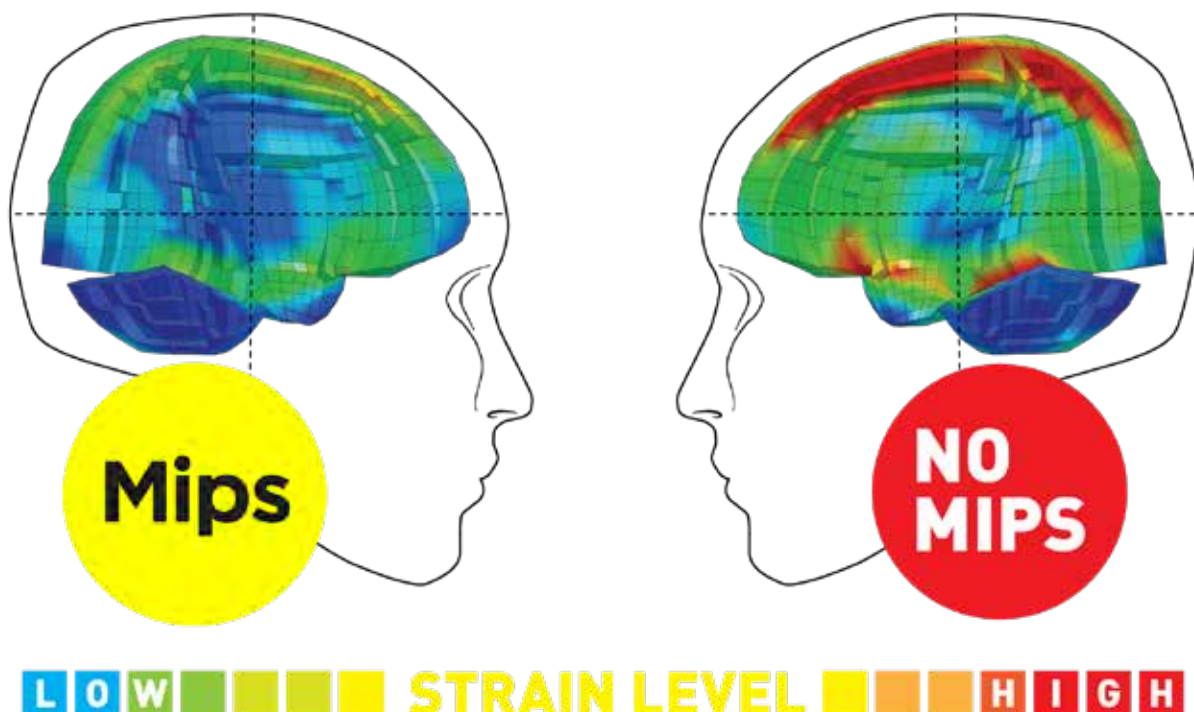

HOW YOU ARE MORE LIKELY TO FALL

STRAIN LEVELS

Simulated deformation of the brain from angled impact when the user is wearing a helmet with and without *MIPS*.

VaporFit™ ACCOMMODATES A SMALLER FIT

VaporFit™ EXPANDS TO ACCOMMODATE A LARGER FIT

VaporFit™ 360° HALO FIT SYSTEM

VAPORFIT™

Crafted with ease-of-use and superior comfort in mind, the VaporFit™ system relies on a tried-and-true rotary dial adjustment system integrated with a tuned elastic fit using engineered shapes. Each VaporFit™ system has a full 5cm of rotary adjustability. Additionally, the system can be moved up/down or forward/backward at the attachment points. The final result is increased comfort with a personalized, secure fit.

Available in the Jetstream TT, Forefront 2, Trace, Ignite, Session, Network, Engage, Persist, Convoy and Signal helmets..

LFS ACCOMMODATES A SMALLER FIT

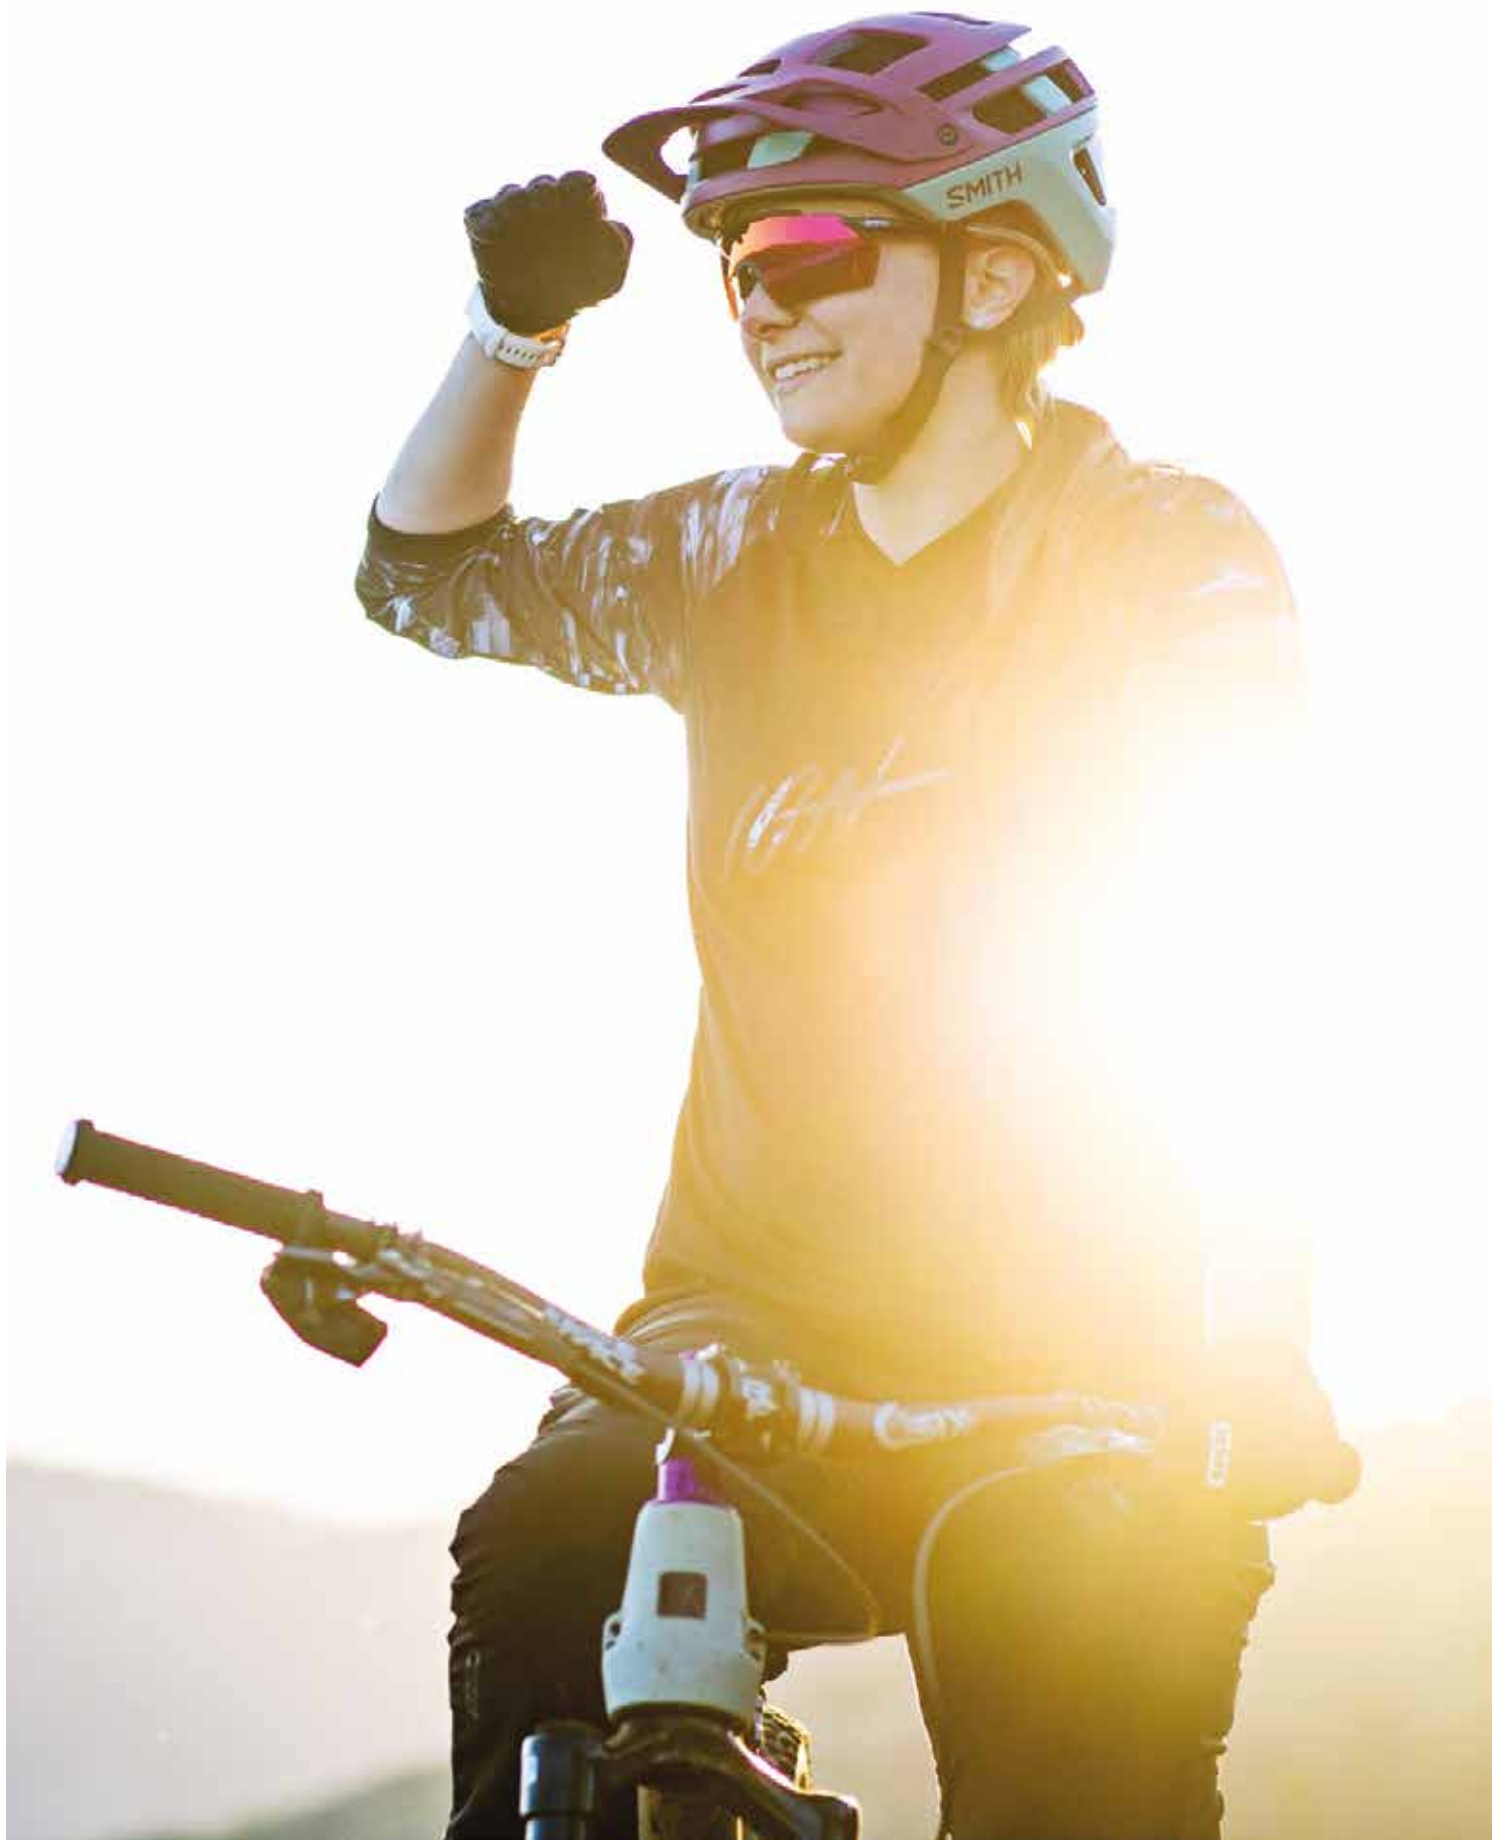

LFS EXPANDS TO ACCOMMODATE A LARGER FIT

LIFESTYLE FIT SYSTEM (LFS)

Built around the forgiving properties of elastic, the self-adjusting Lifestyle Fit System is designed to flex around the rider's head, providing a dynamic fit that will move as you do. Additional lateral adjustability on the fit system arms allows it to accommodate a wide range of head sizes. With the Lifestyle Fit System, you'll experience comfort and mobility from a fit system that you'll never have to think about.

Available in the Maze.
