

We turn our customers' requirements into solutions.

True to the company's mission here at WINTERSTEIGER, we do all that we can to provide the best-possible support to our customers in these challenging times.

Hygiene in ski rental.

Sports retailers and cableways are facing new challenges, as demands in relation to hygiene become more exacting. So in this accessories catalog, we would particularly like to highlight the first section, and the many hygiene products it contains. We offer a wide range of products, from disinfectant dispensers and retractable queue barrier stands to guide the flow of customers, to the successfully tested air disinfection unit „CUBUSAN“ - an in-house development from WINTERSTEIGER! There is also the acrylic glass safety screen for the current generation of Easystore adjustment desks and cash desks, which appears at the end of the catalog.

Jupiter – the king of the ski service universe.

January saw the launch of our new generation of „Jupiter“ automated machines. Not forgetting the relevant accessories, of course! All the new consumables for the Jupiter have been integrated into this catalog. And naturally enough, there are also one or two new and interesting items apart from hygiene and Jupiter!

WINTERSTEIGER SPORTS is the world market leader, providing complete service for skis and snowboards, storage and rental solutions. Ski and snowboards shops, rental stations, famous ski and snowboard manufacturers and national Ski Federations rely on **WINTERSTEIGER's** tailor-made system solutions and first-class service. The headquarters located in Austria, subsidiaries in Germany, France, Italy, Switzerland, USA, Canada, China, Russia and more than 20 representations throughout the world ensure a closely-knit sales network and global service. Customer service at **WINTERSTEIGER** quite simply means being served better and faster!

Hygiene in ski rental

Ski rental and sports equipment retailers and customers are now far more aware of hygiene and disinfection. The most important issue for WINTERSTEIGER was and still is to offer our customers the best possible support in every respect. This is why we have significantly expanded our hygiene product range in recent months, and placed it right at the front of this catalog.

From hand disinfection when entering your store, to disinfection of ski and snowboard boots, to cleaning the indoor air, we offer a full range of options for sanitizing sales and rental premises. There is often a lot going on at peak times, customers criss-cross the store in every direction and swarm around the checkout area. To stop this happening, we now also provide removable, high-quality retractable queue barrier stands and 3M warning adhesive tape for the floors. And it is easy to protect your staff by upgrading your Easystore adjustment desks and cash desks with acrylic glass safety screens. Our product range also includes hoods and BOOTDOC socks, so that you can provide your customers with the best-possible hygiene during the day.

You create a clean and tidy environment in your store – and your customers and staff will thank you for it!

Boot disinfection

Easyfresh device + helmet option

Bacteria have no chance anymore with Easyfresh! With two nozzles on each arm the whole boot can be disinfected perfectly. The compact machine has two arms for boots and one flexible nozzle for the treatment of helmets. Therefore, your boots and helmets are always fresh and sanitized!

- the flow rate und spray period can be choosen on the control panel
- compressed air needed (6 bars pressure from the workshop outlet or a small separate compressor)
- space for 2 separate liquid cans (5 lt. each), 1 for boots and 1 for helmets
- works without electricity for a maximum of safety and reliability

7368-03	Easyfresh Device f. Boots	pcs.
7368-0912-V01	Easyfresh Helmet Option	pcs.

Compressor CW90/4 Super-Silent

Due to its small size, this compressor fits perfectly into the Easyfresh housing! The low noise emission level of only 58 dB also allows the Easyfresh to be placed in the sales room. Effective output volume: 49 liter/min, max. operating pressure: 5 bar, tank volume: 3,5 liter, sound level 58 dB, 320 x 340 x 340 mm (L x W x H), weight: 18 kg.

33-100-333	1 x 230 V, 50 Hz, 0,68kW	pcs.
------------	--------------------------	------

"Disinfected" sticker Ø = 200 mm

The need to communicate your shops impeccable hygiene standards for rental equipment is becoming increasingly important. Make your customers aware of your hygienic working conditions and show your concern for their health. Made from high quality material, this sticker can be applied very easily and is also UV-resistant. This sticker can be used on furniture, boot racks and boot dryers as well as glass surfaces exposed to sunlight. The sticker will leave no residue when removed for easy clean up and includes 4 languages, DE/EN/FR/IT.

78-300-559	200 mm (7 ¾") in diameter.	pcs.
------------	----------------------------	------

Desodorant CAPTODOR, FRESH RAIN

For the ecological treatment of ski boots, snowshoes and other protective equipment during sports activities.

- non-flammable, non-toxic, not corrosive
- biodegradable, environmentally and user friendly
- allows the permanent removal of odors by deep treatment
- recommended for use with the disinfectant EASYFRESH

55-100-890	5 lt. can, smell: Fresh Rain	pcs.
55-100-900	500 ml spray, smell: Fresh Rain	pcs.

Disinfection and Deodorization liquid CAPTODOR SPORT, 5 lt. APPLE

For the ecological treatment of ski boots, snowshoes and other protective equipment during sports activities.

- Enables the ecological treatment of shoes, but also helmets and clothing
- non-flammable, non-toxic, not corrosive
- biodegradable, environmentally and user friendly
- allows the permanent removal of odors by deep treatment
- recommended for use with the disinfectant EASYFRESH

55-100-895	5 lt. can, smell: Apple	pcs.
------------	-------------------------	------

Shoe Fresh / Helmet Fresh

Water-based, ecological disinfectant for shoes and helmets. Spray several times inside the shoes, helmets and allow to dry about 15 minutes.

- Approved disinfection efficiency according EN 1276, EN 13697 and EN 14476 (virucidal effect)
- Smell: Eucalyptus
- Without alcohol
- Biodegradable
- Includes no synthetic perfume
- Recyclable cans made of HDPE

55-100-880	SHOE FRESH, 500 ml pump spray	pcs.

55-100-865	SHOE FRESH, 5 lt. can	pcs.
55-100-870	HELMET FRESH, 5 lt. can	pcs.

Steribio Disinfection and Deodorization liquid

The bactericidal and fungicides effect of the disinfectant and deodorizer liquid STERIBIO were tested in the laboratory and correspond to the standards DIN EN 1040 as well as DIN EN 1075.

55-100-768	5 lt. can, smell: freshness	pcs.
55-100-773	5 lt. can, smell: pin/ment	pcs.

NEW

Spray Bottle 1 lt. for Disinfection / Deodorizer liquid

For disinfection and deodorizer liquids. Without liquid.

55-100-769	1 lt.	pcs.
------------	-------	------

NEW

Spray Bottle 1 lt. and Extension 60° (empty)

Thanks to the curved extension tube, ski boots can be optimally sprayed even at the toe area. First, pressure is built up in the bottle by pumping pressure into the bottle. Afterwards, a light press on the spray button is sufficient for an even, constant atomization. The fineness can be adjusted by turning the nozzle nut. In addition to the extension shown on the picture (30 cm), a 5 cm long standard nozzle is included in the delivery too. The use of this spray bottle can therefore be varied, depending on the nozzle you use.

55-100-808	Spray Bottle 1000ml+Extension	pcs.
------------	-------------------------------	------

NEW

Spray Extension for Spray Bottle 1 lt.

It can get hectic when it comes to the disinfection of all the rental boots. If you accidentally damage your 30 cm extension, you can also reorder this cheap spare part only. By turning the nozzle nut at the very front, the fineness of the atomization can be individually adjusted.

55-100-809	Spare Spray Extension, 30 cm	pcs.
------------	------------------------------	------

NEW

"WINTERSTEIGER BakuVir" Disinfectant 1 l.; non-alcoholic

Not everyone is keen on the smell of alcohol-based disinfectants. The only detectable scent given off by the new surface and hand disinfectant "WINTERSTEIGER BakuVir" is a mild, clean hint of chlorine. When selecting alcohol-free disinfectants, always check for official certification in accordance with EN standards. This disinfectant satisfies all relevant standards for surface disinfection (e.g., EN 14476 and EN 1650). Recommended for use in pump spray bottle (art.no. 55-100-808). NOT suitable for Easyfresh, hand disinfection dispenser (art.no. 55- 100-700) and metallic surfaces.

55-100-711	non-alcoholic, 1 lt.	pcs.
------------	----------------------	------

55-100-807 Ø 53 mm, 10 pcs. pk.

Hand disinfection

1

Disinfection dispensers and accessories

It's remarkable how quickly we adapt to a change in circumstances - a disinfection stand has now become an essential element in every shop. With our WINTERSTEIGER disinfection stands, you have a product you can easily refill with disinfectant yourself - not a trace of the well overpriced replacement cartridges that are usually required! And because every customer will cast a glance at the disinfection stand, our optional A4 frame is the perfect place for advertising at the same time!

NEW

Disinfectant dispenser with drip tray

This automatic disinfectant dispenser including drip tray can be mounted on the wall or aluminum stand (item no. 55-100-705). The disinfectant is dispensed by sensory detection of the hand and subsequent spray ejection of the disinfecting agent. The quantity dispensed each time can be set individually and the disinfectant (item.no. 55-100-710) can be refilled easily. Battery-powered operation allows for completely flexible positioning of the dispenser.

55-100-700

pcs.

NEW

Aluminum stand for disinfectant dispenser

The disinfectant dispenser (item no. 55-100-700) can be mounted very easily on this high-quality aluminum stand. The color of the stand (RAL 9007) is also used for many pieces of WINTERSTEIGER Easystore furniture and service machines.

55-100-705

Alu Stand without Dispenser

pcs.

NEW

A4 - Infoboard for Aluminium Stand

The disinfection station is one of the most frequented places in your shop, take full advantage of this with our new WINTERSTEIGER info board. Use to explain your rental process, pricing, or other vital information. This info board can be attached to the WINTERSTEIGER disinfection stand (item no. 55-100-705). The color of the stand and info board (RAL 9007 - gray aluminum) is also used for many pieces of WINTERSTEIGER Easystore furniture and service machines.

55-100-706

optional Infoboard A4

pcs.

NEW

Disinfectant dispenser refill bottle 12 x 1 L., alcoholic

This handy refill bottle is recommended for convenient refilling of the disinfectant dispenser (item no. 55-100-700). A total of 12 1-liter bottles are supplied - the content of one bottle is sufficient for about 1,000 sprays. The use of this disinfecting agent guarantees problem-free operation of the disinfectant dispenser. Effective against bacteria, Influenza and corona viruses!

- Possible voice control with Amazon Alexa and Google Assistant
- With integrated timer
- Inclusive free Connect App
- Nominal voltage: 230 V / 50 Hz; up to 3,000 watts

62-014-012

pcs.

Queue Management Systems

Queue Management Systems

This approach has been used successfully in all airports for many years, and is now finding its way into ski rental. Since the product was launched in October 2020, subsequent products for controlling customer flow have turned out to be real bestsellers! By using these high-quality yet affordable pull-out queue barriers, not only do you purposefully guide your customers, you also provide reassurance. This can be supplemented by putting 3M adhesive tape on the floor, to act as social distancing markers. To make the wait seem shorter for your customers, you can also attach interesting information or special offers to the optional information board.

NEW

3,4 m retractable queue barrier stand; black

The targeted guidance of customer flows is particularly necessary from a hygiene point of view. By using retractable queue barrier stand, you can direct and slow the flow of customers. The retractable queue barrier stands and retractable belts for wall mounting (item no 55-100-630) can be combined with one another depending on the room conditions. Exclusive "Wall mounting for retractable belt end, art. no. 55-100-635".

55-100-620

Ø 35,5 cm x 101,5 cm / 9 kg

pcs.

HYGIENE PRODUCTS

BOOTDOC Hygiene socks and helmet liner

1

NEW

Infoboard for queue barrier stands, paper size A4 (297 x 210 mm)

This information sign can be added to WINTERSTEIGER retractable queue barrier stands. It could be used to convey important information about the rental process or advertising campaigns, and at the same time shorten the waiting time for your customers.

55-100-625 optional, without stand pcs.

NEW

4.6 m retractable belt for wall mounting; black

Do you have a sales area which is only to be opened during peak times? With this 4.5 m retractable belt for wall mounting you can open and close such zones easily and quickly. The retractable belt can be hung either on the supplied wall mounting for retractable belt ends or on WINTERSTEIGER retractable queue barrier stands.

55-100-630 incl. Wall counter piece pcs.

NEW

Wall mounting for retractable belt end, incl. wall plugs and screws

Are there several fixed points in your shop where you would like to hang the retractable belts (item no. 55-100-620 and item no. 55-100-630)? This optional extension of additional wall mountings for retractable belt ends offers the perfect solution.

55-100-635 optional pcs.

NEW

3M safety tape red / white 50 mm x 33 m

With this universally applicable warning tape, you can, for example, draw your customers' attention to distance - keeping. This adhesive tape from 3M for floors and safety marking has a very high adhesion force (21 Newton / 100mm) and can still be removed without leaving any residue.

55-500-175 white - red; 50 mm x 33 m pcs.

BOOTDOC Hygiene socks and helmet liner

BOOTDOC Hygiene socks and helmet liner

When the customer tries on ski boots or snowboard helmets, the first one doesn't always fit immediately. In order to enable the customer to try on and keep them on hygienically, we recommend the following products from BOOTDOC!

NEW

Helmet Liner

- Thin helmet liner for hygienic try-on of helmets
- Excellent for rental purposes or as a thin additional insulation layer
- Can also be used for e.g. running, cycling and hiking

10-3300-100 pcs.

- Balaklava is used underneath a helmet to provide insulation and serve as mouth/nose protection

10-3300-102	pcs.
-------------	------

Working Gloves

NEW

Working Gloves

Your staff at the adjustment desks probably have a story to tell: quickly putting on protective gloves to minimize the risk of injury when adjusting bindings, and the next moment, taking the gloves off again to operate the touch screen. And it's the same all day long - gloves on, gloves off, gloves on, and so forth. To make life easier for you and your staff (as well as to save time), we now offer a convenient 12-pack of work gloves suitable for touch screen use.

55-500-272	Size 10; 12 pairs; washable	pk.
55-500-273	Size 11; 12 pairs; washable	pk.

WINTERSTEIGER TUNING TOOLS

The WINTERSTEIGER retail program

2

The WINTERSTEIGER retail program

The WINTERSTEIGER retail program features tools and information for the consumer to maintain their equipment between shop visits.

The more the consumer is educated about properly tuned equipment, the more shop visits they will make during the season. WINTERSTEIGER Ski and Snowboard Tuning Tools are the perfect solution for the do-it-yourselfer who wants to keep their skis and snowboards in top notch condition between visits to your WINTERSTEIGER repair shop. Not only are we offering the highest quality tools, we also offer displays and packaging that tie the product line back to your repairshop. Our complete line of hand tools allow your customers to wax, repair minor base damage and keep their edges sharp and smooth. Detailed product use and consumer information about the need for tuning is available online at our consumer based web site www.tuneyourskisandboards.com. All retail products have EAN-codes on the packaging.

Ski Vise SPORT PLUS

Sturdy, high-tensile aluminium vise for tuning all types and shapes of skis. The Vise SPORT PLUS is a very easy to use for tuning all types and shapes of skis. Features sturdy high tensile aluminum and is light and easy to transport. The holding system keeps the ski secure for base and side edge work. Includes 2 brake retainers (packaged for retail). This vise allows also a 60° positioning of the skis for fast and simple edge tuning.

57-401-014	Ski vise	pcs.
------------	----------	------

Ski Vise PRO

For use when maximum holding power is needed. The Ski Vise Pro Wide Opening has jaws with 90 mm of holding surface and is built to withstand heavy use. The holding frame includes shelfless jaws that will hold any shape sidewall and can accommodate riser plates. The adjustable guide blocks include the locking spindle. This feature allows the ski to be held sideways for edge and sidewall work without interference from the holding vise. This vise allows a positioning of 60° when tuning the side edge for faster and simpler tuning. Opening up to 155 mm.

57-401-225		pcs.
------------	--	------

Ski Vise RACING

Heavy duty, high-tensile aluminium vise for tuning skis. The Ski Vise RACING has jaws with 70 mm of holding surface and is built to withstand heavy use. The holding frame includes shelfless jaws that will hold any shape sidewall and can accommodate riser plates. The adjustable guide blocks includes the locking spindle. This vise allows a positioning of 60° when tuning the side edge for faster and simpler tuning. Opening from 40 to 100 mm.

57-401-020		pcs.
------------	--	------

Board/Freeride Stopper

Sturdy universal vise for tuning snowboards and wide skis. This vise comes with a high-impact plastic body and a special rubber grip top that holds the snowboard extremely well for flat filing and waxing. For two side edge positions: standard 90° and easy 60°. Suitable for all kinds and shapes of skis and snowboards. Binding clearance: 160 mm.

57-401-025

pcs.

Brake Retainer green

To fix the ski brakes in upper position. A universal ski brake retainer with more flex that works with all bindings. This specially formulated rubber compound is tough, long lasting with 100 % elongation. (packaged for retail).

57-440-003

4 pcs.

pk.

Flatness Tester 150 mm

L = 15 cm x Ø 1,27 cm diameter tru bar. Heat treated and black oxide treated. Place the tru bar on the base in the tip, under the binding, and on the tail to check for flatness, by looking for light under the tru bar in the middle or by the edges (packaged for retail).

57-203-201

150 mm

pcs.

Sidewall Planer Ergo Razor

To remove sidewall material. The ERGO RAZOR sidewall planer is essential to prep for side edge filing as it is common for a file to be compromised by cutting into the sidewall of a ski. It is very important to remove the sidewall material to avoid loading files with plastic and to keep the sidewall from interfering with the bevel on the edge. The razor has an ergonomic design that fits into the palm of the hand. It is adjustable and can be used with both the right and left hands. It comes with a round cutting blade (packaged for retail).

57-401-100

Sidewall Planer

pcs.

Discman 4 with original Makita Li-ion battery (1.500 mAh)

The mobile grinding tool for side-edge angles between 85° and 90° at skis + snowboards. Including grinding disc, tools for changing the disc, chargeable battery and battery charger. By using a ceramic disc, this grinder enables fast and exact re-sharpening of the side edge in steps of 0.5°. For base edge tuning between 0.5° and 2° the optional base edge tuning attachment is needed.

- With MAKITA lithium-ion battery 1.500 mAh and MAKITA battery charger.
- With a very short charging time of the Li-Ion battery: only approx. 20 minutes.
- The lightweight lithium-ion battery enables a weight reduction of 400 grams at the Discman 4 with battery.
- Including a dust magnet for collecting the metal dust during grinding.
- NEW: In addition each Discman 4 is equipped with a new grinding support. This enables a larger contact surface at the base when grinding the side edge and facilitates the handling of the device at the ski.

55-100-670

2

Discman 4 with Transformer 230V-50Hz/ 18 V

Electrical grinding tool for side-edge angles between 85° and 90° at skis + snowboards.. Including grinding disc, tools for changing the disc and transformer. By using the ceramic disc, this grinder enables fast and exact re-sharpening of the side edge in steps of 0.5°. For base edge tuning the optional base edge tuning attachment is needed.

- With transformer 230V/18V, 50 Hz and a 3 m long power cable with EURO plug.
- With a very short charging time of the Li-Ion battery: only approx. 20 minutes.
- Including a dust magnet for collecting the metal dust during grinding.
- NEW: In addition each Discman 4 is equipped with a new grinding support. This enables a larger contact surface at the base when grinding the side edge and facilitates the handling of the device at the ski.

55-100-671	Corded Discman 230V/ 50 Hz	pcs.
------------	----------------------------	------

Discman 4 Transformer Kit 230V-50Hz/ 18 V and a 3 m long power cable

Transformer 230V/18 V, 50 Hz with 3 m long connection cable and battery housing. By this retrofit kit any battery operated Discman 4 device can be operated either by battery or by external transformer and power cord.

55-100-672	18 V – 230 V / 50 Hz	pcs.
------------	----------------------	------

Discman 4 solo without battery / battery charger

Electrical grinding tool for side-edge angles between 85° and 90° at skis + snowboards, without battery and battery charger. Including grinding disc and tools for changing the disc. By using a ceramic disc, this grinder enables fast and exact re-sharpening of the side edge in steps of 0.5°. For base edge tuning the optional base edge tuning attachment is needed. This Discman device without battery and battery charger can be used with a 18 V Makita Li-Ion battery 1,5 Ah, 3 Ah or 4Ah.

- Including a dust magnet for collecting the metal dust during grinding.
- NEW: In addition each Discman 4 is equipped with a new grinding support. This enables a larger contact surface at the base when grinding the side edge and facilitates the handling of the device at the ski.

55-100-673	without Battery / Charger	pcs.
------------	---------------------------	------

Alu File Guide

Our precision anodized aluminium file guides are the perfect choice for the home tuner. Each guide is milled with a channel in the corner to allow filings to fall away from the base. Tools can be used with most files and diamond or abrasive stones. (packaged for retail)

57-401-300	90°	pcs.
57-401-301	89°	pcs.
57-401-302	88°	pcs.
57-401-303	87°	pcs.

Spring Clamp 11cm, galvanized

To clamp the files at your Alu File Guide.

55-500-165		pcs.
------------	--	------

BASE EDGE File Guide

To bevel the base edge from 0,5 to 1,5 degree. This base edge file guide uses the same quality in design and materials as the standard BASE EDGE File Guides (packaged for retail).

57-401-112 0,5° – 1,5° pcs.

File Guide PRO SHARP RACE, 85° - 90°

This updated professional side edge sharpener gives very accurate bevels from 90 to 85 degrees. A large knob allows adjustment to one of the 6 possible positions without the need of a screwdriver. Innovative arrow pattern allows waste material to fall free of the base without damage and reduces friction. Accepts file, stones, and diamond stones up to 6 mm thick and comes with a 80 mm ICECUT file (packaged for retail).

57-401-030 85° – 90° pcs.

File Brush/Card

To clean debris from the teeth of files. Proper cleaning helps to prolong the life of a file and ensures better overall tuning results (packaged for retail).

57-200-050 pcs.

Pocket Stone

For quickly removing minor burrs and imperfections on edges. Use the pocket stone mounted in the file guide to remove any striations left by the file to further polish the edge (packaged for retail).

57-200-102 100 x 18 x 8 mm pcs.

Soft Red Gummi Stone

For fine buffing and polishing on the edge. Starting at the tip of the ski/board, the gummi stone should be run at a 45 degree angle for up to 10 to 20 cm past the contact point. Making multiple passes, reducing the length of the stroke each time, feather the edge from the tip to the set bevels. Run the gummi stone from tip to tail to deburr and repeat the detune process in the tail (packaged for retail).

57-420-242 very fine, 40 x 20 x 65 mm pcs.

Finn File "Mill Bastard" 150mm

55-500-135 Hard Chrome File 150 mm pcs.

57-401-222	Grit 200, coarse, 100 mm	pcs.

Drip Candles

Drip candles provide base repair material for repairing scratches and damage to the base on skis and snowboards. (packaged for retail)

57-440-001	Black, 3 pcs.	pk.
57-440-002	Clear, 3 pcs.	pk.

Metal Scraper

To remove excess repair material from the base. After the repair material has cooled completely, use the metal scraper to remove the excess material and blend the repair into the base. (packaged for retail)

55-240-457	130 x 60 x 0,7 mm	pcs.
------------	-------------------	------

Wax Iron WINTERSTEIGER 220 - 240 V / 50 Hz, 800W

High quality wax iron for skis and snowboards. Fine tuned thermostat reduces temperature fluctuations and a thick metalbase holds heat to prevent damage during waxing. (packaged for retail)

57-100-290	220-240V/ 50 Hz, 800 W	pcs.
57-100-291	220-240V/ 50 Hz,w.Swiss plug	pcs.

Wax Iron WINTERSTEIGER Digital

Precise temperature settings with digital control combine with a highly accurate thermostat to ensure a correct, constant temperature. Adjustable from 80° to 180°C. The 15 mm thick heating plate with innovative dimpled surface which allows the wax iron to easily move across the base by reducing suction. The beveled edges let melted wax flow over the entire base evenly for consistent results.

57-100-310	230 V/ 50 Hz, 1000 W	pcs.
------------	----------------------	------

Base Cleaner/Wax Remover

For removing grease, adhesives and for cleaning.

57-202-603	0,5 lt.	pcs.
------------	---------	------

NEW

Base fleece for finishing (20 pcs.)

This fleece can be used in a number of ways to gently tune the base:

- to clean the base of the ski with wax remover (item no. 57-202-603)
- to apply liquid wax (item no. 55-640-300)
- to completely rid the base of all waxing and sanding dust after the ski service

57-202-604	20 pcs. Base Fleece (17x17 cm)	pk.
------------	--------------------------------	-----

WINTERSTEIGER Easy Wax Liquid 60 ml

Liquid Wax for easy and fast application. You and your customers will love this easy to use liquid wax from WINTERSTEIGER. Application is as easy as rub-on, buff off, GO! 60 ml bottle with built-in sponge applicator.

57-440-112	with sponge applicator, 60 ml	pcs.

Spare Replacement Blade

57-203-432 Replacement Blade 100 mm pcs.

Wax Buffing Pad (Scotchbrite)

Pad to remove excess wax and buffing in of Rub On Waxes. Scotch Brite nylon wax buffing pads are a great tool for removing excess wax from the base and sidewalls of skis and snowboards. Used with light pressure after the wax has been scraped off the base, helps to expose the structure.

57-440-010 220 x 150 mm pcs.

Wax Brush Bronze

This stiff, all-bronze base brush is perfect for cleaning out wax in a coarse structure on the base before applying hot wax. Comes with a hang tag and sticker, packaged for retail.

55-500-077 with euro hole hanger pcs.

Wax Brush Nylon

General purpose stiff nylon bristle brush. Perfect for wax texturing. Comes with a hang tag and sticker, packaged for retail.

55-500-016 with euro hole hanger pcs.

Wax Brush Horsehair

This is a high quality brush used for cross-country, alpine and snowboard tuning. An essential tool for the serious tuner to expose the base texture. Comes with a hang tag and sticker, packaged for retail.

55-500-078 with euro hole hanger pcs.

HWK Skiwax

WINTERSTEIGER Racing: HWK Skiwachs

HWK supports following national racing teams

High performance in all snow conditions - no problem with HWK ski wax!

The cooperation with the Austrian family business HWK Skiwax allows WINTERSTEIGER to open up all possibilities for your premium ski service. WINTERSTEIGER now provides material and in-house know-how for the ski service of ambitious amateur skiers and racers. You can get everything from a single source, from base and edge grinding and temperature-specific fluor waxes through to essential boot fitting. Trust in the First-Class products from HWK and WINTERSTEIGER like many World Cup athletes and national associations and surprise your customers with the absolute top speed!

HWK Skiwax – the Top-Class in your Shop.

Drawing on decades of experience in structural grinding and waxing know-how from the global leader gives you an advantage. Strengthen your reputation as a specialist. Inspire your customers with your competence!

Simply successful.

A simple implementation of this new premium service is important to us! To keep it simple, WINTERSTEIGER and HWK created a shortlist of most essential waxing materials for the whole temperature range. Of course, liquid and powder waxes can also be offered to the end customer for an optimal gliding performance between the ski services in the shop.

The „fluoro ban” issue:

- Under a resolution passed by the FIS Council, fluoro waxes can no longer be used in FIS COMPETITIONS from the start of the 2021 – 2022 winter season. This ban does not apply to commercial skiing events outside FIS competitions, and WINTERSTEIGER fluoro waxes can still be used in recreational skiing beyond winter 2021/22.
- For EU countries only: According to EU legislation, new limit values have been in force for fluoro wax since July 2020. All WINTERSTEIGER fluoro waxes without exception comply with these new limits.

HWK RS - Fluor Powder

This premium fluor powder wax is used for moist to wet snow conditions. Evenly apply the powder wax onto the ski or board, work it in using the RC Felt Roller (Art. 55-500-325) or the Finish Cork (Art. 55-640-470) and after 15 minutes, use the Horsehair wax brush (Art. 55-500-078).

55-640-400	yellow, +15°C to -2°C, 20 g	pcs.
55-640-405	red, 0°C to -8°C, 20 g	pcs.
55-640-410	blue, -6°C to -16°C, 20 g	pcs.

HWK RS - Liquid Wax

The liquid waxes from HWK cover all types of snow from dry to extremely wet! Shake well before use, evenly apply the liquid wax onto the ski or board, work it in using the Finish Cork (Art. 55-640-470) and brush gently with the Soft Base Brush (Art. 55-500-076). Attention: store the liquid wax upright!

55-640-415	yellow, +15°C to -2°C, 50 ml	pcs.
55-640-420	red, 0°C to -8°C, 50 ml	pcs.
55-640-425	blue, -6°C to -20°C, 50 ml	pcs.

HWK RS - High Fluor Wax

With the high-fluor block waxes, WINTERSTEIGER offers you our top speed products for moist to wet snow conditions. Do not use when the conditions are very dry! All the following processing steps should be done in the movement direction of the ski: apply the wax onto the ski using a Wax Iron (e.g. Art. 57-100-310), allow to cool down for 15 minutes, scrape off the excess wax using a Plexi Scraper (e.g. Art. 55-200-013), brush off the wax from the structure using the Bronze Wax Brush (Art. 55-500-077) and finally polish using the Nylon wax brush (Art. 55-500-016).

55-640-430	yellow, +10°C to -2°C, 100 g	pcs.
55-640-435	red, -2°C to -6°C, 100 g	pcs.
55-640-440	blue, -4°C to -12°C, 100 g	pcs.

HWK RS - Low Fluor Wax

The low-fluor block waxes are perfect for dry to very wet snow conditions - mainly used as a base wax. All the following processing steps should be done in the movement direction of the ski: apply the wax onto the ski using a Wax Iron (e.g. Art. 57-100-310), allow to cool down for 15 minutes, scrape off the excess wax using a Plexi Scraper (e.g. Art. 55-200-013), brush off the wax from the structure using the Bronze Wax Brush (Art. 55-500-077) and finally polish using the Nylon wax brush (Art. 55-500-016).

55-640-445	yellow, +10°C to -2°C, 100 g	pcs.
55-640-450	red, +2°C to -8°C, 100 g	pcs.
55-640-455	blue, -4°C to -20°C, 100 g	pcs.

RS Low Fluor Service Wax, 100 g

The low-fluor wax with a universal temperature range! All the following processing steps should be done in the movement direction of the ski: apply the wax onto the ski using a Wax Iron (e.g. Art. 57-100-310), allow to cool down for 15 minutes, scrape off the excess wax using a Plexi Scraper (e.g. Art. 55-200-013), brush off the wax from the structure using the Bronze Wax Brush (Art. 55-500-077) and finally polish using the Nylon wax brush (Art. 55-500-016).

55-640-460	white, +10°C to -10°C, 100 g	pcs.
------------	------------------------------	------

RS Allround Ski Wax, 0F, 100 g

This allround wax is mostly used as a base wax for all snow conditions. Perfect for rental skis and snowboards. All the following processing steps should be done in the movement direction of the ski: apply the wax onto the ski using a Wax Iron (e.g. Art. 57-100-310), allow to cool down for 15 minutes, scrape off the excess wax using a Plexi Scraper (e.g. Art. 55-200-013), brush off the wax from the structure using the Bronze Wax Brush (Art. 55-500-077) and finally polish using the Nylon wax brush (Art. 55-500-016).

55-640-465	purple, +10°C to -10°C, 100 g	pcs.
------------	-------------------------------	------

55-100-605	optional upper frame	pcs.
55-100-606	optional light 220V/50Hz	pcs.

WINTERSTEIGER - Quickfix universal

Fast, universal, flexible

The WINTERSTEIGER Quickfix backshop vise allows for quick and secure clamping of all types of alpine, touring, cross-country skis and snowboards in one universal clamping system. This completely new designed backshop vise also features a vertical clamp on the optional adjustable rests. That allows skis to be clamped vertically so that side edges can be tuned quickly and easily.

- The clamping jaws allow for extremely quick adjustments to accommodate skis and snowboards.
- The clamping force can be adjusted precisely using the new handwheel so that only the appropriated amount of force is used.
- A pair of skis, up to 120 mm in width in the binding area, can be securely clamped in place. By using the included SNB clamping jaws, a pair of skis up to 140 mm width at the binding area can also be secured.
- Single or pairs of cross-country skis can be clamped for service using the optional XC ski rests.
- The optional clamping jaws for snowboards allows boards up to 320 mm width at the binding area to be secured.
- Vertical clamping of single skis for side edge tuning is done at a 30° angle for a more ergonomic side edge tuning.

Clamping devices

Clamping system Quickfix

7050-401-10	Quickfix vise + clamp jaws ski	pcs.
7050-401-11	Quickfix adjust.rests, W=400mm	pair

Quickfix XC- Rests, 1 pair

Cross-country skis are built to be extremely weight-saving. We therefore recommend using the optional Nordic ski rests for cross- country ski services, to provide even better support for the ski. 2 pairs of Nordic rests are required to clamp one pair of cross-country skis.

7050-1211-M01	Quickfix XC- rests	pair
---------------	--------------------	------

Quickfix Spare clamping Jaws Ski, 1 pair

These replacement clamping jaws are supplied as standard with the Quickfix clamping system (7050-401-10), and constitute the perfect spare part.

7050-1211-M02	Quickfix Spare clamp jaws ski	pair
---------------	-------------------------------	------

Quickfix SNB-Jaws, steplike, 1 pair

Snowboards can of course also be clamped with the standard clamping jaws included with the Quickfix clamping system (7050-401-10). To make it easier to work with snowboards, however, we still recommend these optional snowboard clamping jaws.

7050-1211-M03	Quickfix SNB-jaws, steplike	pair

55-240-350 255 x 40 mm pcs.

Spare Blade for SFI base planer

55-240-355 255 x 40 mm pcs.

Base Polish Set

For structuring the base.

7019-01111-V4 2 pcs. each, coarse and fine pk.

Professional Tru Bar 150 mm

Our best Tru Bar, a must for use with a stone grinder.

55-240-462 L = 150 mm pcs.

Metal Scraper

To remove excess repair material from the base. After the repair material has cooled completely, use the metal scraper to remove the excess material and blend the repair into the base. (packaged for retail)

55-240-457 130 x 60 x 0,7 mm pcs.

Snowboard Tru Bar Blade and Planer

Handles make this tru bar blade and base planer easy to use. The blade side is used as the tru bar, the square edge is the scraper.

55-200-010 320 x 30 x 3 mm pcs.

WORKSHOP ACCESSORIES

Edge Care

Cover Band PE, 25 mm x 15 m

To cover the crown area as well as the skin tech area at XC-skis during base grinding.

56-126-230	25 mm x 15 m	roll
------------	--------------	------

4

Edge Care

Sidewall Planer Ergo Razor

To remove sidewall material. The ERGO RAZOR sidewall planer is essential to prep for side edge filing as it is common for a file to be compromised by cutting into the sidewall of a ski. It is very important to remove the sidewall material to avoid loading files with plastic and to keep the sidewall from interfering with the bevel on the edge. The razor has an ergonomic design that fits into the palm of the hand. It is adjustable and can be used with both the right and left hands. It comes with a round cutting blade (packaged for retail).

57-401-100	Sidewall Planer	pcs.
------------	-----------------	------

Alu-Oxyd-File

To soften the edge. Absolutely necessary before using a finn file.

55-500-028	150 x 17 x 17 mm, grit 100	pcs.
------------	----------------------------	------

Pocket Stone

Made with the finest aluminum oxide to quickly remove minor burrs and imperfections on snowboard and ski edges.

55-500-182	100 x 18 x 8 mm	pcs.
------------	-----------------	------

Arkansas Soft Stone with Leather Case

The natural arkansas stone is the only stone in the world that will actually polish the edge of your snowboards and skis as it sharpens. Medium grit, grayish in color.

57-200-130	75 x 25 x 7 mm	pcs.
------------	----------------	------

Gummi Stone

This is a popular item used by every tuner. This soft gummi stone is used for fine polishing on the ski edge after grinding and filing jobs are finished. Sometimes referred to as an eraser stone.

55-420-240 50x20x80 mm, coarse, hard, grey pcs.

Gummi Stone

Softer than our regular gummi stone, this item is great for finer buffing and polishing on a ski and snowboard edge.

57-100-125 40x20x65 mm, very fine, soft, red pcs.

Soft Red Gummi Stone

For fine buffing and polishing on the edge. Starting at the tip of the ski/board, the gummi stone should be run at a 45 degree angle for up to 10 to 20 cm past the contact point. Making multiple passes, reducing the length of the stroke each time, feather the edge from the tip to the set bevels. Run the gummi stone from tip to tail to deburr and repeat the detune process in the tail (packaged for retail).

57-420-242 very fine, 40 x 20 x 65 mm pcs.

Brass File Brush

To clean debris from the teeth of files.

55-500-035 pcs.

File Brush, double-sided

Proper cleaning helps to prolong the life of a file. Use the brush side for general cleaning and the card side for stubborn clogging.

55-500-180 220 x 50 mm pcs.

WORKSHOP ACCESSORIES

Edge Care

BASE EDGE File Guide

To bevel the base edge from 0,5 to 1,5 degree. This base edge file guide uses the same quality in design and materials as the standard BASE EDGE File Guides (packaged for retail).

57-401-112	0,5° – 1,5°	pcs.
------------	-------------	------

File Guide PRO SHARP RACE, 85° - 90°

This updated professional side edge sharpener gives very accurate bevels from 90 to 85 degrees. A large knob allows adjustment to one of the 6 possible positions without the need of a screwdriver. Innovative arrow pattern allows waste material to fall free of the base without damage and reduces friction. Accepts file, stones, and diamond stones up to 6 mm thick and comes with a 80 mm ICECUT file (packaged for retail).

57-401-030	85° – 90°	pcs.
------------	-----------	------

Replacement Finn File 80 mm PRO SHARP, RACING SHARP

57-401-174	Spare File 80 mm	pcs.
------------	------------------	------

Angle File Guide Set

Set with 3 guides: 0,5°, 1° and 1,5°. Produces accurate degrees of base bevel, suitable for files up to 20 mm width.

55-500-095	0.5°, 1° and 1.5 °	pcs.
------------	--------------------	------

Spring Clamp 11cm, galvanized

To clamp the files at your Alu File Guide.

55-500-165		pcs.
------------	--	------

Alu File Guide

Our precision anodized aluminium file guides are the perfect choice for the home tuner. Each guide is milled with a channel in the corner to allow filings to fall away from the base. Tools can be used with most files and diamond or abrasive stones. (packaged for retail)

57-401-300	90°	pcs.
57-401-301	89°	pcs.
57-401-302	88°	pcs.
57-401-303	87°	pcs.

Tuning Steps

1

Zirconium:

Removes rock damage and burrs before using the file.

2

File:

Sharpens and sets the side edge angle at 90°, 89°, 88° or 87°.

3

Diamond:

Poishes and finish the edges. Best if used with water as a polishing solution.

RACING SHARP

Ergonomic design side and base edge sharpener is easy to use and allows your customers to maintain their edges between visits to your repair facility. Allows for 89° to 86° side edge bevel and 0.5° and 1° base edge bevel. (packaged for retail)

RACING SHARP File Guide

57-401-145	+ Finn File 80 mm	pcs.
57-401-146	+Zircon-,Finn-, Diamond File	pcs.

WORKSHOP ACCESSORIES

Edge Care

ICECUT Professional File

Files with Swiss precision. Used by World Cup technicians because of the precise cut teeth, comfortable tangless design, highest hardness and extended life time.

55-500-037	120 x 22 mm	pcs.
55-500-038	150 x 17 mm	pcs.
55-500-039	200 x 22 mm	pcs.

ICECUT Racing File

New type of racing file with special steel for racing use with an extremely long life time! Manufactured in a special steel and from the latest cutting technology, this file presents three major advantages compared to a traditional ski file: it sharpens faster, has an increased lifetime and gives to the edges a powerful sharp side. The best file for advanced sportsmen, preparation workshops and for professional skier.

55-500-042	100 x 22 mm, fine	pcs.
55-500-044	100 x 22 mm, medium	pcs.

Finn Files with Cover

High quality file for sharpening side and base edge. These are the same files used by World Cup service technicians and service shops around the world. Guaranteed for their quality and straightness, these are the best files you will find for the money.

55-500-130	150 x 15 mm, Cut 2	pcs.
55-500-131	200 x 20 mm, Cut 1	pcs.
55-500-132	250 x 25 mm, Cut 1	pcs.

Diamond File Sport

The latest in diamond stone technology, this is the best diamond stone we have ever used. The rigid composite body resist flex during use. Best used with water.

57-401-210	Grit 600, fine, 70 mm	pcs.
57-401-211	Grit 400, medium, 70 mm	pcs.
57-401-212	Grit 200, coarse, 70 mm	pcs.
57-401-220	Grit 600, fine, 100 mm	pcs.
57-401-221	Grit 400, medium, 100 mm	pcs.
57-401-222	Grit 200, coarse, 100 mm	pcs.

Moonflex File

These diamond files with a unique design of the diamond pattern removes material but leaves no strations for a fine polish. Best if used with water.

55-500-151	Grain 100, 102 x 25mm, black	pcs.
55-500-152	Grain 200, 102 x 25mm, red	pcs.
55-500-154	Grain 400, 102 x 25mm, yellow	pcs.
55-500-156	Grain 600, 102 x 25mm, white	pcs.
55-500-158	Grain 1500, 102 x 25mm, blue	pcs.
55-500-161	Grain 100, 70 x 25 mm, black	pcs.
55-500-162	Grain 200, 70 x 25 mm, red	pcs.
55-500-164	Grain 400, 70 x 25 mm, yellow	pcs.
55-500-166	Grain 600, 70 x 25 mm, white	pcs.
55-500-168	Grain 1500, 70 x 25 mm, blue	pcs.

Discman 4 with original Makita Li-ion battery (1.500 mAh)

The mobile grinding tool for side-edge angles between 85° and 90° at skis + snowboards. Including grinding disc, tools for changing the disc, chargeable battery and battery charger. By using a ceramic disc, this grinder enables fast and exact re-sharpening of the side edge in steps of 0.5°. For base edge tuning between 0.5° and 2° the optional base edge tuning attachment is needed.

- With MAKITA lithium-ion battery 1.500 mAh and MAKITA battery charger.
- With a very short charging time of the Li-Ion battery: only approx. 20 minutes.
- The lightweight lithium-ion battery enables a weight reduction of 400 grams at the Discman 4 with battery.
- Including a dust magnet for collecting the metal dust during grinding.
- NEW: In addition each Discman 4 is equipped with a new grinding support. This enables a larger contact surface at the base when grinding the side edge and facilitates the handling of the device at the ski.

55-100-670	With battery+charger 230V/50Hz	pcs.
------------	--------------------------------	------

Discman 4 with Transformer 230V-50Hz/ 18 V

Electrical grinding tool for side-edge angles between 85° and 90° at skis + snowboards.. Including grinding disc, tools for changing the disc and transformer. By using the ceramic disc, this grinder enables fast and exact re-sharpening of the side edge in steps of 0.5°. For base edge tuning the optional base edge tuning attachment is needed.

- With transformer 230V/18V, 50 Hz and a 3 m long power cable with EURO plug.
- With a very short charging time of the Li-Ion battery: only approx. 20 minutes.
- Including a dust magnet for collecting the metal dust during grinding.
- NEW: In addition each Discman 4 is equipped with a new grinding support. This enables a larger contact surface at the base when grinding the side edge and facilitates the handling of the device at the ski.

55-100-671	Corded Discman 230V/ 50 Hz	pcs.
------------	----------------------------	------

Discman 4 Transformer Kit 230V-50Hz/ 18 V and a 3 m long power cable

Transformer 230V/18 V, 50 Hz with 3 m long connection cable and battery housing. By this retrofit kit any battery operated Discman 4 device can be operated either by battery or by external transformer and power cord.

55-100-672	18 V – 230 V / 50 Hz	pcs.
------------	----------------------	------

Discman 4 solo without battery / battery charger

Electrical grinding tool for side-edge angles between 85° and 90° at skis + snowboards, without battery and battery charger. Including grinding disc and tools for changing the disc. By using a ceramic disc, this grinder enables fast and exact re-sharpening of the side edge in steps of 0.5°. For base edge tuning the optional base edge tuning attachment is needed. This Discman device without battery and battery charger can be used with a 18 V Makita Li-Ion battery 1,5 Ah, 3 Ah or 4Ah.

- Including a dust magnet for collecting the metal dust during grinding.
- NEW: In addition each Discman 4 is equipped with a new grinding support. This enables a larger contact surface at the base when grinding the side edge and facilitates the handling of the device at the ski.

55-100-673	without Battery / Charger	pcs.

Wax Iron WINTERSTEIGER

High quality wax iron for skis and snowboards. Fine tuned thermostat reduces temperature fluctuations and a thick metal base holds heat to prevent damage during waxing. (packaged for retail)

57-100-290	220-240V/ 50 Hz, 800 W	pcs.
------------	------------------------	------

Wax Iron WINTERSTEIGER Digital

Precise temperature settings with digital control combine with a highly accurate thermostat to ensure a correct, constant temperature. Adjustable from 80° to 180°C. The 15 mm thick heating plate with innovative dimpled surface which allows the wax iron to easily move across the base by reducing suction. The beveled edges let melted wax flow over the entire base evenly for consistent results.

57-100-310	230 V/ 50 Hz, 1000 W	pcs.
------------	----------------------	------

Waxpro 40

The handy waxer with changeable wax tub, adjustable waxing temperature, wax application in a few seconds and exact dosing. Including 120 mm wide wax roller.

55-115-005	Waxpro 40, 1 x 220-230V/50Hz	pcs.
55-115-006	Spare Tub with 2 rollers	pcs.

Waxpro 350

Handy waxer for snowboards including 350 mm wide wax roller, similar to Waxpro 40.

55-115-007	Waxpro 350, 1 x 220-230V/50Hz	pcs.

WORKSHOP ACCESSORIES

Waxing Material and Accessories

NEW

Spray Bottle 1 lt. and Extension 60° (empty)

Thanks to the curved extension tube, ski boots can be optimally sprayed even at the toe area. First, pressure is built up in the bottle by pumping pressure into the bottle. Afterwards, a light press on the spray button is sufficient for an even, constant atomization. The fineness can be adjusted by turning the nozzle nut. In addition to the extension shown on the picture (30 cm), a 5 cm long standard nozzle is included in the delivery too. The use of this spray bottle can therefore be varied, depending on the nozzle you use.

55-100-808	Spray Bottle 1000ml+Extension	pcs.
------------	-------------------------------	------

Paper Tape Racing Service

This paper tape is multi-functional with a multitude of uses. Bases can be covered and protected if edges are prepared manually. During waxing the ski bindings can be protected against wax by applying the tape on the side of the ski/board. Printing forms can be attached to the ski and can be removed spotless without sticky residue.

55-500-170	1 Roll = 50 m, W = 50 mm	pcs.
------------	--------------------------	------

Plexi Scraper Alpine

To remove cooled wax from the base. After the wax has cooled to room temperature, any excess must be scraped off and the structure must be brushed. Always allow the wax and the ski or snowboard to cool to room temperature before scraping, otherwise the warm wax will be pulled from the pores, leaving the base dry.

55-200-013	130 x 60 x 3 mm	pcs.
------------	-----------------	------

Plexi Scraper

Made of 1/4"/5mm thick, stiff black acrylic, these scrapers are perfect for snowboards or fat skis.

57-203-111	150 x 60 x 5 mm	pcs.
------------	-----------------	------

Plexi Scraper

This 3 mm thick acrylic scraper is more flexible compared to the scraper 57-203-111 and used for snowboards or fat skis.

55-200-014	200 x 60 x 3 mm	pcs.
------------	-----------------	------

Plexi Scraper Snowboard

55-200-015	320 x 70 x 5 mm	pcs.
------------	-----------------	------

Electric Scraper Sharpener WINTERSTEIGER, 100-240 V / 50-60 Hz EU

Manual resharpening of plexi scrapers can be a nerve-racking challenge after hot waxing with the wax iron. This electronic scraper sharpener sharpens scrapers quickly and conveniently, making your work more comfortable and efficient. An absolute must-have, especially for frequent waxers.

55-200-017 100 - 240 V / 50 - 60 Hz pcs.

Scraper Sharpener PLEXI SHARP

57-203-430 Scraper Sharpener pcs.

Spare Replacement Blade

57-203-432 Replacement Blade 100 mm pcs.

Wax Brush Bronze

This stiff, all-bronze base brush is perfect for cleaning out wax in a coarse structure on the base before applying hot wax. Comes with a hang tag and sticker, packaged for retail.

55-500-077 with euro hole hanger pcs.

Wax Brush Horsehair

This is a high quality brush used for cross-country, alpine and snowboard tuning. An essential tool for the serious tuner to expose the base texture. Comes with a hang tag and sticker, packaged for retail.

55-500-078 with euro hole hanger pcs.

Wax Brush Nylon

General purpose stiff nylon bristle brush. Perfect for wax texturing. Comes with a hang tag and sticker, packaged for retail.

55-500-016 with euro hole hanger pcs.

Base Brush Soft

This soft nylon brush is the ideal tool for base finishing.

55-500-079 120 x 70 mm pcs.

Base Brush Fiber/Nylon

Made out of fiber and nylon, this brush is very useful for cleaning and polishing. Use the fiber side for a deep cleaning of all base structures, followed by the nylon for a fine finish.

55-500-076 120 x 70 mm pcs.

WORKSHOP ACCESSORIES

Waxing Material and Accessories

Horsehair Brush Oval

To expose the base texture with fine-grain snow.

55-500-111 210 x 90 mm pcs.

Nylon Brush Oval

To expose the base texture with coarse-grain snow.

55-500-112 210 x 90 mm pcs.

Bronze Brush Oval

Perfect for cleaning out a coarse structure before applying hot wax.

55-500-110 210 x 90 mm pcs.

RC Roto Brush Steel, Fine

Used to open and clean the structure, can be very aggressive and should be used at speed under 1000 rpm with eye protection. Never press down while using the steel brush.

55-500-314 Bristle L.= 0.04x10mm, W=100mm pcs.

RC Roto Brush Bronze

The ideal brush to clean stone-ground skis before waxing. Also used for structuring and hard wax removal. Use single shaft with plexi hood. Max. 800 rpm.

55-500-306 Bristle L.= 0.06x10mm, W=100mm pcs.

RC Roto Brush Horsehair

High quality brush used as final pass to expose the structure and reduce static charge.

55-500-307 Bristle L. = 0.25x6mm, W=100mm pcs.

RC Roto Brush Nylon Grey

Used after horsehair, black nylon, or cork roller. Goes deep into the structure to remove excess wax as well as polish. General use as a final brush.

55-500-304 Bristle L. = 0.2x4mm, W=100mm pcs.

RC Roto Brush Nylon black

All around brush. For removal and polishing of medium or hard paraffin waxes.

55-500-305 Bristle L. = 0.2x10mm, W=100mm pcs.

RED CREEK Felt Roller

For melting additives, fluoro powder and even fluoro paraffins.

55-500-325 W=100mm pcs.

RC Roto Cork Roll

For melting additives, fluoro powder and even fluoro paraffins.

55-500-311 W = 100 mm pcs.

RC Single Handle with Protection

Long-life, stainless ball bearings and rubber handle. For use with one brush.

55-500-309 pcs.

RC Roto Brush Horsehair for Snowboards

Used to expose the structure and reduce static charge on snowboards.

55-500-316 Bristle L. = 0.25x6mm, W=300mm pcs.

RC Roto Brush Nylon, for Snowboards

Used as a final step. Removes excess pure fluorocarbon additives with very good results.

55-500-308 Bristle L. = 0.12x4mm, W=300mm pcs.

WORKSHOP ACCESSORIES

Waxing Material and Accessories

RC Roto Brush Handle Snowboard

Long-life, stainless ball bearings and rubber handle. To be used with snowboard brushes or two ski brushes.

55-500-310 pcs.

RC Double Handle Alpine with Single Protection

Long-life, stainless ball bearings and rubber handle. To be used with two ski brushes 100 mm wide. Can not be used with snowboard brush.

55-500-318 pcs.

Ultracam, Rivets, Shaft Grinder

ULTRACAM UP and ULTRACAM STAR

The latest boot fitting tools for adjusting fit in the forefoot, heel, instep, ankle and toe areas with permanent results.

ULTRACAM, long recognized as the leader in the simple, effective customization of footwear, introduces their latest offerings - the ULTRACAM UP and ULTRACAM STAR. Mechanical stretching coupled with precision thermal controls allow the comfort of new and existing ski boots to be maximized at the time of purchase or during return visits. With varied types of plastics presenting adjustment issues, fitters using the UP and STAR tools can confidently and quickly alter forefoot, heel, instep, ankle, and toe areas with permanent results. As always, the most recent tools from ULTRACAM also work with inline, ice, and hockey skates, as well as most trekking and hiking shoes

Convey an Authentic Fitting Experience.

With personalized fitting on the sales floor, retailers showcase professional competence to customers. Seeing the process often sparks interest from additional customers.

ULTRACAM UP. The Expansive Expander.

Comprehensive device with one forefoot press and one ankle press; can be upgraded by adding a second forefoot press. Separate controls for temperature and time simplify operation. The optional aircooling cuts the cooling time in half – increasing service margins and customer satisfaction.

ULTRACAM STAR. The Standalone Specialist

For the first time, the ankle/mid-foot press unit is offered as a detached tool. All fit adjustments required in the forefoot and ankle area can be made with this device. The combination of separate controls for temperature and time, new articulating arm, and the optional aircooling allow precise, complete work in an efficient manner.

AIRCOOLING. Spend a little - save a LOT.

Cooling time of footwear processed on ULTRACAM has been a significant part of the total processing time. With the new aircooling set, this „waiting time“ can be cut in half. The aircooling set offers quick cooling to four ULTRACAM UP or ULTRACAM STAR tools at one time when connected to an adequate compressed air supply.

ULTRACAM UP Basic (1Stretch+1Ankle Arm)

One Forefoot Press and one ankle Press, each with two separate control units for time and temperature. Including 3 pairs of lasts, 8 pcs. expansion adapter, measuring gauge and premounted valves for compressed air cooling.

01-2100-114

230 V, 300 W, 40 kg

pcs.

ULTRACAM UP – extra Forefoot Press

Optional second arm for ULTRACAM UP BASIC with separate control units for time and temperature. Including premounted valves for compressed air cooling.

01-2100-115 230 V, 240 W, 16 kg pcs.

ULTRACAM STAR – ankle Press single, electric

Single-arm ankle Press, with articulating arm and separate control units for time and temperature. Including ankle expansion set (art.no. 01- 2100-120) and premounted valves for compressed air cooling.

01-2100-116 230 V, 60 W, 14 kg pcs.

ULTRACAM aircooling set

Compressed air hose distributor for ULTRACAM UP and STAR models. Easily connect the Air Cooling set to compressed air and the respective ULTRACAM model for faster cooling times. - reduces cooling time to about 20 minutes.

01-2100-117 pcs.

ULTRACAM STAR Ankle Press Manual – Single

Single-arm ankle press featuring an articulating arm without heating function. Including ankle expansion set (art.no. 01-2100-120).

01-2100-118 12,5 kg pcs.

ULTRACAM STAR Ankle Press Arm DOUBLE electric

Double Ankle Press with articulating arms, and separate control units for time and temperature. Including ankle stretching set (art.no. 01- 2100-120); Digital gauge as an option.

01-2100-119 230 V, 120 W, 26 kg pcs.

ULTRACAM STAR ankle die set

1 small, large and oval ball with matching ring for ankle adjustments.

01-2100-120 pcs.

Digital Caliper for Ankle Arm

Opitonal gauge for precise measurments of the amount of stretch being applied.

01-2100-121 pcs.

ULTRACAM UP Last for ice skates/hiking boots

Used for ice skates, hiking boots and any other leather shoes. This set includes 3 pairs of special shaped lasts, 18 adapters for expanding and stretching problem zones and 4 u-bolts.

01-2100-132 pcs.

Ultracam Universal Top Plus Digital

With 2 removable arms and top plus accessory kit, u-bolts, round ball, ring punches and measurement scale. With digital display and removable ankle arm.

55-104-165 230 V, 450 W, 36,5 kg pcs.

Ultracam Top Plus Accessory Kit

Featuring left and right shaped lasts for all Ultracams. Kit includes: 2 pair of long adapters, 4 small round adapters, oblong ankle ball and ring punches.

55-104-221

pcs.

Ultracam Last and Instep Set

A must have accessory for the Ultracam boot press features two lasts for length stretching and a instep tool. Available only through WINTERSTEIGER boot fitting, this accessory set allows for stretches that were next to impossible before. For stretching the length of the boot, choose from a long or a short last for boot size. The Instep tool attaches to forefoot lasts size M and L. It has an element built in for fast easy stretches in the instep region of any ski boot or other footwear.

55-104-120

pcs.

Ultracam Instep Tool Small

This small instep tool with heating element suits to the small lasts.

55-104-225

pcs.

Ultracam Ankle Ball Oval

Expands problem areas near the insole.

55-104-224

pcs.

Ultracam Heel Adaptor with Heating Element

Used on the ankle punch, this new ball and ring style last includes multiple elements to allow for clean expansion of the heel pocket.

55-104-220

pcs.

Work Bench with wheels and drawers

Incl. wooden worktop, wheels and 3 lockable drawers, the perfect stand for your Boot Fitting Machine.

55-125-200	800 x 525 x 905 mm	pcs.

55-104-328	HSS drop burr M12, 30x25mm	pcs.

BD Foot Sizing Device Brannock

Stable aluminium foot sizing device for determining exact length in mondopoint size and width in mm.

57-305-004	Up to MP 34.0	pcs.
57-305-007	Junior cm, up to MP 24.0	pcs.

BOOT FITTING

ZELUP® Blaster Ecofriendly high-speed cleaner

ZELUP® Blaster Ecofriendly high-speed cleaner

ZELUP®

Ecofriendly, 3 in 1 high-speed cleaner.

Based on hydro-pneumatic fragmentation, a new cleaning technology has been patented by Zelup®. It uses only 15 – 40 liters/h and therefore 15 times less water than a high-pressure cleaner. This very low water consumption allows not only substantial saving, but also indoor cleaning.

The Zelup® Blaster does not produce any splashes or puddles and no water reaches the already cleaned surface. Equipped with an ingenious double trigger, it instantly switches between the cleaning and the drying mode. Its accessory brushes allow a deep washing.

ZELUP
distributed by **WINTERSTEIGER**

Your benefits summed up:

- Ecofriendly cleaning system for indoor use
- By using a wall mounted connection box, the ZELUP® BLASTER is continuously ready to use
- 3 functions with 1 tool: washing, brushing and drying
- The mobile cleaning station enables the universal use in your sport or rental shop
- Wall mounted connection box for operational readiness at one location

The Zelup® Blaster is thus 3 in 1: It washes, brushes and dries!

Zelup Blaster with straight brush and hose, I = 2.5 m

With nozzle Ø = 2,5 mm for boot cleaning and cleaning of other rental equipment.

The WINTERSTEIGER automation family Jupiter – the king of the ski service universe.

Striving for innovation, always staying one step ahead, anticipating and helping to shape the future – this has distinguished WINTERSTEIGER for decades. With the new generation of Jupiter automated machines, we are taking you on a journey to a new world, where many innovative features improve the ski service. From variable V-Edge tuning for the perfect ski experience to the new „Trim Cut“ for side wall preparation, Wintersteiger offers digital solutions and much more in the ski service universe. Proven features such as the Ceramic Disc Finish and the „paternoster“ – the most efficient ski magazine on the market – have been retained or enhanced.

wintersteiger.com/jupiter

Come with us and get to know the Jupiter. Combining numerous innovations with sophisticated engineering leads to a whole new world of ski service!

Your benefits summed up:

Completely individual machine configuration

- 5 different processing modules
- Highest throughput rate of more than 70 pairs of skis an hour
- 3 application levels for growing demands: Universal, Performance, Race

Optimum ski handling

- 3 feeding variants: Paternoster (X), loading unit (L), manual (M)
- Each feed option is also available in an extended race version for longer racing skis
- Suction-less ski transport with 9 or up to 11 cylinders (Race) per ski for perfect grinding right to the tip

Ceramic Disc Finish

Jupiter
Automatic Service Station for skis

Scout – Maximum performance from a compact footprint!

Automatic Service Station for skis – stone / disc processing on smallest room.

In addition to the stone-disc version, the Scout is now also available in a stone-disc-polishing version.

In developing the Scout, WINTERSTEIGER has decoupled size and performance once and for all. Due to the compact design of the machine, even small workshops now have enough space to make the move from manual ski servicing to automated, cutting-edge technology. One operator on the Scout achieves almost twice the throughput as two manual machines with one operator. In other words, the Scout's intelligent design means that upgrading to an automated machine is no longer about space, but economic sense.

Now available with polishing module!

Ceramic Disc Finish

Scout
Automatic Service Station for skis

Innovation V-Edge

For the ultimate skiing experience.

Edge grinding in particular is revolutionized by the new generation of Jupiter automated machines. The new V-Edge function grinds side and base edges along the ski length in the front and rear areas with variable angles. This results in a perfect combination of optimum edge grip and easy control of the ski. This increases the skier's fun and enhances their safety, meaning perfection for everyone, from leisure skiers to racers. V-Edge-ground skis deliver an entirely new skiing sensation, which you have to experience for yourself to understand this revolutionary technology.

Thanks to its digital networking, the Jupiter is able to automatically recognize skis and compare them with the data stored in the Easyrent rental software. The Jupiter then automatically activates the appropriate or saved edge grinding parameters. Alternatively, a QR code applied to the ski is scanned. The benefit in both cases: Automatic ski recognition results in individual edge grinding without manual intervention. In the Jupiter M/L machine version, a hand-held scanner is used for ski recognition.

Ski recognition with Easyrent connection.

- Skis are assigned to a category (Comfort, Sport, Race) in Easyrent.
- The Jupiter scans the Easyrent EAN code.
- The edges are perfectly ground depending on the category.
- Individually changed edge parameters are stored in Easyrent and are therefore precisely reproducible. Every ski is unique!

Ski recognition without Easyrent connection.

- Each ski is labeled with a durable QR code sticker, with a unique code for each of the 3 categories Comfort, Sport, or Race.
- The Jupiter reads the QR code and the edges are perfectly ground depending on the category.

Waxjet Pro

Hot Waxing Machine for Skis and Snowboards.

The Waxjet Pro from WINTERSTEIGER provides excellent waxing results featuring a short heat-up time. The new heating system provides a precise temperature control, while using up to 60 % less energy than comparable products. The optional edge deburring wheel and the easy roll exchange offers a very user-friendly service.

Your benefits summed up:

- Low energy consumption (-60 %*)
- Excellent wax results
- Short heat-up time
- Precise temperature control
- Operation from both sides of the machine is possible
- Easy roll exchange
- Compact design for minimum footprint
- Optional edge deburring wheel

* Savings of up to 60 % over comparable products.

7568-403-33 208 - 240 V, 50/60 Hz, 1 AC _____ pcs.

Stand with Wheels for Waxjet 93

7925-401 75 x 48 x 51 cm (L x W x H) _____ pcs.

Wax Future The Original.

The Wax Future is a World Cup tested waxing machine for snowboards, alpine and cross country skis. The Wax Future offers the highest level of „Racing“ quality waxing results, using the latest in Infrared Technology. After the wax has been applied, the Wax Future penetrates the wax deeper into the base due to the infrared radiation – for perfect gliding properties over a long distance. There are 2 types to choose from: Wax Future Wall Speed with double and Wax Future with single infrared heating lamps. Both types are equipped with speed regulation and multiple programs to choose from. The WINTERSTEIGER Wax Future is built sturdy enough for daily use in any work shop and features a three year warranty!

Wax Future Wall Speed.

Double performance: With its two infrared heating lamps you can reach an output of up to 40 pairs/h. The double infrared lamp power leads to perfect results in no time. Specific programs for race waxing optimize the radiating intensity.

Wax Future.

Sturdy machine with one infrared heating lamp for the intense but gentle waxing in the Race and cross country section.

Your benefits summed up:

- Additional offer for you shop
- Increased wax absorption for constant gliding properties over a long distance
- Quick and easy to handle
- Modern, powerful operating panel
- Economical wax consumption
- Space saving wall mount
- Speed ramp for XC skis
- 3 year warranty

Stand alone and flexible.

An optional stand is available if there is not any wall space to mount the Wax Future. The stand includes a set of 3 metal feet and support arms. (Optional available: article number 55-115-553-1)

Easy handling

Speedbrush

Professional Roto Speedbrush for skis and snowboards.

The professional Roto Speedbrush gives skis and snowboards the perfect finish by removing excess wax from the structure and polishing the base. The Speedbrush features an variable speed motor with a quick and easily replaceable brush.

Your benefits summed up:

- Variable speed
- Quick and easy brush change
- Optional stand

Technical data

Speed (rpm)	140 – 1400
Polishing wheel	Ø 155 x 350 mm (55-642-041)

Baseman

Easier. Quicker. Cleaner.
Base repair machine for skis and snowboards.

The Baseman was developed with an ergonomic lightweight design for ease of work! It also brings many more benefits. The repair location is easier to see thanks to integrated LED lighting. The high-performance heating unit with electronic temperature control means that the machine is quickly ready for action.

Improved melting technology guarantees a high-quality and wear-resistant bond between the base and the repair material. The optimized melting head and material feed ensure uniform and thin material application. Perfect distribution of material shortens the melting time and reduces the time spent for subsequent work steps such as base grinding.

Your benefits summed up:

- High level of user convenience thanks to ergonomic lightweight design
- Efficient downstream processing thanks to optimum melting results
- Excellent cost-effectiveness thanks to frugal use of material and stand-by operation
- Rapid heat-up time thanks to powerful heating unit
- Best possible view of the repair location with integrated LED lighting
- Easy replacement of the base repair material roll
- Improved ambient air thanks to (optional) Smogjet exhaust air system

Melting head with larger contact surface, lower center of gravity and lighting for a better view of the melting area. Results: Tangibly improved control.

Melting head with larger contact surface

Consistent temperature control with status indicator

Practical stand with cleaning blade

Optional „Smogjet“ air ex-
traction system for an im-
proved work experience.

Technical data

Baseman	
Nominal voltage	1 AC 100 – 240 V, 50/60Hz

Grinding Belts

WINTERSTEIGER – Best Belt Quality

Blue Grinding Belt:

This zirconium corundum grinding belt has a very high quality and flexible return idler, as well as synthetic abrasive grain with controlled breaking behaviour. This breaking behaviour means that the abrasive grain repeatedly produces new grinding edges on the grain. The belt has a long life-time and the grinding result is very good on the base, as well as on the edge (base and side edge). The belt needs to be slightly broken before first use. The last part of the item number corresponds to the belt grain: XX-XXX-080,-100,-120,-150,-180

Tip: Fast band speed increases the material removal.

Caution: Ensure adequate cooling.

Red Tuning Belt:

A mixed grain made up of ceramics and corundum makes this belt less aggressive than the blue grinding belt. Many tiny grain peaks provide a fine surface on the edge. A special backing film provides the tuning belt with a high tensile strength and reduced extension. The patented inlaid bonding film prevents oversize on the bonding point and results in an even grinding pattern without grinding marks. The edge is best polished and ground (tuned) in slight hanging position using a 40 Shore contact wheel. With that the grain touches only the base structure tips.

Tip: New tuning belts have to be broken more than base grinding belts. Fast belt speed and good cooling required.

Trizact™ Grinding Belt:

The pyramid shaped arrangement of the abrasive grain gives the Trizact grinding belt a longer lifetime and enables an even and fibre free result (structural grind), as well as very fine edge tuning. However the material removal is less than with the red tuning belt. This belt is ideal for snowboards, which, due to their shape (concave or convex), cannot be ground on the stone perfectly. The belt needs to be broken lightly before first use.

Tip: Only slight contact pressure and good cooling required.

Scotchbrite Belt (Waxing and Deburring Belt):

This belt is suitable for wet and dry operation and can be used for deburring, polishing and cold waxing (only dry process) in one work step. The belt has a low belt extension due to the reinforced nonwoven fibrous web and is particularly resistant to tearing and thus has an enormous lifetime. Caution: For dimensions 350 x 1300 mm and 350 x 2000 mm on machines with selfcentering idler wheel (from year of manufacture 2000), we recommend the use of a top quality belt type (with reinforced belt back).

Tip: Slow belt speed.

Moonflex Diamond Belt:

The special Moonflex grit enables an enormous lifetime of these side edge belts (more than 2000 pairs). Usage: grain 400 and 600 as tuning belt for very fine edge tuning, grain 060 and 120 as pregrinding belt for the discovery P-module.

Cork Finishing Belt:

For use after edge tuning. Fine hairs on the base are removed by using a lot of water, little pressure and low belt speed. A smooth and fibre free base is produced. This belt is mainly used for finishing and needs to be broken accordingly.

Tip: Slow belt speed.

Waxing and Polishing Belt:

These belts have a corundum or silicon carbide abrasive corn that is anchored solidly on a base made from elastic nylon fibres. This belt is mainly used for polishing after waxing.

Tip: Slow belt speed, low contact pressure.

NEW

Belt Cleaner 203 x 35 x 35 mm

When pre-grinding repaired bases, the grinding belt is very quickly coated with repair material. Subsequent application of this belt cleaner can free the grinding belt from the repair material and increase its lifetime.

55-240-120	35 x 35 x 203 mm	pcs.
------------	------------------	------

Belt Dresser Stone 50 x 20 x 150 mm

Make several passes across the entire width of the belt to break it in.

55-240-155	150 x 50 x 20 mm	pcs.
------------	------------------	------

Belt Dresser Stones for Machines

Those dressing stones need to be applied at new grinding belts.

Jupiter

55-240-152	35 x 20 x 355 mm	pcs.
------------	------------------	------

Discovery P (<= 2008)

55-240-154	65 x 25 x 25 mm	pcs.
------------	-----------------	------

Discovery 2, Mercury

55-240-153	350 x 35 x 20 mm	pcs.
------------	------------------	------

Discovery P (> 2008), Tunejet

55-240-157	400 x 50 x 25 mm	pcs.
------------	------------------	------

Grinding Stones

Structure your Success with first-class
WINTERSTEIGER grinding stones

To achieve the desired grinding result, some important factors have to be considered:
Abrasive grain type, grain size, binding material, pore former and a homogeneous pressing process. Furthermore, the slow heating and cooling during the firing process and the subsequent balancing of the grinding stones ensure constant grinding results over the entire lifetime of the grinding stone. The following classification of the various grinding stones makes it easier to pre-select according to your machine type and the desired grinding results.

Discovery II / Mercury:
Explanatory video for stone
and diamond change

Consistency:

Soft	↔	Hard
A softer binding material is necessary to achieve a perfect structure		A harder binding material increases edge con-tact resistance; Structuring possibilities are limited

Material removal performance:

Low	↔	High
The removal performance is low with fine abrasive grain and a harder binding material.		The coarser the abrasive grain and softer the binding material, the higher the material removal

Structure Pattern:

Fine	↔	Coarse
Fine abrasive grain and soft binding material allow for fine structures		Rounder abrasive grain and robust binding material allow for wider and coarser struc-tures

Grinding stone / blue, W = 200 mm, Ø 300 mm

MACHINE ACCESSORIES

Diamond Dressers

Diamond Dressers

The dressing diamond is used to cut the desired structure into the grinding stone. **Don't dress dry with synthetic diamonds → Risk of glowing out!** (Glowing out: Diamond needles may splinter due to overheating) To get the perfect diamond set up for your needs, feel free to contact our experts from WINTERSTEIGER customer service.

Explanations

Relevance of the „Total bearing surface“: The total bearing surface is the sum of the diamond cross sections. The higher the total bearing surface is, the more resistant the diamond. This also increases the lifetime.

Differences of Structures

5 x 0,6 x 0,6 mm

pcs.

Rectangular Diamond 1 x 0,5 x 4,0 mm

On this plate diamond the synthetic diamond plate is set higher and is pointed. Plate diamonds are very wear-resistant due to their high contact surface. The pointed diamond plate means this diamond simulates the action of a rhomboid diamond. This diamond is mainly used for linear Alpine structures.

Racing-Accessories

Accessories for Race NC, Omega RS and Sigma RS You can make the race!

Race Service Stone Grinding Machines for Alpine, Cross-Country and Jump Skis.

The race service stone grinding machines prove once again WINTER-STEIGER's commitment to market and technology leadership. They offer a full set of features for both alpine and nordic skiing.

Unbeatable variety of structures.

On the following pages you will find a huge selection of dressing diamonds and grinding stones for race service. Therefore, offering an unbeatable variety of structures.

Dressing diamonds for individual structure patterns.

The structure pattern depends on the diameter and arrangement and number of the diamond needles. The finer the needles, the finer the structure; the larger the needles, the coarser the structure. A rhomboid needle arrangement will produce sharper and more aggressive structures, whereas a square needle arrangement will produce smoother structures with a larger distance between the structure rows (= larger contact area). This is because the diamonds have different degrees of wear when the grinding stone is being dressed.

7

Omega RS

For all service professionals and racing specialists.

The Omega RS allows you to set your sights on the highest race grinding standards. After all, its development was inspired by the Race NC.

Your benefits summed up:

- Professional stone grinding at an entry-level price
- Ergonomic, rugged and compact design
- Touchscreen display with „Easy Go“ quick selection buttons
- Easy to operate
- Easy handling through supported feed lift options
- Optimum support for cross country skis
- Customizable to suit your individual needs
- Centering unit for custom racing structures

	350 mm	150 mm	pink	soft	8031-0211-V05

Alpine Diamond Dressers f.RaceNC/ OmegaRS/ SigmaRS

Rhomboid Diamond 8 x 0,4 x 0,4 mm

This rhomboid diamond is a synthetic diamond with five continuous needles. These square needles are laid on edge (hence they are referred to as "rhomboid") and produce more aggressive, pointed structures. The smaller needle cross-section is compensated for by the 8 needles and enables very fine, precise and consistent structure cuts to be produced. The 56-200-086 diamond is increasingly being used on manual machines with a narrow grinding stone (up to 200 mm) for Alpine skiing.

Micro NC, Omega RS 150, Omega RS 350, Race NC, Sigma RS 200, Sigma RS 350

56-200-086	8 x 0,4 x 4,0 mm	pcs.
------------	------------------	------

Square Diamond 3 x 1,0 x 1,0 mm

Discovery 1, Discovery 2, Jupiter, Mercury, Micro 71, Microjet, Omega S 350, Omega SBI, Shuttle 200, Shuttle 3C, Sigma S/RS 350, Sigma SBI, Tunejet

56-200-163	3 x 1,0 x 1,0 mm	pcs.
------------	------------------	------

Nordic Diamond Dressers f.RaceNC/ OmegaRS/ SigmaRS

Rectangular Diamond 1 x 0,4 x 2,0 mm

Due to the rectangular diamond plate, this diamond has a higher bearing surface than the 56-200-162. This means it can also be used with harder grinding stones and for deeper structures.

Micro NC, Omega RS 150, Race NC, Sigma RS 200

56-200-090	1 x 0,4 x 2,0 mm	pcs.
------------	------------------	------

Square Diamond 6 x 0,3 x 0,3 mm

With 6 extra fine needles, this diamond creates very fine XC-structures, finer than the diamond 56-200-162. Despite the fine needles, this diamond has a similar life time like the diamond 56-200-162 due to the double quantity of needles.

Micro NC, Omega RS 150, Race NC, Sigma RS 200

56-200-095	6 x 0,3 x 0,3 mm	pcs.
------------	------------------	------

Rectangular Diamond 2 x 0,3 x 1,5 mm

Plate diamond for very fine cross-country structures. The two plates arranged one behind the other give this diamond a high contact surface, making it more stable compared to the 56-200-095.

Micro NC, Omega RS 150, Race NC, Sigma RS 200

56-200-065	2 x 0,3 x 1,5 mm	pcs.
------------	------------------	------

WINTERSTEIGER special: The Ceramic Disc Finish

Disc technology has caught on. 90 % of all skis in ski production are tuned using disc technology. WINTERSTEIGER works constantly on further development of this tried and tested technology in the servicing sector.

Advantages for the sports retailer:

- Precise edge geometry
- Precise edge angles along the whole length of the ski or board
- Fine, smooth edge surface
- Always sharp grinding discs

Advantages for the rental shop:

- Frequent grinding possible thanks to low abrasion
- Long lifespan of rental skis
- No need to change belts
- Long lifespan of disc

Advantages for the end user:

- Improved turning qualities = more fun and faster learning results
- Better grip on hard slopes = increased safety
- Edges remain sharper for a longer period of time
- Easier turning on the edge = Carving

The following machines are equipped with

Ceramic Disc Finish: Jupiter, Scout, Mercury, Tunejet, Discovery, Shuttle, Trimjet, Mircojet Disc, Trim Disc 91, Trim Disc 71, Trim NC

With the Ceramic Discs 56-220-046, 56-220-048, 56-220-052, 56-220-053, 56-220-054, 56-220-060, 56-220-091 and 56-220-092 WINTERSTEIGER offers very fine balanced discs (each single disc is electronically balanced). These discs prevent vibrations and secure a high quality tune.

Ceramic Discs without Flange

Mounting Screws

For machines with ceramic disc finish.

Shuttle 200, Shuttle 3C, Trim 71, Trim 90/91

02-195-230 screw M5x30(6pcs./machine) pcs.

Discovery 1, Discovery 2, Jupiter, Mercury, Scout, Trimjet

02-191-225 Screw M5x25(6pcs./machine) pcs.

Multigrain Diamond $\varnothing = 15$ mm, Trimjet 2

Doublesided diamond bit to clean the ceramic discs at Trimjet 2 with central support. 2 pcs. needed per machine.

Trimjet 2

56-200-146 $\varnothing 15$ mm pcs.

NEW

Abrasive stone Jupiter $\varnothing 16$ x 42 mm

For cleaning and truing of the ceramic discs with the dressing function of the Jupiter machine.

Jupiter

55-240-148 $\varnothing 16$ mm x 40 mm pair

NEW

Insert - beveled - Jupiter Trim Cut

The automatic ski service machine „Jupiter" from WINTERSTEIGER features the new automatic sidewall removal device "Trim Cut". The chamfered inserts used for this purpose can be turned by 180° after wear has occurred. If both sides are worn, the insert can be easily replaced by the operator. In that case, both inserts of the Trim Cut device should be replaced.

Jupiter

56-250-010 1 pair pair

Torx screw M5 X 12 (for art.no. 56-250-010)

Replacement screw for the chamfered insert (56-250-010) of the "Trim Cut" sidewall planer. For one pair of inserts, 2 pieces of this screw are needed.

Jupiter

56-251-010 1 pc. pcs.

MACHINE ACCESSORIES

WINTERSTEIGER special: The Ceramic Disc Finish

Sidewall Planer Ergo Razor

To remove sidewall material. The ERGO RAZOR sidewall planer is essential to prep for side edge filing as it is common for a file to be compromised by cutting into the sidewall of a ski. It is very important to remove the sidewall material to avoid loading files with plastic and to keep the sidewall from interfering with the bevel on the edge. The razor has an ergonomic design that fits into the palm of the hand. It is adjustable and can be used with both the right and left hands. It comes with a round cutting blade (packaged for retail).

57-401-100	Sidewall Planer	pcs.
------------	-----------------	------

Replacement Blade, square

Suitable to the ERGO RAZOR sidewall planer.

55-500-088	Replacement Blade, square	pcs.

Replacement Blade, round

Suitable to the ERGO RAZOR sidewall planer.

55-500-089	Replacement Blade, round	pcs.
------------	--------------------------	------

Polishing Discs for Polishing Module

To polish the tip and tail areas for an optically perfect base edge.

Discovery 2, Jupiter, Mercury

56-200-504	Ø 250 mm, W = 50 mm, soft	pair
56-200-505	Ø 250 mm, W = 50 mm, hard	pair

Polishing wheel soft Ø 250mm, W=65mm

To polish the tip and tail areas for a optically perfect base edge.

Scout sdp

56-200-514	Ø 250 mm, W = 65 mm, universal	pair
------------	--------------------------------	------

Diamond dresser square 1x0.6x0.6x4mm

For dressing the polishing discs. Allows a little more material removal with the polishing discs compared to the diamond bit 56-200-152.

Discovery 2, Jupiter, Mercury, Scout sdp

56-200-220 1 x 0,6 x 0,6 x 4 mm pcs.

Multigrain Diamond L=10 mm, Mercury/Discovery 2

For dressing the polishing discs. Ensures an increased polishing effect (even finer edge surface) compared to the type 56-200-220.

Discovery 2, Mercury

56-200-152 W = 10 mm, multigrain pcs.

Dynamic Bridge

Carbon binding bridge: super light, takes care of your back.

Weighting in at only a few grams, the Dynamic Bridge weighs less than half that of a conventional binding bridge. This means less wear and tear on your shoulders and back. Compared to using conventional bridges, you lift one or two tons less per day (calculation based on 6 passes per single ski, considering 30 – 50 pairs of skis).

Complete product range.

The complete product range with 5 models – three sizes for alpine ski, one model for cross-country and one for racing skis used with a binding plate – makes the Dynamic Bridge a universal tool: Bridges suitable for every kind of ski.

Your benefits summed up:

- Light weight makes work easier
- Quick and extremely simple to handle
- Continuous contact pressure for precise grinding results
- High stability of the binding bridge at the ski thanks to large contact surface

Binding Bridges

Binding Bridge Carbon Universal, Super Light

Extremely light binding bridge with 860 g weight to use without dummy sole. Suitable for alpine and telemark skis with a minimum length of approx. 145 cm.

56-190-200 L = 1330 mm pcs.

Binding Bridge Carbon Medium, Super Light

Extremely light binding bridge with a weight of only 665 g. For medium skis with a minimum length of approx. 110 cm.

56-190-280 L = 1070 mm pcs.

Carbon Binding Bridge f. Children Skis, Super Light

Extremely light binding bridge with a weight of only 590 g. For junior skis with a minimum length of approx. 100 cm.

56-190-220 L = 930 mm pcs.

Binding Bridge Carbon Race, Super Light

For racing skis without mounted ski binding. With rubber cushion and velcro strip fixation, suitable for every binding plate.

56-190-290 L = 1200 mm pcs.

XC Bridge Carbon, Super Light

Extremely light weighted binding bridge with 410 g weight, with metal bar to attach to the binding. NEW: also suitable to bindings with Rottefella MOVE™ System.

56-190-240 L = 1060 mm pcs.

Bridge Adaptor Salomon Pilot, Pro Link for binding bridge 7217-4111-V01

For alpine bridge 7217-4111-V01 (for Salomon-Pilot Pro Link, Head Cyber, etc).

7217-0111-V05 Bridge Adaptor Salomon, 2 pcs. pk.

Binding Bridge for Extreme Carver Skis

Binding bridge height adjustable for extreme carver skis.

7219-4011-V02 L = 1044 mm pcs.

Spare Non-Slip Tape L = 943 mm for Extreme Carver Bridge

For binding bridge for carving skis (7219-4011-V02).

56-126-217 L = 943 mm pcs.

Spare Hinge for Extreme Carver Bridge

Adjustable height, for binding bridge for carving skis (7219-4011-V02).

7219-4012-001 L = 100 mm pcs.

Binding Bridge for Children Skis

For child skis with a minimum length of approx. 90 cm, vertically adjustable.

7228-0111-V12 L = 848 mm pair

Spare Non-Slip Tape L = 922 mm

For junior bridge 7228-0111-V10, as from July 2005.

56-126-216 L = 922 mm pcs.

Binding Bridge Alu for XC-skis

With metal bar to fix on the binding.

7226-07 L = 705 mm pcs.

Spare Non-Slip Tape L = 716 mm for XC-bridge 7226-07

For binding bridge for cross-country skis (7226-07).

56-126-219 L = 716 mm pcs.

MACHINE ACCESSORIES

Binding Bridge Stand

Due to the length of the racks, this rack can also be used for intermediate storage of skis or snowboards in the service shop.

7340-401 680 x 350 x 1680 mm pcs.

Moveable Rack for Binding Bridge Stand

For Bridge Stand (7340-01) with free rolling wheels.

7340-4111-V01 748 x 479 x 100 mm pcs.

Dummy Soles, Grey, 1 pair

For Boot Sole length 240 - 360 mm.

7219-42111-V1 pair

Dummy Sole for Touring Bindings, 1 pair

Also suitable for Dynafit touring bindings.

7219-42111-V2 pair

Adaptor for Rotary Plate Bindings

To mount on the dummy soles and to use only in combination with the binding bridge for carving skis (7219-4011-V02).

7219-0211-001 pcs.

Dummy Soles for Children Skis (1 pair)

For boot sole length 200 - 290 mm

7228-02111-V1 pair

Bridge Adaptor for MARKER Freeride Bindings

In combination with the binding bridge for extreme carvers (7219-4011- V02) this adaptor can be mounted under the dummy sole and reduces the angle as well as the height of the heel area of the binding.

7219-0211-V01 pcs.

Health Care

NEW

Working Gloves Touch

Your staff at the adjustment desks probably have a story to tell: quickly putting on protective gloves to minimize the risk of injury when adjusting bindings, and the next moment, taking the gloves off again to operate the touch screen. And it's the same all day long - gloves on, gloves off, gloves on, and so forth. To make life easier for you and your staff (as well as to save time), we now offer a convenient 12-pack of work gloves suitable for touch screen use.

Grease Gun

High quality grease gun. The construction allows a single hand operated lubrication for an easy work in restricted areas.

70-140-156	Grease Gun with hose	pcs.
76-320-141	Heavy Duty Grease 400 g	pcs.

Fluidmanagement

For a healthy workplace and a proper environment.

The fluid management system from WINTERSTEIGER supplies complete information for testing water and waterbased lubricating coolants. Offering a wide range of services for optimal testing, especially important for WINTERSTEIGER emulsion (lubricants, cleaning solutions, etc.). Thus the industrial safety and industrial laws are followed. Providing a healthier environment for everyone. This modular system offers one custom made solution for all ski and snowboard service workshops,

The quality of the preparation water is a decisive factor for the properties of a cooling lubricant. The optimal water hardness is between 10 and 15° dH. If the preparation water is too hard, a decalcifying system should be installed or it should be mixed with demineralized water in order to avoid lime deposits at your machine. The most common decalcifying process is cation exchange (using water softening salts). The water analysis data can be obtained from the relevant water company on request.

WINTERSTEIGER health-tips

Since lubricating coolants contain many different chemicals, the following preventive measures are recommended:

- Using suitable protective clothing
- Using suitable protective gloves
- Using suitable skin protection
- Do not rub or touch nose, mouth or eye area with dirty hands
- When skin comes in contact with lubricating coolants it should be immediately rinsed
- Thorough cleaning of the hands before meals, the toilet attendance, before work breaks and after completion of the activity
- Be sure to clean all parts of the body that have come in contact with lubricating coolants at the end of the work day with warm water and mild, non-scrubbing detergents
- Afterwards apply skin creme to washed areas, as skin tends to dry out easily after being in contact with so many chemicals

Cooling Lubricant(Emulsion) Pro-Tec B380
Fully synthetic abrasive coolant with extended long term stability for manual machines and the automated machine Shuttle.

Please note:

- Mixing ratio: 2 - 3 %
- Calculation factor for the refractometer: 3.2 - Concentration of the coolant in % = refractometer-value (°brix) x 3.2; e.g. with a reading value of 1.0 at the refractometer the effective mixing ratio is 3.2 %

55-645-306	10 kg can	pcs.
55-645-307	60 kg barrel	pcs.

Cooling Lubricant(Emulsion) Pro-Tec B550
Fully synthetic abrasive coolant with extended long term stability for automated machines Jupiter, Scout, Mercury, Discovery.

Please note:

- Mixing ratio: 3 - 4 %
- Calculation factor for the refractometer: Concentration in % = refractometer-value (°brix) x 2,0; e.g. with a reading value of 1,7 on the refractometer the mixing ratio is 3,4 %

55-645-304	10 kg can	pcs.
55-645-294	50 kg barrel	pcs.

Emulsion Mixer Monimix

For a perfect and constant mixture to the emulsion.

55-645-311

pcs.

Emulsion Mixer DOSATRON with Wall Socket

With this new mixer, an inserted piston motor ensures a continuous mixture of the emulsion with the beginning water, independently of possible throughput and pressure fluctuations in the water net of the inlet. Additionally the mixer can be adjusted within the range of 1 % to 5 % to the necessary mixing ratio.

The accessories of this mixer contain:

- 1 wall support
- 1 transparent hose with filter and ballast weight (to place into the emulsion barrel)
- 1 connection hose (length 2m) to the water tank

7019-1011-V02

pcs.

Manual Drum Pump for emulsion barrels

Suitable to the metal emulsion barrel with a 2" internally threaded hole: 55-645-294 / Pro-Tec B550.

With a costless adaptor the pump is also useable with the barrel 55-645-274 / Pro-Tec B370.

- Flow Rate: 25 lt. / min
- Length of the immersion tube: 880 mm

55-645-385

H = 1050 mm

pcs.

Barrel-Opener, galvanized

For 3/4" and 2" caps at emulsion barrels.

8570-0811-100

300 x 45 x 38 mm

pcs.

Micro Breather for Grinding Coolant

The lifetime of emulsions (grinding coolants) are significantly reduced by external pollution (bacteria) and missing oxygen in the water. If the mixture of water and emulsion in grinding machines is not in motion over a longer time, some bacteria or fungi can occur in the water quickly. To avoid this and to extend the lifetime of cooling lubricants, very fine air bubbles can be created with this Micro Breather by a ventilation plate. This ventilation plate is placed in the water tank and is controlled by a timer, which controls when and how often the air bubbles will be blown into the emulsion mixture. The advantages for the user: increased lifetime, less change intervals, less consumption of the emulsion, improved hygiene, pleasant working atmosphere.

55-645-375

230 V / 50 Hz, 5 W

pcs.

Refractometer

To check the mixing ratio of the emulsion in the water tank. Important in each workshop.

55-645-245 _____ pcs.

Pro-Tec B358 Analysis Kit with Refractometer

Enables the scrutiny and measurement of lubricating coolants as well as the documentation of the results of your measurement. This kit consists of: 1 pc. hard case. 1 set of 55-645-342 Pro-Tec B 360 combi test strips (100 pcs.) for the determination of ph-value, nitrite-value and water hardness, 1 pc. refractometer 55-645-245, 1 set of paper tissues, 1 pc. pipette, 1 pc. waterproof marker, 2 pcs. measurement charts, 1 handling and measuring instruction.

55-645-316 _____ pcs.

Pro-Tec B 360 combi strip (100 pcs.)

For the determination of ph-value, nitrite-value and water hardness with 1 strip.

55-645-342 100 pcs. _____ pk.

Pro-Tec B352 pH-Value Measurement Strips

55-645-244 100 pcs. _____ pk.

Pro-Tec B 351 Cult Dip Measurement Strips

For bacterial, fungal and yeast determination.

55-645-320 10 pcs. _____ pk.

Machine Cleaning Agent

Special anticorrosive cleaning agent.

7019-1011-V01 1 lt. pcs.

Pro-Tec G260 Lubrication Additive

Synthetic lubrication additive to add into the water tank - only for Discovery when using the Emulsion B370! Mixing ratio 0.05 % (0.5g/Liter), i. e. 1/8 lt. for the 225 lt. watertank at Discovery S / SF, 1/4 lt. for the 450 lt.-watertank at Discovery SS / PSF / SSF / PSSF / SSSF.

55-645-278 1 lt. pcs.

Pro-Tec G 220 Foam Cleaner Spray

Forms a stable foam of in-depth effectiveness.

55-645-370 Aerosol can 500 ml pcs.

Pro-Tec G 230 Preservative Spray

Protects the varnish and prevents the corrosion of bare metal parts.

55-645-360 Aerosol can 500 ml pcs.

Lubricating Spray NEOVAL MTO 300

A high quality lubricating spray with high-grade additives. This chemically optimized lubricant is unique in design to provide outstanding performance. Versatility and reliable long-term performance makes this product to one of the best. Sprays in all positions (ball valve); never becomes gummy or sticky; free from acids, sulphure and silicone; high creep properties; UV-resistant; reduces friction, temperature and wear out; proved rust and corrosion protection according to DIN No 51 585 AIB; excellent heat resistance (-35°C to +500°C, short-term up to +1060°C); chemically neutral towards plastic or sealing material; shelf-life in container: 10 years; precise long-term lubrication; showing also excellent anti-corrosion properties and optimal creep properties. Neoval MTO 300 penetrates even to inaccessible lubricating points. Lubricates all kinds of movable plastic or metal parts. Treated parts stay clean and protected, Neoval MTO 300 does not attract dust.

55-645-112 Aerosol can 400 ml pcs.

WD-40 spray

For cleaning, greasing and to eject the humidity.

55-645-110	Aerosol can 400 ml	pcs.
------------	--------------------	------

Pro-Tec G 254 System Cleaner 1 lt.

For the disinfection of the machine caused by spoiled emulsion. Recommended concentration: 1 – 3 % (10 - 30 g/lt.).

55-645-368	1 lt.	pcs.
------------	-------	------

Pro-Tec B 365 Biocide 1 lt.

For a preventive use in the water tank to avoid possible problems with bacteria and germs. Recommended concentration: 0.1 % (1 lt./1.000 lt).

55-645-348	1 lt.	pcs.
------------	-------	------

7

Note the following recommendation for the correct application of the system cleaner Pro-Tec G254 and biocide Pro-Tec B365 depending on the water tank capacity of your machine.

Machine	Volume of Water Tank	Quantity of System Cleaner	Quantity of Biocide
Trimjet	60 lt.	0,9 lt.	0,06 lt.
Omega, Sigma	80 lt.	1,2 lt.	0,08 lt.
Race NC / Micro NC	150 lt.	2,3 lt.	0,15 lt.
Scout	225 lt.	3 lt.	0,23 lt.
Jupiter with Water Tank 300 lt.	300 lt.	4,5 lt.	0,3 lt.
Jupiter with Water Tank 400 lt.	400 lt.	6 lt.	0,4 lt.
Jupiter with Water Tank 600 lt.	600 lt.	9 lt.	0,6 lt.
Mercury	225 lt.	3,0 lt.	0,23 lt.
Discovery 2 with Water Tank 225 lt.	225 lt.	3,0 lt.	0,23 lt.
Discovery 2 with Water Tank 350 lt.	350 lt.	5,3 lt.	0,35 lt.
Discovery 2 with Water Tank 550 lt.	550 lt.	8 lt.	0,5 lt.
Tunejet, Microjet	225 lt.	3,4 lt.	0,23 lt.
Discovery S / SF	225 lt.	3,4 lt.	0,23 lt.
Discovery PS / SS / PSF / SSF / SSSF / PSSF	450 lt.	6,8 lt.	0,45 lt.

Skin Protection Set Pro-Tec G290

With wall support; consisting of skin protection 1 lt, hand cleaner 3 lt. and skin care 1 lt.

55-645-355	Set including wall support	pcs.
55-645-356	Skin protection 1 lt.	pcs.
55-645-357	Hand cleaner 3 lt.	pcs.
55-645-358	Skin care 1 lt.	pcs.

Belt Filter

For optional use with the automatic service station Scout, Mercury and Discovery. By permanent separating of the sharpening arrears the cleaning intervals of the machine as well as the life time of the water will be extended. At Discovery machines with one base processing module, the small gravity filter (500 mm wide filter fleece) has to be used, at machines with 2 or more base processing modules the large gravity filter (700 mm wide filter fleece).

Gravity Filter, small for Water Tank 225 lt.

Discovery 2, Mercury, Scout

8570-0851-V10	3x400V/3x220V, 50/60Hz, 0,12kW	pcs.
---------------	--------------------------------	------

Gravity Filter, large for Water Tank 350 lt.

Discovery 2

8570-0851-V11	3x400V/3x220V, 50/60Hz, 0,12kW	pcs.
---------------	--------------------------------	------

Inclined Bed Filter for Water Tank 550 lt.

Discovery 2

8570-0851-V23	3x400V/3x220V, 50/60Hz, 0,12kW	pcs.
---------------	--------------------------------	------

Filter Fleece for Belt Filter

The 500 mm wide filter fleece rolls are used for the gravity filter 8570-0851-V10 and the inclined bed filter 8570-0851-V23. The 700 mm wide filter fleece rolls are used for the gravity filter 8570-0851-V11.

Filter Fleece with good filter performance

NEW

Water Cooler with Thermo Chiller

At service machines this cooling device (optional and retrofitted) secures an stable temperature of the grinding water. With this thermo chiller, WINTERSTEIGER provides a new and user-friendly cooling concept. Your benefits summed up: an continous water temperature ensures continous grinding results, longer life time and changing intervals of the grinding water, less bacterial growth, less emulsion consumption and a lower wear of the grinding stones and diamond dressers. Practical: the installation of the heat exchanger on the top of the water tank allows an easy cleaning of the water tank.

For Jupiter with 300/400 lt. tank and Scout

50-400-080	Chiller 1x200-230V/50-60Hz	pcs.
8570-0861-V01	Heat Exchange Kit 400 lt.Tank	pcs.
8570-0861-V20	Electric parts kit 3x400V/50Hz	pcs.

For Jupiter with 600 lt. water tank

50-400-080	Chiller 1x200-230V/50-60Hz	pcs.
8580-0811-V70	Heat Exchange Kit 600 lt.Tank	pcs.
8570-0861-V20	Electric parts kit 3x400V/50Hz	pcs.

For manual machines Omega/ Race NC

50-400-080	Chiller 1x200-230V/50-60Hz	pcs.
8100-0861-V01	Heat Exch. Kit f.Omega/Race NC	pcs.

Cooling Additive 1,5 lt. for Thermo Chiller

Pure water can freeze in the cooling circuit and cause malfunctions. Therefore, the cooling circuit of the thermo chiller and heat exchanger has to be filled up with this coolant and water in a mixing ratio of 1:1. The coolant prevents the freezing of the circulating medium, it protects against limescale and corrosion. 2 pcs. each of the coolant additive art.no. 76-400-142 (= 1.5 lt.) are supplied per heat exchangerart. We recommend draining and disposing of the circulating medium in the cooling circuit at the end of the winter season. The cooling circuit has to be refilled at the beginning of the next winter season.

76-400-142	1,5 lt. can	pcs.

55-640-300	5 lt. can	pcs.

NEW

Spray Bottle 1 lt. and Extension 60° (empty)

Thanks to the curved extension tube, ski boots can be optimally sprayed even at the toe area. First, pressure is built up in the bottle by pumping pressure into the bottle. Afterwards, a light press on the spray button is sufficient for an even, constant atomization. The fineness can be adjusted by turning the nozzle nut. In addition to the extension shown on the picture (30 cm), a 5 cm long standard nozzle is included in the delivery too. The use of this spray bottle can therefore be varied, depending on the nozzle you use.

55-100-808	Spray Bottle 1000ml+Extension	pcs.

PROSHARP AS1001

Skate Grinding Machine PROSHARP AS1001 SC

The PROSHARP AS1001 SC enables with automated grinding cycles, constant grinding pressure and feed speed a very precise and continuous grinding quality.

- Adjustable hollow setting, up to 6 mm radius
- Adjustable grinding wheel pressure and feed speed are constant during the entire grinding cycle
- The boot is fixed on a clamping device and the whole clamping device moves with a constant speed automatically forward and backward over the grinding wheel with a chosen number of grinding cycles (up to 5 grinding cycles)
- With dressing unit to create a Z-channel. This Z-channel gives increased grip, edge control and more speed!
- **NEW:** with self-centring clamping mechanism and a dress cover to reduce dust dissemination.

Technical data

- Power Rating: 200W
- Voltage: 1 x 100 - 240 VAC; 50 - 60 Hz
- Length: 670 mm, Width: 220 mm, Height: 260 mm
- Weight: 29 kg
- Comes with a stable transport box

Skate Grinding Machine PROSHARP AS1001 SC

55-755-042 100 - 240 V, 50 - 60 Hz, 200 W pcs.

PROSHARP AS1001 Diamond Dresser (synthetic)

55-755-050 pcs.

PROSHARP Blade Thickness Checker

For measuring the width of the skate blade and checking the grinding radius.

55-755-055 pcs.

PROSHARP Skate Grinding Wax

At the skate grinding machines with ceramic grinding wheel, a finer and more shiny blade of the skate can be reached by applying a „grinding wax“ at the grinding wheel.

55-755-110 62 g pcs.

SKATE GRINDING MACHINES AND ACCESSORIES
PROSHARP AS1001

Prosharp Blade Measuring Tool Package

Includes tools to check the blade-thickness, hollow-radius, angle and radius-profile on the blade.

55-755-118 pcs.

PROSHARP Fork Hone

Allows quick re-sharpening of the skates between the services with a grinding machine.

55-755-119 pcs.

Prosharp Blade Angle Tester

Use it to check the result of the sharpening. Just place it on the blade by holding the skate up side down in front of you and see if both edges are even. Magnets hold both pieces in place against the blade and secure the tool.

55-755-159 pcs.

Prosharp Leather Hone 29045

To achieve an extremely fine result after grinding. Use it at the end of the honing procedure.

55-755-169 pcs.

Prosharp Combi Stone X-3 / 25030

The X-3 combi hone is double sided with ceramic on one side and a diamond coat on the other. This is the ultimate hone to make the skate blade razor sharp!

PROSHARP SKATEPAL Pro 3

Skate Ginding Machine PROSHARP SKATEPAL Pro 3

The portable automatic skate sharpening machine for the highest demands. In a short time the high-precision diamond grind technology of this machine allows a constant, sharp and clean grind. The diamond grinding wheel with a fixed radius of hol-low guarantees a precise diamond cut and sets standards for optimal gliding on the ice. Simply clamp the skate and 2 - 4 minutes later you get perfect edges. The SKATEPAL brings a new higher standard of grinding. The hollow radius can be changed by the easy and fast change of the diamond wheel. The new SKATEPAL Pro 3 consists of a built-in carrying case and the vacuum cleaner can be connected on the right side of the case.

- USP's:
- Automatic centering unit for the skate
 - Diamond grind with predefined radius
 - Fast grinding of the skates within 2 – 4 min per pair Quick change of the grinding wheel
 - Easy use of the machine
- Technical data:
- Voltage: 12V DC, 1 x 100 - 240 VAC, 50 - 60 Hz, 150 W
 - Dimensions: 670 mm x 210 mm x 320 mm (L x W x H)
 - Weight: 14 kg

------------	------------------	------

SKATE GRINDING MACHINES AND ACCESSORIES

SSM-2/H 10

Skatepal Diamond Grinding Wheels

With given hollow radius; grit 252 = rough, grit 64 = fine;

Suggested grinding radius:

- Children: 13 mm
- Adults: 19 - 25 mm
- Figure skating: 10 - 13 mm
- Hockey: 10 - 13 mm for the goalie, 19 mm for fielders
- Rental: 19 mm = universal
- Speed skates: flat

Wheel diameter: Ø 60 mm for figure skating/speed skating, Ø 75 mm for Z-channel and Ø 100 mm for the other applications. The Z-channel is a groove in the middle of the blade along the entire blade length. This channel reduces friction with less blade touching the ice. It increases the grip and the speed by creating two interior edges. Mainly used for hockey boots.

55-755-094	Flat, Ø 60 mm, grit 64	pcs.
55-755-097	Radius 10 mm, Ø 60 mm, grit 64	pcs.

Primus Set 8 Standard

Econ Set 8 Premium Helmet

WINTERSTEIGER Drytech is a partner you can rely on for drying, disinfecting, and deodorizing all types of clothing and kits, such as jackets, pants, boots, gloves, and helmets – worldwide. By investing in professional drying and hygiene systems you are making a positive contribution to staff hygiene and health. And, you are also helping to extend the life-span of the high-quality clothes or kit. Compared to conventional drying systems, you can also reduce your energy costs with WINTERSTEIGER solutions. No matter what you want to dry efficiently and hygienically, our experts are here to help you find the right solution for your needs.

To find out more about our drying systems, request a copy of our Drytech brochure or visit our website at www.wintersteiger.com/drytech

Drying and hygiene technologies

SpeedDry

Rapid air circulation drying.

A high-quality air circulation fan combined with heated air ensures material-friendly and energy-saving kit drying.

GreenDry

Energy-efficient condensation drying.

As well as recirculation drying, Drytech drying solutions also offer highly energy efficient and economical condensation drying. The lockers use up to 60 % less energy than comparable products!

Sterex

plasma technology.

Make germs and unpleasant odors a thing of the past!

The Drytech drying solutions use cold plasma to efficiently kill bacteria, molds, viruses, and spores in an environmentally friendly manner.

New to the range: Our home series Talentum can be perfectly adapted to the space conditions in chalets, cottages and modern apartments through individual design options.

Easystore Flex

Custom-made solutions – the right choice for everyone.

WINTERSTEIGER's Easystore Flex systems for rental, depot and drying are extremely flexible and stable – they also offer a modern design as well as many new solutions that make them highly functional.

The Flex Modules can be combined for customized solutions.

Easystore Flex is the result of: the feedback and needs of our global customers, the further development of the tried-and-tested Easystore systems and the collaboration with renowned design agencies.

Experience the successful difference of Easystore Flex!

Summer season,
winter season, or
simply a new look?
Easy to replace
front panels

Compelling details.

Two types of Easystore Flex storage systems are available:

- Ski racks of sendzimir-galvanized panel-sheet **1** – ideal for the back-of-shop area
- Ski racks of sendzimir-galvanized panel-sheet with additional powder coating **2** – for a professional appearance

For an individual design, the ski rack's vertical supports can be equipped with narrow **3** or wide **4** front panels at the front and rear. We are happy to assist you with the design, including suggestions for the graphics.

FOM – Functional. Optimal. Maximal.

For the front panel, there are three options to choose from:

- Functional: The entry-level model in trendy white
- Optimal: A selection of wood designs
- Maximal: Panels printed with your logo and professional design or fabric covering

Functional

Optimal

Maximal

Easystore Flex – flexibly combining modules.

The individual storage and drying modules can be combined and arranged into individual storage systems – even within the same rack.

From planning to implementation. Benefit from our experience.

WINTERSTEIGER supports you from the planning phase all the way to implementation of your perfect rental and depot facility. An optimal organization – from the arrival of the customer to the issuing of the sports equipment – provides faster turnaround times and makes the work easier.

2D planning

3D planning

Implementation

Easystore Shop Furniture

An ingenious combination of design, ergonomics and flexibility.

Thanks to their reduced, modern design, Easystore Shop furniture can be perfectly integrated into any store concept – thanks to their well thought-out concept, they adapt individually to customer wishes and the environment. In addition, they are perfectly tailored to needs and processes in terms of material and function.

With Easystore Shop furniture, there are no limits to your wishes in terms of appearance and material; they create a harmonious environment for you and your customers.

Easystore

Tailor-made storage solutions – the right choice for everyone.

Easystore locker systems by WINTERSTEIGER make an impression with state-of-the-art design, maximum flexibility and stability, and maximum storage capacity on a minimal footprint. Customized features allow you to choose your own colors, logos, visuals and labeling to customize the locker design.

Thanks to our partnership with Steurer Systems in the field of storage lockers, our range of rental, storage and drying systems has become even more versatile. We plan storage lockers individually based on your requirements, taking maximum space utilization, drying and disinfection into account and at the same time catering to your access system needs.

Our Easyrent rental, storage and POS software makes storage management unbelievably fast and easy. It also features a simple module for managing and lock control for the Easystore locker systems.

Benefit from our experience. WINTERSTEIGER supports you from the planning phase all the way to implementation of your perfect storage facility. Read the following pages to discover in detail what WINTERSTEIGER offers you.

Please request the Easystore locker systems brochure for detailed information about customized locker solutions.
